A Grammar of the Oldest Kanarese Inscriptions, including a Study of the Sanskrit and Prakrit Loan Words.

Volume I

THESIS

Presented to the Faculty of Arts of the University of London, June 1933, in partial fulfilment of the requirements for the Degree of Doctor of Philosophy.

PREFACE.

THIS is an attempt to give a descriptive account of the grammar of the oldest Kanarese inscriptions from the linguistic material available in the Inscriptions of the sixth and the seventh centuries A. D. Every effort is made to explain the forms, wherever possible, in the light of those in Tamil, Malayalam, Telugu and Tulu; and also the developments of some of the old Kanarese forms into the modern Kanarese.

I take this opportunity to express my sincere gratitude to Professor R. L. Turner, Director, the School of Oriental Studies, London, who, as my supervisor, opened my eyes to the western methods of scientific research. He has been kind enough not only to go through the whole of this thesis, but also to help me constantly with his most valuable and enlightening criticisms and suggestions for improvement.

The fact that it is published as the first volume of the series—"Studies in Dravidian Philology" is due to the kindness and active sympathy of Dr. E. P. Metcalfe, D.Sc., F.-INST.-P., and Rajakaryapravina N. S. Subba Rao, Esq., M.A. (Cantab.), Bar.-at-law., the former and the present Vice-Chancellors of the University of Mysore. I would be failing in my duty if I did not acknowledge these obligations and express my sincere gratefulness to them and the University of Mysore.

THE UNIVERSITY LIBRARY, MYSORE, 27th November 1941.

THE ABSTRACT OF THE THESIS.

The title of the Thesis: A Grammar of the Oldest Kanarese Inscriptions, with a study of the Sanskrit and Prākṛt loan-words.

The thesis is an attempt to give a descriptive account of the grammar of the oldest Kanarese inscriptions from the linguistic material available in the inscriptions of the sixth* and seventh centuries A. D.

It consists of three parts:

Part 1: The Grammar: Consisting of short chapters on the history of certain consonants and consonant groups, substantives, adjectives, pronouns, numerals, verbs, adverbs and conjunctions. An attempt is made to explain the forms, wherever possible, in the light of those in Tamil, Malayālam, Telugu and Tulu; and developments of some of the old Kanarese forms into the modern Kanarese are noted. The last Chapter is devoted to remarks on the word-order.

Part II: The Inscriptions: Text of the Inscriptions studied.

Part III: The Index: Index of all words in the Inscriptions studied, with etymological notes.

^{*} Recently an inscription of the second quarter of the fifth century A. D. (circ. 450 A. D.) has been discovered at Halmidi, a village about five miles to the north-west of Bēlūr, Hassan District, Mysore State, S. India. (Vide M. A. R. 1936. pp. 73-80). The conclusions reached in this Part of the thesis are not affected by the discovery of this new inscription.

INTRODUCTION.

The present thesis is an attempt to deal, in some detail, with the grammar of the Old Kanarese inscriptions of the 6th and the 7th centuries A.D.

There are four grammatical treatises on Old Kanarese, based on the ancient literary works. Occasional references to grammatical points are found rhetoric, "Kavirājamārga" by work onWestern scholars Nrpatunga (877 A.D.). written grammars in English on Kanarese. McKerrell of the Madras Civil Service dedicated his grammar of Kanarese language to King George IV, in 1820. Caldwell wrote in 1856 "A Comparative Grammar of the Dravidian or the South Indian Family of Languages" and a second revised edition of it was published in 1875. In this comparative study, Caldwell refers to the general tendencies of the Kanarese language, old and new, as compared with Tamil, Malayalam, Telugu and Tulu. It is Dr. F. Kittel who wrote the most systematic and complete

^{1. (}a) Karnaṭaka kāvyāvalōkana by Nāgavarmma—C. 1045 in 96 Kanda verses with illustrations in verse-given as the first chapter of his work on rhetoric.

⁽b) Karnātaka Bhāṣā Bhūṣana by Nāgavarmma, C. 1045 in 269 Sutras in Sanskrit with a Sanskrit vṛtti or gloss and illustrations.

⁽c) S'abdamaṇidarpana by Kēs'irāja, 1260 A. D. in 320 kanda verses in old Kanarese with his own gloss on each verse and is "the fullest exposition of the language of his period":

⁽d) Karnāṭaka S'abdānus'āsana by Bhaṭṭākaļanka (1604) in 592 Sanskrit Sūtras with illustrations from ancient literary works.

grammar on the Kanarese language in English in 1903.

McKerrell deals with New Kanarese, but Caldwell deals with the old as well as the new. Kittel has given a thorough exposition in English of all the Kan. grammars and also of O.K., M.K. and N.K. with occasional references¹ to the grammatical forms in the old Kanarese inscriptions.

Such references to the old Kanarese inscriptions are very few compared with those to old kāvyas. In the introduction to his "Kannada-English Dictionary", Kittel says that he has not been able to include all the words occurring in the inscriptions, published so far.

The four grammars on O.K. referred to above, as we now have it, are the originals, as modified by "the endless blunders of drivelling and hireling transcribers, the paucity of (good) duplicates of MSS. for collation and the comparatively very small number of men to be found among the natives possessing appropriate philological information, soundness of judgment or zeal for literary research and general improvement." Further, the texts of these grammars are altered by the pandits who hoped to add to the dignity of Kanarese by the free use of the terminology and principles of Skt. grammar. The Kanarese kāvyas have not suffered less in this manner.

But the Old Kan. inscriptions are, fortunately, not liable to alterations of this kind. Hence a study of the O.K. inscriptions will give reliable information about the grammar of O.K. from the earliest times up to the present.

^{1.} K.G. pp. 42, 43, 48, 51, 67, 139, etc.

^{2.} Reeve in the preface to his Dictionary P. II (1832).

The oldest specimen of O.K. is found in the inscription of 578 A.D. (No. 1 in Part II). But some scholars¹ think that specimens of Old Kan. are found in the Oxyrhyncus papyri No. 413 of the 2nd century A.D. The language of the passages under reference has not been accepted as Kanarese, in spite of Dr. R. Shamasastri's attempts. Dr. Shamasastri has not convinced us that the words are old Kanarese.

The inscriptions, given in the Epigraphia Carnatica; the Epigraphia Indica; "The Pāli, Sanskrit and Old Canarese Inscriptions (Fleet)"; the Inscriptions of Mysore and Coorg (B. L. Rice); The Archæological Reports, issued by the Government of India and other Provincial and States Governments; the "Historical Inscriptions of Southern India" (Madras University 1932), and the inscriptions, published in the following Journals, have been consulted:—

- 1. The Journal of the Royal Asiatic Society of Great Britain and Ireland;
- 2. The Indian Antiquary;
- 3. The Journal of the Bombay Branch of the R.A.S.;
- 4. The Journal of the Mythic Society;
- 5. The Mysore University Magazine (Kan.);
- 6. The Karņāṭaka Sāhitya Pariṣat Patrike.

^{1.} S. Levi. I. Ant. XXXIII, p. 12; Hultzsch, J. R. A. S. 1904; p. 601. Grierson and Sten Konow. L. S. I. Vol. IV, p. 365; Dr. L. D. Barnett: Journal of Egyptian Archæology, April 1926; Dr. R. Shamasastri: M. A. R. 1926, pp. 10-14; S. Srikantaiya: Mythic Society Journal, July 1928; M. Gövinda Pai: Prabuddhakarnāṭaka, Vināyakana sancike, 1929.

The following inscriptions claim to be more ancient than that of Bādami, on account of the S'aka dates given in them:—

EC. III. (1) NJ. 110 - 103 A.D. (S'aka - 25);

(2) NJ. 199 - 189 A.D. (S'aka - 111);

(3) NJ, 122 - 266 A.D. (S'aka - 188);

EC VII. (4) SK. 52 - 357 A.D. (S'aka - 279);

ECI. (5) CG 1 - 466 A.D. (S'aka - 388);

But these are all spurious:—

(1) NJ. 110. (Kūḍlāpura). Rice suspects it to be later in origin.

See EC. III. Introd. p.1.

Fleet thinks it spurious:--DKD. p. 301.

Kielhorn thinks it to be one of about 1148 (K.L.I.S.I.P.)

- (2) NJ. 199 (Gattavādi). Rice says the date is incorrect, probably 8th century. See E.C. III. Introd. P.2. probably S'711 and not S'111. Fleet thinks it spurious. (D.K.D. p. 301.) He says the Characters are of 9th of 10th century.
- (3) NJ. 122 (Tagadūr). Rice thinks that the date is incorrect: EC. III. Introd. p.2. Fleet says it is spurious. cf. Tanjore grant of 248 A.D. (spurious.) belongs to 10th century. (EI. III. 174, 1 Ant. VII, 212.) Kielhorn says the date is irregular, and it is spurious. No. 109.

N.B. Dr. A. V. Subbiah says the date is irregular, (p.142. S.S.D.I.)

(4) SK. 52 (Tagarti agrahāra). Rice says in E.C. VII. Introd. p. 12 that it is an extraordinary mixture of As'oka, halakannada and nāgari characters, and later in origin. cf. Sh. 4. No. 110. Kielhorn says that the date is irregular (I. Ant. VII. 173), and it is spurious.

(5). Cg. 1. Rice thinks this to be genuine. (1) EC. I. Introd. p.4. (2) EC. IV. Introd. p.6 in reply to Fleet; (3) EC. VI. Introd. p. 30, 466 A.D. replying to Fleet. N.B. (1) Dr. R. Shamasastri in MAR. 1926 states Avinīta may have been a boy king n 475 A.D. (2) Sewell and Dr. S. K. Iyengar state that the date is irregular and cannot be safely trusted (Historical Inscriptions of Southern India-Madras University publication 1932). Description of boundaries is the same as or similar to, that of N.J. 122 (3) above. Fleet thinks it spurious:1 (1) EI. III. 162; (2) EI. VI. p.79 (it belongs to the 6th century. (3) D.K.D. pp. 297-300. Kielhorn in K.L.I.S.I. states that the date is irregular and it is spurious. cf. (1) I. Ant. XXIV. p. 11, No. 169, (2) I.Ant. XXX, p. 219, No. 40.

N.B. Dr. A. V. Subbiah, p. 143 of "Some Saka Dates in Inscriptions" says "The date is irregular, either the Nakṣatra or the fortnight is wrongly quoted."

The following undated inscriptions, though stated to be genuine by Rice, are spurious:—

- (1) Db. 67 and 68 -459 A.D.
- (2) Cd. 43 fifth century
- (3) Cm. 50 C. 480.
- (1) D. B. 67: A.D. 459 and D.B. 68. A.D. 517 Bangalore); Rice thinks these genuine. cp E.C. IX. Introd. pp. 1 to 3. Kielhorn in K.L.I.S.I. Nos. 113 and 114 thinks that these are spurious, cf. Cg. 1. with Db. 67. (S'388).

^{1.} Mercara plates: I Ant. I. p. 360.
Nāgamangala plates, Vol II. p. 155.
Mallohaļļi grants, Vol V. 133.
I Ant. Vol VII. p. 101. No. 38.

- (2) Cd. 43 (Chitaldroog): Rice thinks it genuine E.C. XI. Intr. 5. "There is nothing to throw light on the question as to who he was". It is a stray verse. Characters are not clear on the plates it is doubtful whether it can be earlier.
- (3) Cm. 50 (S'iragunda): Rice says it is genuine and "is the oldest Ganga inscription, must be assigned to the end of the 5th or the beginning of the 6th century, Kd. 158 refers to this. [EC. VI. Intr. pp. 5 and 6.] N.B. This plate is not clear.

These are undated. Rice considers these as genuine. The characters are not very clear; in some, they are of later date.

There is one inscription dated 601 A.D. (S'522)¹. Fleet has pointed out that this is a spurious record, as the characters and the polished language show and that it belongs to the middle of the 10th century, though the matter may be ancient.

11 Plates

These inscriptions are selected almost entirely on the authority of the epigraphists, as these do not mention dates or years in which they were installed. Only a few give the names of historical persons. Of these, the plates of 11 inscriptions as given in the E.C. and I. Ant. have been carefully examined. Judged from the plates given in S.I.P. and I.P.¹,

^{1.} South Indian Paleography by A. C. Burnell and Indian Paleography by G. Buhler (translation by J. F. Fleet).

these are of about the 7th century A.D. as B.L. Rice has dated them.

The same inscription edited by two people from different estampages shows the following differences:—

Rice (1902) knew Fleet's version of it. But Rice is wrong in writing alivon for alivon and algeyan for algeyan. About the other 55 inscriptions, our dependence on Rice's version is inevitable.

Of the 66 inscriptions selected, all except the following, relate to Jain religious practices: Nos. 1, 2, 3, 4, 5, 6, 7, 8, 61, 62, 63, 64 and 65.

Of the Jain inscriptions, the following record the death by "Sanyāsana" of Jain monks and devotees:

Nos. 9 to 26, 29 to 37, 40 to 45, 49 to 54, 56 to 60 (inclusive) of which Nos. 11, 17, 19, 33 and 44 are those of Jain women.

Of the tombs (or epitaphs) Nos. 18, 27, 39, 46, 47 and 48 are those of men, while 42 and 55 are those of women.

In the non-Jain inscriptions, No. 61 relates the heroism of Kappe-Arabhattan; Nos. 5 and 6 relate the remission of taxes by a royal proclamation; and Nos. 1, 3, 4, 7, 8, 62-65 inclusive, record the gift of lands to temples and priests.

In the following 'inscriptions, there is reference to historical persons:—

- 1. Mamgaļīsa (I.Ant. X. 60, P. SOCI. No. 40)
- 2. Polikēsiarasar¹ (I.Ant. VII. p.211).
- 3. Citravāhana.1
- 5. 6, 7. Vinayāditya (P.S.O.C.I. Nos. 14 and 17; I.Ant. VI. p.86)
 - 29. Bhadrabāhu and Candragupta.
 - 62. Gunasāgara (Father of Citravāhana).
 - 63 and 64. S'antarasa.
- 65. Vijayāditya (I.Ant. IX.; P.S.O.C.I. 76, 126, 130; I.A.X. 60

^{1.} E. I. VII. Appendix No. 29; I. Ant. XIX. p. 149. P.S.O.C.I. No. 16.

xxi

6. Pogilli of Sendraka family (P.S.O.C.I. No. 152; I.Ant. Vol. XIX. p. 144).

In many of the inscriptions a large number of words are effaced or illegible. An attempt is made to use the words that can be made out in these.

PART I.

A. CONSONANTS AND CONSONANT GROUPS.

An attempt is made in this section to give the history of O.K. p, r, v and l with a descriptive account of O.K. consonant groups and long consonants.

History of O. K. p. (ಮ).

THE change of p, initial and intervocal, to h was noticed by Western scholars early. Caldwell says that "the initial p of nearly all the words, whether they are pure Dravidian or Skt. derivatives—changes to h." But a careful study of this change of p to h was made by Kittel in his Grammar. He points out that initial p was changed to h- in Kēs'irāja's time (1260) optionally. But he has not given evidence from the inscriptions to show when p changed to h.

An attempt is made in this section to show from the forms in the inscriptions when this change began and how it developed:—

The following words with initial P. are found in the inscriptions of the 6th and 7th centuries:—³

pali (haļi), pārvvarumān (hātuvarannu), pālum (hālū), pāvu (hāvu), pin (himde), pirigum (hiri), pulla (hullannu), pulu (huļu), pūņi (hūņu, obsolete), peran (hera, hora), perjediya (hejjede), pelcuge (heccu), periyā (hiriya), pēlda (hēlida), pokka (hokka), pogevōgi (hogahōgi), pomgoļ-(homgol-), podeda (hodeda), poragu (horagu)

The forms taken from the inscriptions are given in the appendix to this section. The following inferences are based on them:—

Up till the end of the 9th century, p- is preserved.

^{1.} C.D.G. pp. 156 and 157.

^{2.} K.G. Sections 64, 184, 223, 224, 370.

^{3.} N.K. equivalent in brackets.

In the 10th century, forms with h- in place of pbegin to appear in all parts of the Kanarese area. The h- forms are more in evidence in prose, particularly where the boundaries of lands granted are described. In verse, it is always p- that is predominant and very few h- forms are found. This is not uniform in all areas.

In the 11th century, there is very great confusion in the use of p- and h- in verse, sometimes p- and more often h. But in prose, it is always h, though occasional use of p- is not rare. The 11th century, therefore, seems to be the period of transition

In the 12th century, even in verse, the use of h-forms increases in number; the intervocalic-p- is also changed to -h- in such words as Tailaha (proper name) (1152), hōheyam (1162), ulihim (1172), Biluhunāḍu (1175), alihidaḍe (1175), hōharu (1175), Tōraha (1179) (proper name).

In the 13th century, h-goes on replacing p- and -p-. more and more. This is clear from the list of words given. The peculiarity of the century is -pp- > -h . e.g. appa > apa > aha (129ŏ), bappa > baha. ippa > iha, (1300), though in the previous century hōha (1182) shows the tendency was there.

It is in the 14th century that h- and -h- are fully established in place of p, initial or intervocalic. Even skt. lws. such as Nrpam > Nrham (1382). In verse, the archaic forms with p. are found. That the people were using h- instead of p- long before their use in literary composition becomes clear by the early appearance of h- in prose, specially in the description of boundaries of the lands given to temples, mathas and scholars, in all the areas.

In the 15th century, fewest forms with p. are found, clearly indicating the complete displacement of p by h initially and intervocalically.

This displacement was carried to extremes in the 16th century when pattana is found as hattana (1557). In the 17th century p- appears only in some verse portions and h- is the rule in prose and verse.

The 18th century does not differ very much from the 17th and from 1800 onwards there is not much change in the history of p and h.

That the displacement of p- by h- is not restricted to the initial position of p. or before particular vowels is made clear by such forms: himdu, himgu, hulu, hūdu, heccu, hēlu, hōgi, hōda, hōhanu, baha, taha, iha.

Which is earlier, Pr. Drn.* -p- > -v- or Pr. Drn. * -p- > -h-? The change of -p- to -v- is found in the earliest inscriptions. There is no single -p- in Kanarese. Pr. Drav. * -p- > -v- in Kanarese, when it became intervocalic.

The following are found in the inscriptions of the 7th century. Here also the p- of the 2nd member of this word > intervocalic, and therefore -v-.

edevidiyal (40-3); Edevolalnādu (9-28), pogevēgi (3-7), mūvetmūrā (3-6: mamjuvēl (37-1), biţṭavol (61-9), salvavol (21-1).

Lws. kavileyumam (5-13; 673), mahātavan (35-2) mahātavadi (5-4).

This change is very common in the later inscriptions:

800-900:—800. Kīrtivura, EC. VII. SK. 283, (888) kavile, EC. I. 2. (890), pervolala (71) E.C. IV. Yd. 60, Paganṭevaḷḷame (25) EC. IV. Yd. 60. Permanaḍivaṭṭamgaṭṭi EC. I. 3.

900-1000: 900. Turumdavolala EC. IV. HG. 110, (900). paravendirannan EC. II. 448, (990). marevokkara (12) EC. III. My. 36.

1000-1100:—1057. devalōkakke vōdaļ (27) EC. IV. HG. 18, (1070). Posavaļļi (5 and 6) EC. I. 50, (1085). Mokkaverggade EC. VII. Sh. 10.

1100-1200:—1104. pempuvetta (34) EC. VII. SK. 131, 1113. Kāravurada EC. III. NJ. 44. 1199. marevokka (21) EC. IV. Ng. 49.

This is very common in all the inscriptions.

But the change of Utsava to Utsaha, rāvuta to rahuta and the survival of hōvaru (1544) for hōharu shows that, at the time of the displacement of -p- by -h-, -pp- which had become -p- was converted to -h-as in hōharu, and that the form with -v- < -p- like 'hōvaru' was an analogical formation (cf. īvaru, kāvaru, mīvaru) and they were replaced by hōguvaru later.

Even when p. was being replaced by h-, h disappeared, i.e., p > h. > o. (zero).

A. D. 1219. ōgu for hōgu } 1.15. ōdar for hōdar } EI. V. p. 261. 1634. ada-u for adahu < adapu-pledge or pawn

(EC. II. 250).

In N. K. colloquial speech of the uneducated classes, h- has practically disappeared. This disappearance is not before particular vowels - e.g.

- a. hakkalu, hagga, haḍapa, haṭṭi, haradāri, harige, havaṇisu, haḷadi.
- ā. hāku, hāḍu, hārayke, hāre, hāvu, hāsige, hāsu.

i and ī. hittu, hidisu, hittāle, hīre, hīju.

- u. huggi, huduga, hunnu, hulu.
- ū. hūje, hūdu, hūnu, hūvu,
- e. hedda, henike, hede, hemmike.
- ē. hēdi, hēsike, hēļu.

- o. hogu, homge, hottu, hondu, horisu, hosalu, holle.
 - ō. hōgu, hōlu, hōlisu, hōlu.

All these and a very large number of words with initial h- have lost the h- and the vowels alone survive in the colloquial pronunciation of the lower classes.

When these people want to speak grand, they make use of h- where they are not at all required, e.g., ode (-to break), > hode, whereas hode is restricted to mean 'to strike with something' (transitive).

-pp- of verbs and participles had already become -p- by 1004 A.D., as Nadihidar shows. Nadahidar is Nadapidar < Nadappidar, Vbl causative past. 3.</p> pl. m. of nadappu. cf. mudippidar in these inscriptions. But the causative suffix is found as -p- in kalupe in the 7th century. The shortening of -ppto -p- in 1004 is only a continuation of the practice. In 1282 appa, fut. p. of * āy (M.K. āgu) is found, but in 910, hohan is also found; this suggests that the -pp- of poppan, becomes hohan, indicating that -ppafter a long vowel is converted into -h- sooner than -pp- after short vowels. But from nadahidar (A.D. 1004) it is to be suspected that even -pp- after short vowels had > -h- through -p- in the 11th century. But -appa- too may have changed to aha long before it is found in the inscriptions. It is not possible to say even approximately when the -ppwas shortened to -p-. as, in the inscriptions of the 7th century, apār (apar) from āppār, appār is found. The tendency developed and this single -p- > -h- in the inscriptions in 910; particularly after long

^{1.} From pp. SMD. 232-233.

vowels. In 1300 baharu < bapparu < bapparu i is found. (See 'Declinable Participles' future, about -pp- as the tense-suffix for the future)². In the following examples from inscriptions -pp- > -h-through * -p-:—

.. viha EC. IV. Ch. 128. Further, O.K. antappa, intappa, entappa have > antaha, intaha, entaha, in M.K. in N.K. anthā, inthā, entha, and sometimes antha, intha and entha.

change can be explained thus:-

1593

1753

antaha > anthaa by Metathesis, later anthā, and often antha. Similarly for intaha and entaha in the pronunciation of the urban people.

But in rural areas, anthā, inthā, enthā > antā (anta), intā (inta), entā (enta), as the people are not used to the pronunciation of aspirates.

In some of the kavyas and inscriptions antaham < antappam > annam. Sidilannam Singadannam 'a man like the thunderbolt, one like a lion. (SMD. 160.) Cf. annam - ವರೆಗೆ SMD. p 293.

But this annam < antaham through anta-am, antam and by assimilation, annam. The meaning is antappam 'he who is like.' Similarly inthā, anthā, > inna, anna. In N.K., when anthā, inthā, enthā, are used as participial adjectives and when used as adj. substantives, the forms are:—

anthā-vanu, inthā-vanu, enthā-vanu, (avanu 'he' is suffixed to these).

It is wrong to say that all initial p. in Kanarese changed to h. Many words are still used both in literary composition and colloquial speech with an initial p. A few of them are:—lws. pakka (a side), pagadi (tribute, tax); paccadi (a kind of pickle); paṭṭi (a squared rafter); paṭṭu (hold, seizure); paṭṭe (the rind or bark of trees); paḍuvalu (the west); paḍḍe (maturity); paḷaka (practice, habit); pāḍu (experiencing difficulty); pāpa (a small child); pālu (a share); peḍasu (hardness), pōṭṭare (a hole in the trunk of a tree); pōkari (a profligate); pōṭi (joining); pōṇisu (to string together); pōlu (wasting).

In some cases, p and h forms are both found in use, but the use of p and h are differentiated by meaning and usage:—

A. From the same root:

- 1. pāļu s. n. 'ruined place' used in proverbs which retain archaic forms; hāļu vb. (to be spoiled, to ruin).
- 2. pettu s. n. 'a blow'; vb. 'to beat as with a hammer'; hettu vb. 'to thrust' (with the penis) to avoid the use of the expression which had acquired a vulgar meaning, pettu was confined to the meaning of 'a blow' and 'to beat.'

B. From different roots:—

- hāl 'milk' and pāl 'a share.'
- 2. hādu 'to sing 'and 'a song '; pādu 'difficulty experienced.'
- 3. hurudu 'rivalry'; purudu 'the pollution observed after the birth of a child.'
- 4. hōlu 'to resemble'; pōlu 'to waste, to squander.'

· In all these cases, because the h- form had acquired some conventional meaning, the p- forms were retained to signify the other meaning and to avoid confusion in the use of the two forms.

The group, p + consonant, initially or otherwise, does not change to h at all, e.g., prākāra, prās'astya, prīti, etc., as such combinations are foreign to Kanarese.

These inferences are borne out by forms in the published literary works and grammars of old Kanarese:

Grammars:—There are four grammars of the ancient Kanarese language. But in a book on rhetoric, A.D. 877 Kavirājamārga, the portion relating to grammar is comparatively small. In the part on rhetoric we find no h-initial or otherwise, in the pure Kanarese word.

- I. 1045 Karnāṭakakavyāvalōkana. As it is poetry, there is no h- at all.
- II. $1045 \ Karn \bar{a}takabh\bar{a}sabh\bar{a}saha$ by Nagavarmma includes h in the alphabet (K.B.B. 6). In Sutra 115 he says "pē hōvā" that p > h often initially and intervocalically, as the examples he gives prove palage > halage; kāpu > kāhu. This author of the 11th century actually corroborates our inference that h had begun to appear in literary

Kanarese (vide remarks on h- in the 11th century, Supra).

III. 1260 Sabdamanidarpana by Kes'iraja. He includes h in his account of the alphabet (S.M.D. s. 33). In S. 159, he states that single p of pure Kanarese words often changes to h and that such a change is beautiful (sundaram), but he definitely points out that long p. (-pp-) does not become -h-and says that it is duskara or forbidden. Examples given are upparam, kappuram, tappu, bippandam, muppu soppu, heppu. But in S. 160 -pp- of antappa, intappa, entappa are changed into a single -h-, i.e. antaha, intaha and entaha, clearly implying that the shortening of the long consonants was the general rule and that such shortened p > h, and unshortened p remained unchanged.

Further, in sutras 254, 258 he points out how Skt. lws. with p-change to h-in Kanarese pisuṇam- > hisuṇam, pāsa > hāsa.

The disappearance of h- initially is not unknown to him. In S. 271, he gives hingu ≥ imgu, hamsapinda ≥ ancevimdu; hamsa ≥ amce, himgulikam ≥ imgulikam.

All these confirm our inferences about the change of p to h and h to zero in the 13th century.

Use of unnecessary h- was known to Kesirāja (SMD 269): agni > haggi. It is -pp- > -p- and -h-; but all cases of - p- ≥ -h-are analogical.

IV. 1604 Karņāṭakasabdānuśāsana by Bhaṭṭā-kaļamka.

In Sutra 6, he includes h in the Kanarese alphabet; in Sutra 145 p > h often, e.g., paṭṭike > haṭṭige; pīvara > hīvara, gōpura > gōhura. (In the commentary on the same Sutra, -p- > -v- often, e.g., dīpika > dīvige; kapi > kavi) In Sutra 296, Tihu-

rāntakam, Gohuram are referred to as being correct, showing that there was doubt whether these forms were correct and so accepted by some and rejected by others. In S. 497, appam > aham; appudu > ahudu In S. 576, he states that hu (< pu) is to be affixed to bā (-to come) to form verbal nouns.

This grammar which is practically an amplification of SMD substantiates our inference that by the 17th century, p appears only in some verse portions and h is the rule in prose and verse.

These grammars are based on the works of "prāktanācāryas" (Sutra 3 S.M.D.) 'old venerable scholars of the past and Lakṣhaṇacaryas'. A study of the Karṇāṭakakavicarite (vols. I—III) by Rao Bahadur R. Narasimhachar and 'Kanarese Literature' by E. P. Rice substantiates our inferences on this point.

This change is probably due to the influence of Marāṭhi, the neighbour of Kan. and Tuļu according to K. V. Subbaiya¹. In Marāṭhi, the aspirated consts. > h. bhavati > hōtī. This change of p to h presupposes that the p- in O.K. though written as p, was aspirated as f, which led to the change of p to h. This change may have been independent of Maraṭhi(²).

N.K. has h for O.K.p. not in contact with a const. This development was apparently connected with the Kanarese change of v to b(w). In early Kanarese, v>b, the difference between b & p became distinctive in certain word forms. In order to make the difference clearer, many persons strengthened p. to ph. which later developed through f to h. (E. H. Tuttle in A. J. P. 1929 p. 154.)

^{1.} I. Ant. 1909, p. 145.

^{2.} A. J. P. 1929, p. 155.

p is a bilabial stop. Where the contact between the lips is slack and the same p. is articulated by the lower lip against the upper teeth, p > f, a bilabial fricative. When even this contact of the lower lip is slackened and f is articulated in the glottis, we get the glottal fricative h. (h.)

APPENDIX.

"r (\omega)."

¹The existence of r in Kanarese was noticed by Caldwell and later by Fleet and Kittel. ²But Kittel pointed out that r was displaced in Kan. by r. The gradual replacement of this r by r, is pointed out here from the evidence of inscriptions.

The following words contain r:---

6th and 7th centuries A. D. (N. K. equivalents are given in brackets)

aridu (33-, 45-1, 53-1) (aridu), aridam 58-341 (aridanu), idarul (54-4) (idaroļage), eriveppaduvorum (62-11), ere (29-4), (ere), eḍepare (40-1), ēri (36-4 13-4), kamara (8-3) (kammāra), kare (33-2) (kare), karu-um (7-10), Kittere (18-2), kere (65-13) (kere), koredu (40-2) (koredu), ghanammāriṭṭamān (34-1) Tarekada (31-2) (Talekaḍiṇa), teravol (37-1) (tereyamte), toradu (33-4, 46-3, 49-2) (toredu), toradē (34-2), (toradē), tōri (37-1) (tōri), nūreṇṭu (21-2) (nūreṇṭu), neradu (59-4) (neredu), neredōn (21-4) (neredanu), peran (61-6, 3-11) (horaginavanu), perjeḍiya (31-2), poragu (horagu), mūru (7-12, 19-2, 63-24) (mūru), Sindera (5-11, 6-11), (Sindera.)

There was difference in meaning in the words with -r- and those with -r-in O.K.:

- (1) aridu (33-3) 'having known' (1) aridu (20-2) 'impossible'
- (2) kare (33-3) N: 'a stain' (2) kare N: (a VB: 'to milk' bank' 'a shore' VB: 'to call' 'to invite'.

^{1.} C. D. G. p. 145 and p. 162.

^{2.} K. G. pp. 23, 24, 114, 116, 117, 177, 253.

There are a large number of words of this kind: -

- 1. are N. a stone, a rock
 Vb: to be disfigured
 or defaced
- 2. iri vb. to beat, to kill
- 3. uri a coarse network made of rope or rattan, in which pots and other vessels are suspended from the beams of the house.
- 4. ūru vb. to be, to exist, 4. to settle, to lean on
- 5. ere N. a lord, a master 5 vb. to pour out liquid
- 6. ore vb. to ooze, to trickle 6. down; N. a sheath.
- 7. ōre the red painting 7. upon the lower part of a wall used as a description
- 8. kere a tank.
- 9. tere to be uncovered
- 10. pare a drum
- 11. bare to grow dry. to disappear
- 12. mare to disappear, to forget to screen.

- 1. are N. the rear, the back, a half. Vb. to grind.
 - 2. iri vb. to give forth, to rain.
 - 3. uri to burn, to glow.

ūru - a village, a small town ere - a dark-red colour; a worm in general.

ore - vb. to speak, to touch, N. similarity.

- ōre declivity,
 crookedness;
 bending.
- 8. kere to scratch.
- 9. tere a wave.
- 10. pare a scale ora coat of theonion. a fibre.11. bare to write.
- 11. bare to write.
 - 12. mare a kind of deer

The context decides the meaning of the word in N. K. From a study of the words with r in the inscriptions of the 6th and 7th centuries and the corresponding N. K. equivalents, it is seen that the r has disappeared in N. K. (See appendix to this section for examples from later inscriptions).

History of O. K. r

A study of the form with r from the 8th century onwards shows that r is maintained throughout the 8th, the 9th, the 10th and the 11th centuries. the 12th century, we find r used for r in an inscription dated 1179. About the end of the 13th century, we find r replacing r in a few instances, e.g., neradu (1296). and neradirdda (1296). The same tendency to replace r by r is found in certain areas in the 14th century, particularly in Shikaripur Taluk. This becomes more noticeable in the 15th century in the same taluk as well as in Seringapatam and Maddur taluks, (see 1415, 1420, 1431, 1458, 1474, 1477 infra). Towards the end of the 16th century, the same tendency is found in the region round about Seringapatam. The replacement of r by r is more noticeable in the 17th century. In this century, both kinds of r are found in the same inscription where O. K. had r. Towards the close of the century, r is found less and less. In the 18th century, in spite of the occasional discovery of rforms, r had replaced r and from 1800 onwards r does not appear in these inscriptions.

From this, it cannot be concluded that r actually lived in the colloquial speech of the people till the end of the 18th century. The occasional appearance of r in place of r in 1296, is sufficient proof that the people had already adopted r in place of r, whatever the pronunciation of the latter may have been, and

that the writing of only r was in vogue in poetry and literary compositions till the 16th century. The appearance of r and r in prose occasionally for O. K. r shows that r was not so common as r.

Anyway, r finally disappears towards the close of the 18th century.

The earliest published Kanarese work is Kavirājamārga by Nṛpatunga (about 877 A. D.) Though a work on Rhetoric, it deals with grammar occasionally. The use of r there is in no way different from that in the inscriptions of the 9th century: adara (I. 13), perara (I. 14), bēre (I. 46), omdaroļ (I. 81). eraltērakke (I. 114), mūraroļa (I. 120), mīradā (II. 142), arivina (III. 81), kiridu (III. 175).

As already stated under p-, there are four O. K. grammars:

I. 1045. Kāvyāvalōkana by Nāgavarmma:

The author includes r in the alphabet (Sutra 6) and states that r becomes r before a consonant. The examples he quotes from ancient Kanarese works corroborate our inference about r in the inscriptions of the 11th century.

II. 1045. Karņāṭaka Bhāṣā Bhūaṣṇa by Nāgavarmma:

He included r in the Kan. alphabet (Suţra 10). -ar is shown by him to be the suffix for neuter stems ending in -u. adu + ar + a > adara (gen. sg. of adu) (Sutra 55). In Sutras 185 and 187, he states that $-k\bar{a}ra$ and $g\bar{a}ra$ are used as suffixes in taddhitas or secondary derivatives, to mean 'the maker of.' Once again he refers to r and states that roots ending in -ru have their past tense in -tta- (Sutra 229).

If we take his examples into consideration, the position of r is the same as the one in the inscriptions of the 12th century; examples are mare, more (S. 10), adarol (S. 10. Com.) teru, poru and peru (S. 229).

III. 1260. Karņāṭaka Šabdamaṇidarpaṇa by Kēśirāja.

The author includes r in the Kan. alphabet (S. 18). The position of r in this work is in no way different from that in the inscriptions of the 13th century. His examples under the following sutras bear out the statement made above: 173, 181, 184, 188, 209, 210, 238, 240,

IV. 1604. Karņāṭakasābdānus āsana, by Bhaṭṭā-kaļamka.

He includes r in the Kan. alphabet (Sutra 1). The author of this grammar simply paraphrases in the following sutras, 352, 353, 354, 355, 369, 379, 483, 484, what Kēs'irāja has said in his S'abdamaṇidarpaṇa. He is more a commentator on Kesiraja's grammar. Here we do not get any corroboration of the actual position of r, as he is discussing the forms in the ancient kāvyas and does not take into account the contemporary speech.

There is no grammar which deals with the language of the 17th century onwards till about the close of the 19th century.

The inferences are corroborated till the 14th century by grammarians. But the last grammarian has not considered the language of his times. But the MSS. of literary works are liable to change at the hands of scribes, commentators and editors of later years. The examples from Karṇāṭakakavicarite

Vols. II and III have been taken to show that the evidence of inscriptions are more reliable. The figures within brackets refer to the pages of the volume.

The mi	a loss motiosoble in press works then in

The r is less noticeable in prose works than in very high-class poetry, where archaic forms were specially selected and used. All the examples given below are from kavyas:—

1680. mīrida, muridu (508), 1700. r very infrequent. bāydereya, buddhidorasittu (525), beragāgi (526), nūraivattondu (526).

We rarely see r in Sarvajñavacana, e.g., about 1700 A.D; very infrequently e.g. arivu, maravu, bērilla (p. 560), etc., are found.

1712 teradali KKC. Vol. III. (2), 1715 eragida (5), 1731 tereda (14), hāriduvu, tāriduvu, 1732.... tō*r*ittu (18),jāriduvu, ūri, nīreyara (19), tirrane, birrane, sarrane, (19), pārumbaleya (21),.... ēri, maremādi (50), 1740 orate, kareva, ariye (55), 1745 ... kārisidal, garigāliyali (79), nērila, 1750 porumațiu (85), kere, tore, are (88) ... ērutum (131), 17701775 marevaro, torevaro (138), mareyalu, eri, eragadiha (143), 1780 aruhimda, arivumarave (161). 1800

r is found in poetry very rarely after 1740, but none in prose.

After 1800, r is rarer still. 1830 ivarolagilla KKC. III. (p. 187), 1840. bedare (191), ariyadiral, muridu: No r either in prose or poetry after 1850 in KKC. But the inscriptions are not capable of being changed by these editors or scribes. Hence the evidence of the inscriptions of the later centuries are to be relied on as authoritative till it is disproved by stronger and more authentic sources of information.

This r is found in Tamil, Malayālam, Telugu and Kanarese. In the words with -r-, found in the inscriptions of the 6th and 7th centuries, r is found

intervocalically and not initially. In his Dictionary, Kittel gives a few words (about 25) with initial r which are really corruptions or mistaken spellings of words with r-. In the following inscriptions r is found initially:—

1124 rodisi EC. V. Cn. 149;

1224 Rațțapalli. EC. XI. DN

1300 Rattā, Rattigā.

1300

In kāvyas also. r is found initially, e.g. KKC. I. p. 402.

Rattavedamgam KKC. I, p. 401. This r is not found initially either in Tamil or Malayalam. But Sītarāmācārlu in his "Sabdaratnākaramu" (1929) gives on pp. 673-675 a number of Telugu words with initial r. C. P. Brown does not mention any Telugu words with initial r in his Telugu-English Dictionary in the first or second edition. modern Telugu, as in N. K., initial or intervocalic r is not used. Tulu has not got this r at all now. N. T., the distinction between rand r is disappearing in all parts of the Madras Presidency except in the extreme South: -

kirudu and kirudu (vanity); korudal and korudal (praying); tarai and tarai (ground); taruvāy and taruvāy (proper time).

In the following T. -r- > T. -t- and T. rr > T. -t-, kari and kati (to bite); tari and tati (a Stick); korram and kottam (triumph); korrudal and kottudal (digging).

But -rr- is found in a large number of Telugu words, but these are pronounced, not as -ttr- or -ttr-, but as -rr-. A few of them are mentioned here:

Tel. arra (a division of a chamber); K. are; irra (the male of the antelope); karru (a ploughshare); kirrupurugu (a cicada, a noisy insect): kurra (small, young); kurri (a milking cow); garre (an instrument for catching fish); gorre (a sheep); cirra (a peg); cirru (anger); K. siṭṭu (anger); turru (in haste); Skt. tvarita; torra (a hole in the trunk of a tree); narra (a troublesome milch cow); parra (a bog); purru (soft mire); purre (the skull); K. buruḍe (the skull); barre (a female buffalo); burri (a heifer); borra (a pot-belly); K. bojju; mirru (a rising ground); T. mēḍu; K. mēḍu; M. mēḍu; morra (a scream); K. more; varru (a heap); sorra (a shark).

The few corresponding words indicate that at one time Te -rr- was pronounced as -ṭṭ- or -tt-.

The Telugu scholars or peasants do not pronounce these words as Tamil -rr-, but only as -rr- (a long r). Further in N. Te. the long -rr- is shortened and -r- is used in place of r. In Kan, -rr- is found in some inscriptions, but the pronunciation is -rr-. In N. K. it is written and pronounced as -rr-. Surrembinam, (E.C. V. Bl. 77). Kittel's equating tirrane to tittane in his dictionary is wrong as can be seen from his own edition of S M D. p. 393 (SMD. S. 307). These are onomatopoeic words.

In Tamil, r is used in place of -n-, -t-, -l- before -k, -c, and -p.

I. -N-. (1) where -nr > -rr

NWs. anru - arru (then); inru - irru (now); enru - erru (when), onru - orru (one).

(2) where -n > -r

tankaval - tarkaval (self-protection); tankolai - tarkolai (suicide); tancuṭṭu tarcuṭṭu (self-reference); tancelvam tarcelvam (one's own property); tanpāḍi tarpāḍi (a lark)

II. -t- > -r-.

Lws.

utkaṭam - urkaṭam (an elephant in rut); utkrṣṭam - urkrṭṭam (excellence); udgāra - urkāram (vomiting); utsarga -urcarkam (abandonment); utpatti - urpatti (birth); kutsita - kurcitam (abhorrence); tatkālam - tarkālam (the fixed time); tadbhavam - tarpavam (born of that); balātkāram - palārkāram (force - compulsion); bhāskaran - pārkaran (the sun); vatsanābhi - varcanapi (a kind of poison).

III. -l-. > -r-.

alpam - arpam (trifling); ulka - urkai (a meteor); kalka - karkam (drugs pounded for the preparation of decoctions, oils, etc.); kalki - karki (a horse); svalpam - sorpam (a little); nalgati - narkati (bliss); nalkanavu - narkanavu (a good dream); nalpendu - narpendu (a good woman); nalcīr - narcīr (a good state).

This change of -l to -r- is also found in the O.K. of the inscriptions studied. Nirisidom "Set-up" or "caused to stand" is from nil - to stand. T.M. Nil - to stand. Te Nilu - to stand. This root 'nil', when converted into a causative - l > -r- in O.K. as it

does in O.T. niruttu - to cause to stand. Cf P. 41 nirugal; P. 42. nirisida. What is the nature of this l nilisidom.

In Kanarese, roots teru, peru and poru form their past tense with -tt-, i.e. tettam, pettam, pottam (SMD. 240). But this long -t in the past clearly shows the following:—

ter, per, por, are the roots. When -da- the past tense suffix, is added ter-da = tetta; per - da = petta; por - da = potta. Unless-da- is derived from <*-nta-(K.-r-) or-ta-(K.-r-), this change is impossible. Ter-* nta = ter n) ta; the pre-consonantal nasal disappears; terra = tetta. Similarly for petta and potta. This shows that in O.K. also rr >-tt-.

In O.K. Kiridu > Kuru before consonants, e.g., kurudadi. But before vowels kiru > kit, e.g. kiru - adi > kittadi; kiru - esal > kittesal. (SMD. 181). This shows that in O.K. -rr- used to become -tt-.

In Kanarese, peragu is replaced by peda in compounds (SMD. 173, KSS. 369) e.g. pedamgay, pedagay pedadale. Kanarese grammarians state that r gives rise to r when pronounced with greater pressure and force. (KVV. 6; KBB. 10; SMD. 18 and 19, KSS. 1). According to these, r is a cerebral. Cf P. 43. 1021, nādaoreya.

I suspect pera < peda < *peta. This gives us pedagay. In Tel. also we find peda in the same sense. e.g. pedabuddhi (Uttararāmāyana. 7. ch). This peda gives us a hint as to the probable reason of the grammarians to call r a cerebral. When single -r = -t-, (-t-) Kan., & Tel. voiced the intervocal single surds and used the sonant symbols for the voiced stops. But when -rr- became -tt- or -tt-, the sound

value was retained. Why it is -tt- or -tt- sometimes is at present unknown.

Further, surds coming after -r- of roots in Kanarese do not become sonants, but those sounds that come after r > sonants. (sutra KBB. 29, SMD. 65, 66; KSS. 89 and 90). This clearly shows that it is a stop and a surd. Further, this r when followed by a surd becomes r and, later, is assimilated to the surd. In idarke, -ar- is the suffix; in place of -ad- -ar- is used here, perhaps for dissimilation; idu -ar- ke > idarke. This idarke > idakke in N. K. cp. T. idarku.

Also, in the inscriptions r is used for representing the upadhmānīya breathing before -p-:—

- 1. nirpiņdam (Ec. II. 63. 1163 AD)
- payahpura is written payarpura (EI. XIII. p. 36)
- 3. bhavinaḥ parthivēndrān is bhavinarpār -(52) E. I. XV. p. 26 1110 A.D.)
- 4. vigatabhayayas'arpatāka (67) EC. IV. Yd. 60, 890, A.D.

This mistake is due to the similarity in the shape of the symbol for upadhmānīya breathing and -r. O.K. r is used wrongly for Skt. r. e.g. arula (5-15), kamara (8-31); $r\bar{u}dhi$, $ar\bar{u}dha$ - $k\bar{a}ra$ and $g\bar{a}ra$ in the inscriptions and grammars; probably the pronunciation was like that. r is used in later inscriptions in place of -s:

purpa (6) E. I. XII. p. 271, 1189. E. I. XV. p. 33, 1189. purpāyudham (22) E.C. VII Sk. 185, 1158, A.D.

In Tamil, -ș- is represented by -ț-.

Skt. puspa = T. putpam - a flower. Skt. visēṣakam - T. visēṭakam = anything special.

This suggests that Kan. r may correspond to T. -t- though this use of r may be due to a confusion with the upadhmānīya.

All these show that r in Kanarese is a cerebral according to the grammarians. Since it is now lost in N.K., it is not possible to find out what its phonetic value may have been. That it represents a stop, perhaps an alveolar, which can become a dental or a cerebral and not the continuant r, is definite.

0. K. r

II. But pr. Drn. *-nd- (after long vowels) > Kand- and T. and M. nr. e. g. K. īda - T. īnra.					
III. But Pr. Dr. *, -nt- (after short vowels) has Knd- and Tnr- after a short vowel in the following:—					
	т.		-	K.	
	onru (one) anru (then)	,		ndu ndu	·

T.	<i>K</i> .
inru (now)	indu
enru (when)	\mathbf{endu}
konru (having killed)	kondu
sen ru (having gone)	\mathbf{sandu}
ninru (having stood)	nindu (nintu)
kunru (to diminish)	kundu
kanru (a calf)	kandu (karu) also
venru (scorched)	\mathbf{vendu}

Sometimes in colloquial speech of villagers T. nr > -nn-. inru > innu; enru > ennu; onru > onnu. kanru > kannu; as in Mal. onru > onnu; panri > panni; venru > vennu.

K. T. M. Tu. Te.pr. Drn. * -nt-(after long vowels) -n*r*--r--c--j-(and later -d--rassimilation) -nūru "to fix, ũnru ūru ũnnu ũnu to support" tōj tō*r*u tōn*r*u tōnnu tocu "to appear" mūru "three" mūnru mūdu : mūnnu In Tu, Kan r is found as -j- before short vowels also: K. āru "to be dried" Tu. aj K. bari "empty" Tu. baji K. kāru "a calf" Tu. kamji (Cp. T. Kanru) Kan. r corresponds to Tu. -r:--K. Tu. oragu "to lean, to lie down" orag ··· kāru "to vomit" kāru -

<i>K</i> .	Tu.
kīru "to scratch"	kīru
kuri "a sheep"	kuri
kesaru "mud"	kesar
jāru "to slip"	jār
bēsar "disgust"	bēsar
mīru "to transgress"	mīr
săru "to proclaim"	sār (Cp. T. carru)
sere "confinement"	sere

In two words Kan. -r- corresponds to Tu. -t- :— K. adara "of that" Tu. ayta

K. bēre "different"

Tu. bēte

after short vowels

Kan. -r- corresponds to Tu. -d-:

after long vowels

aj ter enert concer		agion tong course	,,,
K.	Tu.	K.	Tu.
ore "a sheath"	ude	nāru "to stink"	nādu
kiru "small"	kidu	nū <i>r</i> u "100"	nūdu
kere "a tank"	kedu	māru "to change"	mādu
pore "burden"	pude		
mare "a screen"	\mathbf{made}		
muri "to break"	mudi		

Some of the forms in T. with $-nr - \rightarrow -rr$ in Tamil. Both these have correspondences in Kan:

00 0 0			-
		Kan.	
	"wher	$\mathbf{u}'' = \mathbf{endu}$	
anru inru			
		"now "when anru arru inru irru	"then" = andu "now" = indu "when" = endu anru

But the meaning in Kanarese is one of place whereas it is one of time in Tamil:

K. atta = there; itta = here; etta = where

This leads us to a consideration of the -rr-. Pr. Dr. * -tt- is retained as rr in T. and M. In T. though written as -rr-, it is pronounced as -tt- in some areas and -tt- in other areas. Many people pronounce it as -tt-. Thus in Tamil dictionaries, there are forms with -rr- and also with -tt- having the same meaning and used in the same sense:

٧ (ವ).

The following words contain v-. (Their N. K. equivalents are given in brackets):—valikke (balika); Valliggāme (Balagāve); vandu (bandu); vāl-vu (bāļu); viṭṭār (biṭṭaru); viṭṭu (biṭṭu); vittidalli (bittidakaḍe); veṭṭeḍe- (beṭṭeḍe-); Beḍevalli (Beḍahalli); velege (beleyali); veleyāde (beleyade); Velgola (Belgola); Velmāḍadā (Belmāḍada); Vēgūrā (Bēgūra):

Some of these words have b- in these inscriptions:- NWs. bandu, biṭṭa, biṭṭavol, biṭṭe;

LWs. besagey, bēgam

The corresponding words in T., M. and Te. have v- and in Tu. have b-.

K.	\mathbf{T} .	\mathbf{M} .	${f Te.}$	Tu.
vā l v-u	${f v}$ ā $l{f v}$ u	\mathbf{v} ā l vu		bāļu
viţţār	viţţār	viţţu	vidicināru	biţţa
vittu	vittu	vittu	vittu	bittu
vettadul				••••
vele	viļai	viļa	••••	beļe
vel	vilangu	veļ vila ñ nu	\mathbf{vele}	biļi

All words with initial v- in Kan. have corresponding words in v-, in the other Dravidian languages.

Even in the case of Lws., Kan. b-corresponds to T., M., Te. v- and Tu. b-.

K. T. M. Te. Tu. bēgam vēgam vēgam bēga That this b- is a later development from v- will be clear from the following:—

9th Century.

810 basadi, EC. II. 415.

810 viţţa (10), EC. III. Ml. 68; Ml. 5 Bāraṇāsiyum,

.... Vāraņāsiyu. EC. III. NJ. 68. 870 884 bidiyāyatam (G) EC. II. 394. 888 Sāsirvbarppārvbarumam (12); Sāsirvbar. Bāranasiyumam (12),Sarvbanandi (7). EC. I. 2. 895 ... Sambatsaramgal (2) EC. III. Md. 13. 10th Century: bandisidar (for vandisidar) EC. II. 900 55: EC. II. 4. 930.... vannisutte (58), vayasi (28) bayasi. N. K.) EI. II. 45. bandisida, bandu. 1000 EC. 11, 49. vārāļasiyalu. E. I. XVI, p. 277. 1038 bandisida. EC. II. 52. bandisidam. 1050 EC. II. 465 (for vandisidam). v > b after r, before v and r. garbba 1071 (3,16), agurbbim (3), dibya (10), deby (11), sarbbabhaumam (15), pūrbba (16, 22, 40), ōrbbarā (19), Samsēbyam (29), bhābya (40), byōma (51), sarbbo- (56), byacāranada (63)

byākhyāna (66, 67), E. I. XV'

p. 337.

1080

.... basadige. EC. II. 485.

1097 ... v > b in braja (13), dibyam (23, 32) byatīpātamum (25), drabya (37). EI. XVII, p. 182.

12th Century:

1100 bandisida (for vandisida) EC. II. 48.

1104 āļvalam (4), tōļvalam, bāļvalam. EC. VII. Sk. 131.

1113 v > b initially in Skt. words and also in Samsebyam (4) and nabya (15). EI. XV. p. 105. nirvvādhe. E. I. VI, p. 36.

1172 byāpaka (34), byāpanam (34), patibrate (36), brāta (36) byāpāra (40) brāta (45), braja (48), byavahāri (61), dibya (79 and 87), bratimdram (80). E. l. XV. Madagihāl.

13th Century:

1200 b for v. in braja (9) sēbyam (15) v for b. dōrvvala (5). EI. V, p. 28.

1255. bīragallu. EC. I. 6.

1285. vīragallu. EC. I. 7.

The writing of Sāsirvbar (888) is noteworthy, as it suggests the mode of writing and the hesitation of the writer.

Both v- and b- are in use during these centuries, and in the earlier centuries the forms with v- are more in number. About 1192, the sign for v denotes both v and b in the inscriptions (EI. Vol. VI, p. 98).

In the later inscriptions b- is more common than v-. In KRM. (877 A. D.) we find b-: balikkam (I. 93), bālvude (II. 36), bāradānam (II. 56) bamdoņe (II. 41), beļadu (III. 166), bērevērappudarim (I. 46).

In the later Kanarese grammars, all the forms are in b-, but in word groups and compounds, b- is replaced by v-.

143.	kadu-vāļ	188. mū-veļa	ısu	
_	11			

In all these examples, the second word begins with b- when independently used in M. K. and N. K., v- being preserved in such groups.

It is noted that b- of Kanarese is not from p- as g- and d- are from k- and t- respectively.

-17-

Intervocalic -v- may be from (1) -v-; (2) -p-; and (3) -m-.

1. -v- before y and r and after r becomes b sometimes as shown from the evidence of the later inscriptions. But in pure Kanarese words it remained v in O. K. with very few exceptions and later -v->-b- and r before -v- is assimilated to -b- in N. K.: anduvalikke (N. K. ābalika), orvvan and ōrvvan (N. K. obbanu), ēlnūrvvar (replaced by ēlnūrujana).

2. -v- < -p-.

The forms are:—Nws. edevidiyal, Edevolal, pogevēgi, biṭṭavōl, mamjuvōl, mūvetmūrā, salvavōl. lws: kavileyum, mahātavadi, mahātavan.

(About aramantama for aramntava, see -v- from -m- infra.)

This change of -p- to -v- is found in the later inscriptions.—

9th Century:

830 Kīrttivura (3), Temkaņavalļiya (4 · EC. VII. SK. 283.

1104 ... pempuvetta. EC. VII. Sk. 131.

1113 Kāravurada. EC. III. NJ 44.

1148 nandādīvige EC. III. NJ. 110.

Here -p- in the body of words and in word groups > -v-,

This change of -p- to -v- is common even in N.K.

In. T. -p- > -v-:

The examples are all lws:— apattam and avattam 'a falsehood', āpaṇīyam and āvaṇīyam 'a market street', upamai and uvamai 'a simile', upāttiyāyan and uvāttiyāyan 'a priest, a teacher', kapi and kavi 'a monkey', kapantam and kavantam 'a headless body', kāppiyam and kāviyam 'an epic poem', tāpasi and tāvasi 'a brahmacāri entering upon the stage of a recluse,' vāpi and vāvi 'a walled tank', vipattu and vivattu 'a calamity'. In Tel. -p- > -v- in word groups:—pampuvādu, pāyavādu, pāyavāru, bayalavōvu.

Later Kanarese grammarians have noted this change as a regular one in Nws. and Lws. alike and all of them have given examples.

SMD Sutras, 67, 99, 178, 179, 181, 182, 186, 189, 258 and 292 and KSS. 60, 68, 241, 327, 328, 329, 330, 333, 334, 338, 339, 340-2, 351-354, give a large number of examples for this change of -p- to -v-.

But sometimes -v- < -p- 1 after nasals continue to be -v- in these inscriptions: *e.g.* unvorum, enva; in N. K. umborū and emba.

KRM. (877 A.D.) has the following bhōgiviṣambol (I. 70), embudakkum (I. 84), embudu (I. 63), embudidu (II. 7), embudemdum (III. 37).

In T. the intervocalic -p- is pronounced as -b-; after nasals, the -p- is pronounced as -b-. e.g. anpu, inpu, kampu, nōmpu.

But in Tel. -p- after nasals, is -p- in many cases. e.g. impu, tampu, mampu. In some -mp- > -mb-, tombadi (tom+padi), tommidi. In New Kanarese also -mp- and -mb- are both found. But this -m +

^{1.} See-pps under "Verbs".

pōl > -mbōl in O. K. and M. K. always. Suracāpam+pole > suracāpambole (37-1).

But in later grammars, v- suffixes after nasals > -mb-.

SMD. KSS.

99-100. palavar, but palambar. 170. palambar, kelavar but kelambar palavar, palabar.

214. Indrambol 171. ambar.

232. embam, timbam. 383. candrambol,

aṇṇaṁbol.

517. enbam, tinbam.

518. māņbam,

kānbam.

But in N. K. literary compositions this en-to say, has been replaced by ennu-due to the addition of -u to the root.

cf. K- after nasals is not voiced in some of these inscriptions: kālaṁ keydār, taṅkade, pṛthivīrajyaṁ-keye, prasādaṁ keydar, but some are voiced; enaṅgoṭṭu, prithivīrājyaṁgeye, cp vinnapaṁ keye. (6) EC. III. TN. 1. (726 A.D.)

3. -v- from -m-.

The following words have -m-:

- (1) ara maṇṭama, a/imen, gāmiga, gāmuṇḍa, dēhama, Namilūr, Nimilūr, mukhamāge, Vaḷḷiggāmeyarum.
- (2) In the following -m- > -v-:— Navilūr, mukhavāge, rājyava, valavadu.
- -m- > -v- in the preterminational element in rājyava; and also when one word ending in -m is followed by another with an initial vowel, in mukhamāge, mukhavāge, valavadu.

The change -m- to -v- in (2) and the retention of -m- in (1) suggest that -m- was probably used with

the phonetic value of -v-, though conservative writing still used -m- as the Skt. word is mandapa. It is also possible that the presence of another nasal in some words may have been the cause of the retention of -m- in some of these.

The following examples are from the later inscriptions:

890 gāvuņdana (5) EC. I. 3;

941-945 final -m occasionally changes to -v before vowels. e.g., pāḍvāv(o) nēṣa-ṇav (19) EI. XIV. 364.

980 Cāvuṇḍayya EC. II. 39.

983 Cāmuṇḍarājam EC. II. 175.

983 — Cāvuṇḍarāja EC. II. 179.

1057 Hēmalambi prasiddham (12) EC. IV. Hg. 18.

1097 final -m occasionally > -v- before vowels. EI. XVII. p. 182.

1098 puṇyamantar apparu. EC. VII. Sk. 106.

1129 Balligāve EC. VII. Sk. 100.

1182 -m > occasionally -v. EI. XIV. (Kurugod).

1189 paṇav-(28) EI. XV. 77.

1115 Cāvarājam (167) EC. II. 127;

1177 Hēmaļambi samvatsarada (3) EC.
III. Md. 44:

1120 Dēmavatyamganā (34), Dēmiyakka (27 and 64). EC. II. 129;

1417 Hēmaļambi EC. III. Md. 10³.

1474 vṛttimamtarolage (194) EC. III. Ml. 121.

1538 Hēmaļainbi EC. III. Md. 112.

In KRM. (877 A. D.) -m->-v- in some words and remains unchanged in others:— kiruvakkal (I. 39), vidūragatamāge (I. 83), vis'ēṣamillade (I. 84), prayōgamīteran (I. 90), lakṣyamīteranendum (III. 92).

Later grammars substantiate the view that -m- > -v-.

- I. KVV. and II. KBB. (1050) stated that the sounds of the labial class > v not only after vowels, but also after y, r and l: e.g., mara + mane > maravane; tāy + mane > tāyvvane; pul + mane > pulvane; nīr + mānisam > nīrvānisam.
- III. SMD. (1260) supports our inference. -m-> -v- in all lws. from skt.² and also in pure Kanarese word ³ e.g., bemar > bevar, temar > tevar, emage > evage, tamage > tavage.
- IV. KSS. lws. grāma > gāva, tāmara > tāvare (1604).

As already stated this grammar paraphrases and amplifies what No. III gives. According to KSS.⁴ -m-> -v-.

In N. K., words with initial ū or ō take a prothetic v- in rural pronunciation: e.g., vūru for ūru; vodu for ōdu; vuṇṭāgu for uṇṭāgu.

The same tendency is found in these inscriptions: vandinisu (29-2) for ondinisu 'a little.'

-v- is replaced by -u- in unnurum in these inscriptions. The same tendency is found in later inscriptions: Gā-u-mḍa; Ga-u-ḍa; EC. III. My. 17; bahe-u EC. II. 344 (1368); sarvasvāmyaū salūdu (15) EC. IV. Ch. 135 (1612); appa-u (3) kuḍu-u-demdu (10), EC. IV. Y1. 1. (1654).

^{2.} SMD, 292.

^{3.} SMD. 67 and 104.

^{4.} KSS. 144.

L. ω

The following words have-l-:-

(The N.K. and M.K. equivalents are given in brackets). adaldē (21-3) (M.K. adari, in N.K. replaced by hatti), ilāļ, (44-4) (N.K. ilidu). īrelpattu (5-15); 6-15); (M.K. īrerpattu. N.K. replaced by nūranalvattu, 140); ūligam (8-38) l for l (N.K. ūliga); eltuin (3-3) (M.K. ertu, N.K. ettu); Edevolalnādu (8-28); ēlaneva (1-4) (M.K. and N.K. ēlaneva); ēlnūr (59-1); (M.K. and N.K. ēlnūru); oltu (43-3) (M.K. ollittu, ollitu, N.K. olleyadu); Kalvappu (57-4) (M.K. Kālbappu) (N.K. Kabbappu); Kilgāna (62-6) N.K. Kigga-); Kilga (3-2) (N.K. Kiggēs' vara); kīltu (14-1) (M.K. kittu, N.K. kittu); galde (63-20) (M.K. garde, N.K. gadde); gēli (27-4) (M.K. kēri, N.K. kēri); tīlthadol (17-1); (Lw. N.K. tīrthadalli). -l for -r-. Pali (56-14); (NK. hali); palcidor (62-8); N.K. (paccu. Vb.); pulu (1-4) (N.K. hulu); pelcuge (3-8); (M.K. percu, N.K. heccu); pēlda (25-1; 34-2; 38-1); M.K. pēlda, N.K. hēlida); pōldu (14-1) (N.K. replaced by holumādi); vālvu (40-2) (N.K. balu);

This -l- does not appear initially in Kanarese. It appears intervocalically, finally and before consonants. This l has been replaced by -l- between vowels and assimilated to the following consonant in consonant groups in N.K.

History of l in Kanarese.

l remained unchanged during the 8th and the 9th centuries. But in the 10th century—about 930 A.D.—l becomes r before consonants: e.g., negartte

from negalte; bërpparan from bëlparan; nërpode from $n\bar{o}l$ pode. All the words with l before consonants did not change l to r. Both l and r forms are found in the same inscriptions (See A.D. 930, 940, 945, 949 and 978 in the appendix). About the year 930, words with lin place of l appear side by side with forms with l and consonant, and r + consonant forms < l + consonant forms. This indicates that l > r and l > labout the same time. See 930 A.D. It is often 1 stated that l > r before a consonant if the vowel preceding l was long by nature or position; and that l before a consonant preceded by a short vowel not lengthened by position remained l and the double consonant was considered a "fleeting double consonant" or "s' ithiladvitva" (SMD 36). But l before a consonant naturally makes the vowel long by position as l + consonant becomes a double consonant, e.g., negartte < negalte, garde < galde (SMD 37). negarddam from negaldam (SMD 36). This convention of a fleeting double consonant (l + consonant in thiscase) shows that, already, a vowel was being pronounced, though not fully, in between l and the consonant, though the vowel was not written² or they were being assimilated. This points to two kinds of pronunciation—one with a vowel and the other without a vowel — of these consonantal groups (l + const.) (SMD. 60.) Also the assimilated consonant group or long consonant was shortened in pronunciation. This theory of s'ithiladvitva is illustrated in SMD. sutras 36,-45, 59 and 60. The appearance of l in place of l is predominant when l is between vowels, such as in alipi.

^{1.} E. I. XIII. p. 327.

^{2.} Cf. Kilagana (1036).

The use of l for r in such words as tilaka. tīlthadoļ, is also found, though not often (See 950).

In the 11th century, the same changes (i.e. l to r and l) are on the increase. The use of l in place of r in 1007, and others is due to the confusion of l, r and l-l had ceased to have its original definite value. The use of l for Skt. l in tilakam (1010) and kamala (1085) is due to the confusion between l and l which had taken the place of l. In this century, l is taking the place of l more and more, though not uniformly in all the areas. (See 1028, 1037, 1042, 1045, 1047 1049, 1055, 1057, 1058, 1060, 1063, 1064, 1067, 1071, 1075, 1077, 1081, 1082, 1085, 1087, 1098 and 1100).

There is one interesting form irlda (1067) showing the transitional stage in the change from l to r, when both r and l are written.

In the 12th century, ! and r become more frequent than l and ! is more predominant than r. This does not mean that l disappeared completely. In some inscriptions all the three changes are seen; e.g., 1172. In 1179, we have the next stage: the r+ consonant > long consonant, the r being assimilated to the consonant following. Thus:—

- 1. l + const. > r + const. > a long const.
- 2. vowel + l + vowel > vowel + l + vowel.

In the next century (13th century) ! establishes itself firmly and very few forms with l are found. From the 14th century onwards, ! replaces l between vowels and the assimilation of l to the consonant following is established.

. So far as the inscriptions are concerned, l is still found much less frequently in verse and very rarely in prose, though l had completely replaced l in the description of boundaries.

Let us see what the grammars tell us:

Kavirājamārga (877 A.D.) has l, as in the inscriptions of the 9th century.

- I. 1045. Karnāṭaka kāvyāvalōkana by Nāgavarmma.—The forms with l are quite in keeping with ancient traditions regarding the use of l. Sutras 6 and 65.
- II. 1945. Karnāṭaka Bhāṣā Bhūṣāṇā by Nagavarmma.—He also includes l in the Kanarese alphabet (Sutras 10 and 11). He states that consonants in front of -ḍ often change to l (KBB. 119, 121): nolpam < nōḍu + pam; bēlpam < bēḍu + pam.

The examples, where l is used, keep up the old tradition about the use of l.

III. 1260. Karņāṭaka Šabdamaṇidarpaṇa by $K\bar{e}$ śirāja.—The author, Kes' irāja, states that l is d pronounced with greater pressure:—

atipīdanadim rēphā

S'ritamāda rakāramum samantu dakārā

S'ritamāda ralanum amgi

kṛta padalatvakke Sanēma sallada kulanum (18) ivu varṇāvṛttige sa-

lvuvu; Samdum prāsadedege sallavu; yamaka vyavahrtig āgavu; dēs'ī-

yavenipuv $\hat{\mathbf{a}}$ hrasvam enisida e o sahitam (19) (18): \mathbf{r} is produced by pronouncing \mathbf{r} with greater pressure; l is produced by pronouncing $\hat{\mathbf{d}}$ with greater pressure; pronouncing with greater pressure; pronouncing with greater pressure is explained in the vertile as "atipindeled uccarisuva ekasthani."

(19) r and l r, d and l and 1 and l may be used for repetition of cognate letters (as "surar iridoragida");

^{1.} KSS. Commentary, p. 165.

they cannot be used for alliteration (prāsa) — (it is wrong to use r and r in prasa, as in 'dhuradoļ and teradimda"); r and r cannot be used in yamaka (as in kareyam and kareyam pottappudu) — (19) (Similarly for d and l and l and l.)

The author then discusses where t and $\frac{1}{2}$ are to be used and gives a list of words where words ought to have l (SMD 23). This clearly shows that there was much confusion in his age about the use of l and l. He was bound by the traditional spelling and so he wanted to give a list of words where I and I ought to be used. This is in full agreement with our inference regarding the use of l in the 12th and the first half of the 15th century. He also discusses the usé of r in consonant groups such as garde, etc. (SMD 37). This indicates that the assimilation of r < l to the following consonant was on the increase and the author wanted to point out which word ought to have rand which not. In his list, garde < galde is given. This is also in corroboration of our inferences about l in the 13th century. By the end of the 13th or the middle of the 14th century, replacement of l by l and the assimilation of r < l to the following consonant was established.

- N.K. baduku < M.K. bardumku < O.K. baldumku seems to have lost l apparently. But baduku is < * badduku < barduku < bardumku < baldumku. The poets and scholars always tried to use the archaic l in spite of the popular use of l and assimilated forms.
- IV. 1604. Karņāṭaka S'abdānus'āsana by Bhaṭṭākalamka—'The author of this grammar does not describe the actual state of the language in the early 17th century. He discusses mainly the principles laid down by Kēs' irāja, author of No. III

above, and often amplifies them, though the conditions had changed. l is from d (KSS. pp. 163-168). He gives a list of words¹ where l ought to be used, though l had been replaced by l long ago.

If we turn to Karṇāṭakakavicarite, Vols. I-III, we find that l is occasionally used for l, but l is used in all the examples quoted even up to A. D. 1850 cf. P XVII. Vol. I. KKC.—In the popular song of Dēvalāpurada Naṁjumḍa, an ordinary Viṣnudāsa, (1841) (p. 196 of KKC. Vol. III) we have pēli. This indicates the ways of scribes, commentators and editors of MSS. Hence quotations from this 'History of Literature' by R. Narasimhāchar, compiled from MSS. manipulated by scribes, commentators and editors, cannot be depended upon for our purposes.

Dr. Fleet in I. Ant. (KG. p. 15) has come to the following conclusion about the use of l in Kan.:-

A. 600-900 A.D. l in common use.

B. 900-1200 A.D. a transition of l to r and l.

According to Kan. grammarians Kan. -l- is produced when d- is pronounced with great force. When Surds k and p come after -d-, -d > -l in O.K. nodu + pam > nolpam, madu + ke > malke, eradu + kudure > eralkudure. Probably the -d- of these and similar words was pronounced like l or very much like l, and the words like nolpam, etc., were archaic forms, still surviving then. After l, fut. tense suffix -va- > pa-3 as before -r.

In between vowels, l > l in M.K. and N.K: alipi > alihi (See History of l above.)

^{1.} KVV. 6; KBB. 10, 11; SMD. 18, 19 and 114; KSS. pp. 167 and 168.

^{2.} KBB. 119 and 121; KVV. 65; SMD. 183; KSS. 65.

^{3.} SMD. 232; KSS. 503, 504, 511 and 518.

In SMD 20, dāḍima, kūṣmāṇḍa. Gauda, Guḍa, jhagaḍe, Viḍaṁgam, though born of -ḍa- and > -l-, have become kuḷas i.e., dāḷimba, kuṁbaḷa, Gauḷa, Guḷam, Jhagaḷe, viḷaṁgaṁ. These are kuḷa in "rūḍhi" or usage; ēḷaga < ēḍaga is kuḷa.

The Skt. t, th, t, r and I become -l- in old Kan.

Skt.	Skt.	O.K.
-ţ-	ghațike	$\mathrm{ga}\mathit{l}\mathrm{ige}$
	ghōṭike	go $m{l}$ ige
	dhāṭi	${ m dh}ar{ m a}l{ m i}$
	${f lar atam}$	$\mathrm{l}\bar{\mathrm{a}}l\mathrm{a}\dot{\mathrm{m}}$
ţḥ	$\mathbf{mathike}$	${f malige}$
	pēṭhike	pē l ige
ţ	$\operatorname{pratih}\mathbf{astam}$	pa l iha ${f stam}$
r	krūram	${ m k}ar{{ m u}} t$
	Jhallari	${ m Jhalla} l{ m i}$
1	${f tar a}{f lam}$	${f t}ar{{f a}} l$
	${f pulinam}$	pu \emph{l} il
	argalam	$\mathrm{agu}\mathit{l}$ i

According to Kes'irāja, O.K. -l- is from -d- and is the result of different prounciation. This can be inferred from Kēs'irāja (1260) stating in SMD 22 that paļikam, pēļige, vīļige, guļige, varāļam, ragaļe, though born of Skt. Sphaṭikam, pēṭike, vīṭike, ghatike, varāṭam, raghaṭe by "apabhrams' ate" are still ļ (kuļa as he calls them) in old Kanarese. But "hōḷige < sphōṭaka; lambaļa < lampaṭa are treated as doubtful cases for l, most probably they have ļ."

SMD 25. jhaļakam, jhaļipisidam, jomguļi, bombuļi, āļamāļam, thamāļam, vaļige, Onduļi, jamguļi, puttaļi, gōļi, pēļi these are doubtful whether they are l; they are most probably kuļa -ļ.

^{1.} SMD. 21, KSS. 140.

These Sutras show that d, l and l were pronounced though differently, but nearly in the same manner, and that l is, in the Skt. words, given by him and by KSS. on pp. 164-166 are from -d- or -t- or r; though l has replaced -t- in Skt. words like pratihastam, it is to be assumed that -t- had become -d- in Sauraseni prākrt and that this l replaced -d- of prākrt

About its pronunciation in old Kanarese, nothing is definitely stated by the grammarians except that l is from -d-.

There is no l in Te. and Tu. now. But in T. and M. it is still found. But in Madura and suburbs l is pronounced as l^1 , but in Madras and the north, it is pronounced as -y-.

In O.K. the grammarians and the poets considered l + consonant and r + consonant could be used in alliteration (prāsa)². This suggests that the pronunciation of r was very near that of l and that is probably why l + consonant > r + consonant.

$O.K.\ l.$

This l is found in T. and M. now. It was in use in O.K. and O.Te.³. When Te. and Tu. lost l is not known at present. This l is not found initially in any langage.

The following correspondences are found: -

I. (a) After long vowel:

K. T. M. Te. Tu. -l -l -l -l -l telu, tel

ziizi oou.			e is no	
			own.)	-
This 1 is drann	ad after l		•	compen-

This l is dropped after long vowel with compensatory lengthening in Tel.

molakālu mulamkālu mulakāl mokālu

II. After long and short vowels:— -l-1. -l-l- r, d, l. -dil 'to pull' iluiluīdu ūliga 'service ' ūliyam ūliyam ūliyam ūḍigamu ūḷiga. ēlu 'seven' ēlu ēlu edu ēļ kōli 'a fowl ' kōdi koli koli kōri tōli 'friend' tõli tō*l*i tōdi nāli 'vein, a tube' nā*l*i nāli nādi nādi pālu 'waste, to bury 'pāl $\mathrm{p}ar{\mathrm{a}}l$ pādu pādu (pulu) pu*l*u pu*l*u pūdu bīl 'inferior' vīl 'to vīl' to bīdu būru fall' fall' bola 'shaven' bōda bōļa agal 'a moat' agadu agalte $\mathbf{aga} l$ aga*l* kolave 'a pipe' ku*l*āy ku*l*āy kodama kolave kolave negal 'to be famous' nigal nigal negadu pogal 'to praise' puga*l* puga*l* pogađu pugar suli 'an eddy' culiculi sudi suli

In two words, Kan. -l corresponds to Te -y. kuli 'a pit' kuli kuli koyyi guri nole 'to enter' nulai nule nūy nūri cf. Madras pronunciation of -l- as -y-. palan payam and sometimes palam.

tuli

Consonant Groups.

The consonant groups are the result of (1) the final const. of one word coming in contact with the initial consonant of a suffix; (2) long consonants in suffixes; and (3) consonant groups in lws. These consonant groups are all in the terminational element. The consonant groups after short vowels are more numerous than those after long vowels.

In N. K. most of the consonant groups after short vowels are retained; preconsonantal nasal disappears in the termination; -r and -l with a stop after a short vowel are assimilated to the stop except in the case of those after long vowels.

The Treatment of Consonant groups in N. K.

I Nasal + stop.

A. Nasal + const. in the body of a word. These are in proper names. Their origin is not known. They are retained in N. K. Aṇḍugi, Kaḷantūr, Sindera.

B. The stop is the initial of a suffix.

This group is retained in N. K. only (1) if the nasal is preceded by a short vowel and (2) if the nasal is

- (a) a part of the root: amte, imbu, entu, endu, timgal; maniu of mamku or
- (b) the remnant of the assimilation of the final consonant of the root and the initial of the suffix: konda, (prob. < * kol-nta) 1. konda, tandu, Vandu, bandu, sandu, Sandān

^{1.} See Tense-Suffix in the Past Tense infra.

I. Nasal + Stop.

1. The nasal, if it is only a part of the termination, disappears after a short vowel:—1.

O.K.

N.K.

kodamge

kodage from kodu 'to give.'

2. The nasal, if it is only a part of the suffix after a short vowel, disappears:

O.K.

N. K.

tanku (cf tankade)¹

tāku.

3. The nasal + consonant after a long vowel disappears in any position:

O.K.

N.K.

nōmpi

nõhi.

In nompi, the root is given as non. T. nompu; nombu; M. nompu; Te. nomu.

The following with nasal + stop (suffix) are replaced in N.K. by new formations or words:—

O.K.

N.K.

uņ-voruin

uṇṇuvarū, colloq. umborū.

antu, intu, entu

hāge, hīge, hēge ennuval(emba)

neva suracāpambole

suracāpada hāge

The following are obsolete in N.K. nonta, nontu. II 1 + stop.

(A) l + k, g, v. Where k, g and v are initials of suffixes: all the groups have been replaced by new formations in N.K. (by the addition of -u to the root),

O.K.

N.K.

aļ-kalo

aļu-ku 'to fear' āl-ike — cf. ātida.

āļ-ge kolv*ōnum*

koll*u-vavanu*

cf. koluvõrum

colloq, koļļō vanu.

^{1.} Probably tanku is a mistake for tānku, probably ta-nku, since -nku- is the suffix of the verbal noun as in musunku beside musuru and muccu.

(B) ! + g, m. Where g, m. are the initials of the second word in a word group. There is no change in N.K.

O.K.

N.K.

velgola velmāda Belgola 1. belmāda

 $III \quad i + stop$

 Λ . 1 + g, v, t, where g, v, t, are the initials of suffixes.

These are replaced in N.K.

O.K.

N.K.

sal-ge

 $\operatorname{sall} ali$

sal-va-vol

salluva hāge hōguvavanu

salvõn

colloq. högövanu.

nal-ta

nal-me

B. 1 + t, m. Where t, m. are initials of the second word in a word group.

There is no change.

().K.

N.K.

nal-tapa

naltapa (oftenoltapa)

kal-mane

kalmane.

IV y + d, v. where d, v, are the initials of suffixes:

A. O.K. y + d appears as -d- in N.K. in the only instance:

O.K.

N.K.

āydān

ādanu.

- B. The remaining words with O.K. y + d or y + v are replaced in N.K. :—
- (b) The following with y + d and y + v groups, have been replaced by new words:

eydappaduvār

replaced by honduttare

(active)

^{1.} In some inscriptions Belugula is found, but now also the form in use in Mysore is Belgola.

kodalpaduttade

(passive

eydi eydidān eydidār eydidor eyde

hogu 'to go'

keydu geydu māḍu.

But geyyuvanu (colloq.

keyvōn keyvōr geyyōvanu) restricted to 'he who works' on a farm, and keyyu geyvalli restricted to 'to join sexually.'

V r + stop

r + consonant, where the consonant is the initial of a suffix or of a separate word:—

· ¹ If the -r is preceded by a short vowel, the -r is assimilated to the consonant following:

(1) r + consonantal suffix:

O.K.

 ${f erddapam}$

M.K. eddapam (replaced in

N.K. by ēļuttāne)

adarppu orvvan N.K. adapu M.K. orbban, obban.

N.K. obbanu, colloq. obba, oba.

1. Even when -r is preceded by a short vowel, -r is not assimilated to the const. following, but is replaced by new words.

O.K.

N.K.

negartte

lws: yas' assu, kīrtti.

Nw: hesaru.

varppu sāsirvvar baluhu.

sāvirajana sāviramandi

But if -r before the consonant is a suffix and the following consonant is the initial of another suffix, there is no assimilation of -r to the following const. but there is replacement by a new form.

O.K.

N.K.

ahit-ar-kkaļ mālākār-ar-gge ahit-aru-gaļu. mālākār-ar-ige.

(2) -r of a word + the initial consonant of a word.

O.K.

N.K.

perggoravam

heggorava.

perjedi irpattu

hejjede ippattu

Namilūrvvarasamgha Navilūravarasamgha

(3) When -r is preceded by a long vowel, -r is not assimilated

O.K.

N.K.

pārvvar

hāruvaru

VI l + const.

l preceded by short vowel > r, which is later assimilated to the const. following:

().K eltuelpattu ki*l*ga kiltu galdepalcu pelcu 1 adalde

M.K. ertu erpattu kirgga kirttu garde parceu

ettu eppattu kigga kittu gadde paccu heccu

N.K.

But after long vowels, a short vowel is developed between the l and the consonant.

adardde

perccu

But there is an O.K. form il with a long i-.

Probably there is no assimilation because of this long vowel.

-tu replaced by M.K. -ittu. (cf. ollittu, ballittu) and oltu by N.K. -eyadu, olleyādu.

-l after a long vowel replaced by nadu in M.K. & nālke N.K. N.K. nādige.

ildu M.K. ilidu. N.K. ili 'to descend' and ele 'to 1. drag'

APPENDIX I.

A few examples from the later inscriptions to show the assimilation of r and l to the following consonant are given here:—

75 .	,, ====================================

By the end of the 13th century, the assimilation of ${\bf r}$ and ${\bf l}$ to the following consonant was an accomplished fact though in poetry the unassimilated forms were found. In the descriptions of boundaries which are in prose, no r + consonant or l + consonant are found after the 13th century.

In K.R.M.—the earliest Kanarese work published the r + consonant and l + consonant are found, irddem (I. 60), barddumku (I. 72), korbbutta (I. 66), karceidode (II. 69), neredirddu (II. 125), embudarkke (III. 67), perceal (III. 150), baldal (II. 36).

In K.V.V. and K.B.B. (1045), unassimilated forms are very common, e.g., ivarke, orvane, barppam (212), irppam (212)

But S.M.D. (1260) reflects the real state of the language. There seems to have been some doubt whether certain words should have r + consonant or a long consonant.

Kēs'irāja, the author, of this points out that the list of words in Sutras 36-40 are to be pronounced with r and with l; clearly indicating that the r and the l had been assimilated to the following consonant in colloquial speech and that, in writing, confusion had set in regarding the use of words with r or l + consonant. As he did in the case of l, he gives the list of words where r or l + consonant are to be used. This corroborates our inference.

Further, the change in the pronunciation of these words is noted by him in his description of the fleeting double consonants (Sutras 36-40 and sutras 59 & 60). In these sutras, the s'ithilatva or the slack pronunciation of double consonants (i.e. the 1st syllable was to be a closed one with a final consonant) is described. The words given in his list have in N.K. a new vowel, in between the consonants suggesting that there was some half vowel or a short vowel in between the first and the second of the double consonants in the pronunciation of his age. On p. 49

(Sutra 36) he gives two or three words which can have both dvitva and s'ithiladvitva showing the dialectical variation, or probably the learned and the colloquial pronunciation. In Sutra 60, he condemns s'ithiladvitva in consonant groups (r + const.)

It is probable that, in r+consonant, r had become assimilated to the consonant following and there was shortening of the long consonant in pronunciation by Kes'irāja's time. But some poets had recognised this shortening, though conservative writing had retained the r + consonant and called it s'ithiladvitva or fleeting double consonant.

The latest grammar, K.S.S., paraphrases S.M.D. and is not of much help to us.

The inscriptions show that by the end of the 13th century, the assimilation of these consonants was an accomplished fact, but that, in verse, the archaic forms were retained.

VI Disappearance of the preconsonantal nasal:

A: Long vowel + nasal + suffix:

925 tōnṭadim (7) EC. IV. yl. 25;

935 tōtaman (12) EC. VII. Sk. 194;

950 kōṭe EC. III. Md. 41

982 nümki (51) EC. II. 134;

1057 tōṇṭakhaṇḍada; (24), tōṇṭa (33) EC. IV. Hg. 18;

1063 tōṇṭamum (23) EC. VII. Ci. 18.

B. Short vowel + nasal + consonant.

In N.K. these words have no nasals at all. Even in the 11th century there was confusion about the use of the nasal as can be seen from these few examples.

In K.V.V. & K.B.B. (1045), these nasals are generally preserved. But by 1260, the age of

Kes'irāja, confusion regarding the use of these nasals had set in and he, therefore, gives in Sutra 36, a list of words where the nasals are nitya or permanent (or compulsory); and where the bindu (nasal) is vikalpa or optional. This optional use of the nasal in some and the compulsory use of the nasal in the rest indicate that the nasal was gradually falling out and he wanted to retain the ancient usages by giving a list. Most of the words in his compulsory list have lost their nasals in N.K. (See the list given under 'The Dative Case' infra.)

But Bhaṭṭākalamka's grammar, K.S.S., is not useful to our enquiry as he is more a commentator on S.M.D. than a grammarian giving a true account of the language of the period.

LONG CONSONANTS.

Long consonants are found between vowels and after -r in O.K. The intervocalic long consts. appear, only after short vowels; similarly the r followed by a long consonant is preceded by a short vowel except in one word pārvvarumān (in which, moreover, the group develops differently from the group preceded by a short vowel).

These long consonants are due to

- (a) the suffixes with long consonants;
- (b) the assimilation of: 1. the final consonant of the root and the initial consonant of the suffix: 2. r with the consonant following: and 3. of l with the consonant following;
- (c) the retention of Pr. Drn. * -nn-, * mm, * -ll, and * -ll after short vowels in words of two syllables and before vowels;
 - (d) the consonants coming after -r;
 - (e) the long consonants in lws.

These long consonants of O.K. are shortened in Nws. and Lws. alike in N.K. after a short vowel in all positions. They are retained in emphatic and deliberate speech and in conservative writing.

The shortening of long consonants took place earlier in the terminational element (See p. 93)

1. The following suffixes have long consonants:

Nws. -kke. anduvalikke, akkum

-ittu. ollittu, ballittu. (cp. SMD. 226).

-pp-. bādhippa, muḍippidār.

Lws: -itti- Dēvedittiyar, s'işittiyar.

2. In the following, the final consonant of the root and the initial consonant of the suffix are assimilated.

Vbs: kețțar; '· viţţār; keţţ * nt-ar; viţ-* nt + ār. sattar - viţ-*

Participles: Ketta, kottu, pokka, mikkudān, muttidon, metti, vittu.

In the passive form, eydappaduvār < eydal + padu + v + ār, -pp- is due to the assimilation of -1 + p-.

- 3. In the following, i.e. in r + consonant group, r- is assimilated to the following consonant k- of ku. ikki < irku + i.
- 4. In l + consonant, -l is assimilated to the following consonant: vittidalli < * virttidalli < viltidalli. N.K. bittidalli (bittida kade). cf. bi/ttiyabhattadoļ (8). E. C. I. 3. (890).
- 5. The long consonants * in the following are probably due to the retention of the Pr. Kanarese * -n, * m, *l, and * -l of words of two syllables, having a short vowel before these consonants: Exs. unnūrum, gō manna, tammadigalor, namma; alli, nilladan, nillavu, ballittu, ulle, ollittu. In these, probably, Pr. Drn. had * -nn, * -mm, * -ll, and * -ll. In K, T, M. and Te. these final long consonants are shortened when they are absolutely final or before consonants; but before vowels, they are retained only when the vowel preceding these consonants is short and the words wherein they appear are of not more than two syllables.

muļ	muļ	$\mathbf{m}\mathbf{u}$	\mathbf{mullu}
mullu (a thorn)	muḷḷu	muḷḷu	mulu
-			10

But, in absolutely final position, the Pr. Drn.* -nn-, * -mm, * -ll, * -ll are simplified or shortened as given in the forms without- u above. Before consonants, they are found as single consonants:—

kan. -n. kankappu, 'a black collyrium applied to the eye.'

kankuni 'the socket of the eye'. kangone 'the outer corner of the eye'. kandere 'to open the eyes'. mangode 'a mud wall'

-l. kalgāna 'a mill with stones for grinding'. kalmale 'a shower of hailstones,'. kalkuṭiga 'a stonecutter'. kalnāru 'the American aloe'. palgaḍi 'to

gnash the teeth.' paldudi 'the point of a tooth.' paldere 'to uncover the teeth.'

-l. mulkīre 'the plant Amaranthus spinosus.' mulgattige 'a knife for cutting thorns.'

Tamil and Malayalam:

-n kankațai 'the corner of the eye', kankațța 'to blind the eyes by magic', kankūțu 'the socket of the eye.'

kantittam 'opinion from sight.' kanpattai 'an eyelid'. mankattiri 'to form earth, as white ants.' mankinaru 'an unwalled well'. manmalai 'shower of sand or dust.'

maṇmagaļ 'the earth goddess.' maṇpār 'a strata of hard earth.'

-l. kalnenju 'a stony heart.' kalmalai, 'a shower of hailstones' kalvețți 'a stone cutter', kalvīțu 'a stonehouse.'

pulvīțu 'a thatched house.'

-ļ. muļvāyan 'an insect that consumes wood.'

In 'I'el, these consonants are used before consonant with -u.

6. In the following the use of long consonants after -r are found in these inscriptions.

adarppi, erddapaın, orvvan, pārvvaruman, Sāsirvvar.

A consonant following -r is written as a long consonant; probably the long consonant was divided between the two syallables in pronunciation in that period. -r preceding a long consonant is assimilated to the long consonant if -r comes after a short vowel; then the long consonant is shortened. O.K. orvvan M.K. orbban and obban, N.K. obbanu, colloq. obba, when used independently and for emphasis, otherwise 'oba'. alloba bandidāne 'a certain man has come there.'

In the case of pārvarumān, a vowel is developed between the r preceded by a long vowel and the double consonant and it > N.K. hāruvaru.

- 7. The following gives the long consts. in Lws.:
- (1) $\P plw.$ with long consts: ayyamgal, kammarar, Janna, bhaṭṭa, bhaṭṭārakar, māriṭṭamān, Valliggāmeyar.
- (2) Slw. without a long consonant, adapted into Kanarese with a long consonant:—

nittadharmmamān < nitya dharmmamān. māṇākka < māṇavaka. In N.K. these are also shortened, as baṭariṃge in these inscriptions shows that they were already shortened by the 7th century.

The following are examples of long consts. found shortened in these inscriptions:

A. NWS. 1. Verbs & Participles:--

in the fut. of 'to be' '.' 'to become' and the past of 'to give' 'to be' ida for idda, ppl of ir 'to be.'

 $\bar{a}y$ 'to become 'akkum > akum, > akun; fut. of \bar{a} -gu 'to become ' \bar{a} ppār > appār > apar.

'to give' 'koţţam>koţam; koţţār>koţār in the past tense.

(2) Dem. pron, idarke > idakke > idake1

Lws: appa>apa in S'āntapana; kammāra>kamara; bhaṭṭa>baṭa; bhaṭṭārar; bhaṭārar; Vaḷḷiggāme>Baḷagāmve.

^{1.} Professor R.L. Turner: 'The Future Stem in Asoka' B.S.O.S. VI. p. 529.

i Sya > isati in Asoka. nikhamisati. (Dhau)

i Sya > iŚati. in Asoka. VadhiŚati (Shabaz)

These are in the termination element—JRAS 1927 p 232 Kurumah (skt) > skt Kurmah.

The following examples from later inscriptions show long consonants as well as shortened long consonants:

1673 Maļavaļiya (4), Maļavaļliya (5) EC. III. Ml. 63;

The following roots and proper names with long consonants are found:—

1. Roots:

kațțisu 'to cause to be built '; kațțu 'to build'; meccu (maccu) 'to approve'; probably from mar-cu, where -cu is a suffix. cf. pelcu, percu.

- 2. Proper Names:
- (a) Of Persons.
- 1. Arabhaṭṭa (Pkt. bhaṭṭa); 2. Uḷḷikkalguruvadigal; 3. Dallaga; 4. Dhaṇṇekuṭṭārēviguravi; 5. Nāgeṇṇan; 6. Paṭṭiniguruvadigal; 7. Meḷḷagavāsaguruvar; 8. Veṭṭeḍeguruvadigal; 9. Sokkagāmuṇḍar.

(b) Of Places.

1. Alamavaļļi (probably from ālam a banyan tree, paļļi-a settlement, or a village); 2. Uļļikal (probably a rolling stone); 3. Kittūr (kiru, small and ūr a village); 4. Kittere (kiru, small and ere, a lord); 5. Kiļļa; 6. Koṭṭara (probably from koṭṭa (given) and ara (for ara, charity); 7. Koļattūr (probably from T. koļatta. K. Koļadā, of the tank and ūr, a village); 8. Thiṭṭagapāna; 9. Nāvaļļi (probably from nā, four and palli, a village. four villages,) 10. Nīrilli (probably

^{1.} Professor R.L. Turner J.R.A.S. 1927 p. 228.

from Nir, water and illi here); 11. Pattini, 12 Valliggame, skt. Valligrama; 13. Vedevalli.

APPENDIX

The long consonants after short vowels are shortened in the following examples taken from kāvyas, dictionaries and grammars:

adapavalla, adapavala 'one carrying his master's, betel-pouch'; anna, ana 'an elder brother-'; anittu, anitu 'so much '. annisu, anisu 'to cause to say'; appa, apa, father; 'a term of respect.' appa, apa, aha 'that becomes'; alli, ali 'in that place'; illi, ili 'here, in this place'; ennike, enike 'counting'; kannadaka, kanadaka 'a pair of spectacles'; kallatana, kalatana 'theft'; kuyyisu, kuyisu 'to cause to be cut'; kūrittu, kūritu 'that is sharp'; kollu, kolu 'to kill'; geddalu, gedalu 'the white ant'; gellu, gelu 'to win'; cattige, catige 'a small earthen pot with a broad mouth'; cikkata, cikta, cigata 'a flea'; cokkata, cokta 'purity'; jalladi, jalade 'a sieve'; mullu, mulu 'a thorn'; sattuga, satuga,; satga 'a ladle of wood'; sallu, salu 'to enter a place, to go'; sallisu, salisu 'to cause to enter, to deliver'; sollage, solage, solige 'a measure of capacity'; hallu, halu' a tooth'; hoddike, hodike 'a cover, a wrapper.'

¹J. R. A. S. 1927, P. 238.

Consts. and vowels of terminations are liable to a development, difft. from that in the body of a word. Changes are due to pronunciation being lax and muscular effort is not intense, i.e., termination behaves as though it were unaccented or not prominent:—

- 1. Loss of syllable.
- Shortening,
 Voicing,
 Assimilation,
 or complete disappearance of a const.
- RV * Madhai > mahe and-dhi > hi. adhve > Pali. avhe. eni and ānāin > anusvara and later nasalisation of the vowel asmin > -s. through-asi. 'asya > assa > ;asa > s e.g. coras. -iṣya > isya,— issi-issi, isi, iha, ihi. -asi. chavasi > hossi-
- Result:—A. The inflectional system is destroyed, whatever the number of syllables of the terminations, due to the Phonetic weakness of the termination element.
- B.. Use of the other means of grammatical expression led to the termination being more lightly stressed and hence to the most violent phonetic changes in the terminational element.

PART I B. GRAMMAR

PART I.

B. GRAMMAR.

Nouns.

The nominal stems found in these incriptions consist of:—

1. Substantives not analysable into root and suffix:

āneya, gen. sg.-elephant. edeyān, acc. sg.-place. pulla, gen. sg.-grass.

2. Stems formed from verbal roots by the addition of one suffix:

ālge-rule, reign, from āl-to rule.

- 3. Substantives formed from:
 - (a) existing substantival stems:—
 okkaltanam from okkal-thrashing from
 okku-to thrash.
 - (b) adjectives or attributive words:—
 nalta (goodness) from nal-good.
 oltu (good, noun) from ol-good.
- 4. Substantives formed from the past and future declinable participles of verbs:

with gender suffixes, if any.

alidon-he who destroys-from alida-Dpp. of alito ruin.

ittodu-that which is given, from itta-Dpp. of ī-to give.

kādon-he who protects, from kāda-Dpp. of kāy-to protect.

5. Substantives formed from pronominal adjectives by adding gender-suffixes:

 $\left.\begin{array}{c} \operatorname{pe} r - \operatorname{an} \\ \operatorname{pe} l - \operatorname{an} \end{array}\right\}$ another person from $\operatorname{pe} r \operatorname{a} = \operatorname{the} \operatorname{other}$.

6. Substantives formed from Numerals: elapadimbarge-to the seventy people. sāsirvvar-one thousand people.

But in the case of lws. from Skt. the stems are formed as follows:—

- words borrowed from Skt. without any change: kulam, janam, dēham, dharaniyul, bhaktiyim, Maranam, mōham, rājyam, lakṣyam.
- 2. words borrowed from Skt. with modifications: ācāri, niśidhige, riṣyar, śiṣittiyar.
- 3. Skt. words in fem. gender, ending in- \bar{a} , are adopted into Kanarese, substituting -e for \bar{a} .

bāle from bālā,

mariyādeyan from maryyādā vidyullategaļ from vidyullatā.

- 4. Skt. stems ending in -s drop -s. manade from mana (Skt. Manas) tapam from tapa (Skt. tapas).
- 5. Skt. -vat (-vant) stems are borrowed with the strong form of the stem -vant.

laksanavantar.

6. Substantives derived from the Dpp. of the causative forms of Skt. roots:

pālisidom

7. Past participles of Skt. verbs are used as substantives:

rājas' rāvitam-āge.

Gender.

There are three genders, masculine, feminine and neuter.

- 1. Substantives denoting male persons are masculine:
 - 2. Substantives denoting females are femine;
- 3. All other substantives (denoting animals, their actions, qualities, etc.,) are neuter.

Masculine. Feminine. Neuter.

arasan, king no okkaltana-farming alidan, the destroyer examples. pali-blame pāvu-a snake salvon, the goer pulu-a worm.

. The masculine in the nom. sg. is either the simple stem without any suffix or termination, or the stem with any of the following suffixes to distinguish gender:—

-an, -am, -am, on, om. in -a stems only. (K.B.B. 50.)

(a) stems without any suffix or termination: masculine.—Allagunda, aliya, ere, Kāmba, Naṣṭappa, maga.

feminine.—tapaccale.

neuter.—ittodu, oltu, kere, dhoņe. pali.

(b) stems with suffix:

(These suffixes distinguish the gender of the stem as masculine):—

masculine. —arasan, arasam, alidom, alivon.

feminine.--no examples.

neuter.—ūļigam, okkaltanam.

It will be shown under "Declension" that the suffix -an runs through all the cases of the sg. except in some cases, the dative and sometimes in the pl.

-on is found as the gender suffix in the nom. sg. (-on <-avan, see -on under "Adjectives")

The use of -am for -an is due to the use of the anusvāra symbol (see "the nominative case" under "Declension").

The use of -am is found only in the case of Skt. words:

Kucelam, Gunabhūşitam.

Loan words, when adopted into Kanarese are regarded as Native Kanarese words in the matter of gender. The following lws. are used as neuter. mahājanakke, mūvettumūrā, dēvejanam, prajeyum (The same usage is found in later kāvyas).

The forms, S'rī Jambunāygir, Dēvedittiyar', s'işittiyar show that feminines were formed from the masculine by suffixing -i and -itti respectively:

Śriijambunāygir from Śri Jambunāyaka (masc.), guravi from gurava.

Ši sīttiyar from sisya (masc.)

There is no example of the fem. sg. of a NW. in these inscriptions.

The neuter nom. sg. is the stem ; some stems ending in a take am or am as the nom. sg. suffix, (see neuter nom. sg. under "Declension").

Nws.—neuter.

- (a) stem as nom. sg. neuter. okkaltana.
- (b) stem with -am. üligam, okkaltanam.

Lws. (a) stem without suffix:

^{1.} Here in these inscriptions eltu (a bull), Kavile (a cow) pulu (a worm) and pavu (a snake).

masculine: ācāryya, Gunakirtti, -prabhu, bhatāra, Mēghanandīmuni, Sarppaculāmani.

feminine: tapaccale.

neuter: nisidhige, pāda.

(b) stem with suffix:

masculine,-an.

andhan, niravadyan, pūjyamānan, munivaran, Saukhyasthan.

-am.

Kucēlam, Gunabhūşitam.

-om.

pālisidom.

feminine. no examples.

neuter -am.

āvusyam, kulam, tilakam, svarggam.

-avu, ātmavaśakramavu, mukhavu.

In the neuter sg., all Skt. lws. have -am or -am added to the stem as a general rule.

adigal-"Feet" is neuter when used as an independent word. When suffixed to guru- (a teacher), Guruvādigal (the feet of the guru) neuter in form. was used as masc. like the Skt. mitram, kalatram and śrībhagavatpādaiah; Guruvadigal mudippidārthe teacher ended (his life); the -ar of the verb indicates that this Neuter nom. pl. is used in the sense of masculine nom. pl.

In the case of devake, and devarke, the word deva (god) is used in the neuter and the meaning given to it by Dr. Fleet is "the establishment of the temple."

The -a stems in the masculine sg. and in the neuter sg. take -an- and -ad- [K.B.B. (51) ನಪುಂನಕ ಲಂಗೇನಃ (51)] respectively, as suffixes between the stem and the case-ending. But the -i-, -u and -e stems G. O. T.

8

have no such suffixes. Pronouns adu, idu (neuter) take-ar-as suffix, but only the glides -y- in -i and -e stems and -v- in -u stems. Why this differentiation is made is not known at present.

Number.

There are two Numbers—sg. and pl.

The sg. is either the simple stem in the nom. or the stem with the gender suffix or glide and casetermination.

(a) simple stem in the sg:

masc. Nws. Allagunda, aliya, ere, kāmba,

-a stems: Dallaga, maga.

lws. kamara, Naṣṭappa, Basantakumara, Rāmasingabhaṭāra, Vasantakumāra Śāntivarmma, Śrīmaccitravāhana, Śrīvikramāditya bhaṭāraka, śrīvinayādityarājaśraya prithivīvallabha-mahārājādhirāja parameśvarabhaṭara.

<u>-i stems</u>: Akṣayakīrtti, Guṇakīrtti, Pallavācāri, Puṣpasēnācāri, bhāgi, muni, sākṣi, Sarppacūļāmaṇi, Vinayadēvasēnanāmamahāmuni.

-u stems: Caritaśrīnāmadhēyaprabhu.

Feminine. no examples.

Neuter.

-a stems: okkaltana.

-i stems: gēli, pali.

-u stems: ittodu, oltu, pulu.

lws.

-i stem: pūti.

-e stem; nisidhige.

(b) stems with gender suffix:

	$\underline{\text{Masc}}$.	Nws.	${ m Lws.}$	
-an		arasan	-pātakan	
-am		****	Kucēlam,	Guṇabhūsi
				tam.
		7:		

-on alivon -om alidom pālisidom

Feminine no examples.

Neuter.	Nws.	Lws.
-am	okkaltanam	kulam
***	üļigam	${f dosam}$
-am	••••	${f d}ar{f e}{f h}{f a}{f m}$
-avu	••••	atmavaśa-
		kr a mavu
		mukhavu.

The pl. is formed by the addition of -ār, -ar, and -gal.

Masculine and feminine stems form their pls. by suffixing -ār or -ar.

Masc.	Nws.	Lws.
-ār	••••	aninditār
Feminine	••••	Rāj ñ īmatīgantiyār
-ar		
Masc.	arasar	āmikkōttamar
Feminine	••••	Dēvakhantiyar
		Śisittiyar

-ār is more ancient than -ar.

Masc. stems ending in -i, -u and -e from plural by suffixing -gal. (K.B.B. 40).

Masc.	Nws.	Lws.	
-i	••••	bhāgi-gaļ	

Fem. -e -avvegaļ -abbegal

All Neuter stems form their plural by suffixing -gal.

Nws. Lws.

... śrīsamgamgaļa. vidyullategaļ vratagaļ.

There is no differentiation between Nws. and Lws. in the formation of the plural.

The use of the honorific plural for kings, monks and nuns is very common and most of the plurals in masc. and fem. are honorific ones:—K.B.B. (42.) SMD. 102.

Lws. Nws.

Masc. kings mahārājar arasar.
monks ācāriyar
guruvar
māsēnar
nuns Devakantiyar
Śiṣittiyar.

The formation of the sg. and the pl. is seen in the declension of Nouns.

A subject in the sg. has often the verb in the pl. and vice versa, e.g., 3-71, 3-17, 6-18, 24-2 and 50-1,

Declension.

There is only one declension for all stems in all genders.

There are seven cases:—(1) Nominative,

- (2) Accusative;
- (3) Instrumental,

- (4) Dative,
- (5) Genitive,
- (6) Locative,
- (7) Vocative.

The stems end in -a, -i, -u, -e and consonants.

The study of these stems is taken up case by case.

The Nominative Case.

There is no case termination for the nom. sg. in all the three genders [K.B.B. 74 ೨೦ಗಾರ್ಥವಚನಮಾತ್ರೇಪ್ರಥಮಾ]. Either the stem or the stem with the gender suffix is used in the nom. sg. The pl. is formed by suffixing -ār, -ar or gaļ in the Masc. and fem. but -gaļ in the neuter. In a few cases, -u is found as the nom. sg. suffix.

(a) The stem as nom. sg.

-a stems : Masc. *Native,words* : Allagunda, aliya, kāmba, Dallaga.

Loan words: kamara, Nastappa,

Basantakumara, Rāmasingabhaṭāra, Vasantakumāra.

S'āntivarmma, S'rimatcitravāhana, S'rivikramāditya-

bhatāraka, S'rīvinayādityarājās' rayaprithivīvallabha-

mahārājādhirāja paramēśvarabhaṭāra.

Feminine. No examples.

Neuter. Nws. No examples,

Lws. dēgula.

-i stems: masc. Nws. no examples.

Lws. Aksayakīrtti, Pallavācāri, Guņakīrtti Puspāsēnācāri, bhāgi, muni, saksi, Sarppacūļāmaņi. Feminine. No examples.

Neuter. Nws. gēli, pali.

Lws. pūti, bhūmi.

-u stems:

Masc. Nws. No examples.

Lws. Carita' rīaāmadhēya prabhu.

Fem. No examples.

Neuter. Nws. ittodu, oltu, pāvu, pulu.

Lws. no examples.

-e stems:

 $\left. egin{array}{ll} \textbf{\textit{Masc.}} & \text{Nws.} \\ \textbf{\textit{and}} & \text{\textit{Lws.}} \end{array} \right\} \text{no examples.}$

Neuter. Nws. no examples. Lws. nisidhige.

But the masc. stems ending in a are used as nom. sg. with any one of the following suffixes of the masculine gender.

-an, -am, -am, -ōn and om. K.B.B. 39, 45, 50. -an seems to have been the original masculine and neuter suffix for all stems in -a. The reason for this supposition is the magan "son" (masc.) and maran "a tree" (neuter) have the same -an, not only in the singular, but also in the plural Nārayaṇayyaṃgalu, masc. (nom), ivelviṣayaṃgalan, neuter (acc.) and in all the cases. Examples for all the cases are not found in the inscriptions studied. Later, -an was restricted to the masculine gender and -am to the neuter. -am and -am are essentially the same. The form with -m is used before words beginning with a consonant; the forms with -m or -n before words beginning with a vowel. The only pre-vocalic form in the case of Skt. lws. is -m; -ōn and ōm are used as suffixes of the

declinable (relative) past participles of verbs which are used as adjs. (see "Adjectives")

-an.

Nws. arasan¹, Allagundan, Nāgeṇṇan.

Lws. Guṇasāgarādvitīyanāmadhēyan, Candradēvācāryyanāman,

> Nandisēnapravaramunivaran, mahādēvan, Vidrumādhara Śāntisēnamunīśan.

-am.

Lws. Kucēlam, Guņabhūşitam.

 $-\mathbf{am}.$

Nws. no example.

Lws. Kundavarmmarasam, guravam, perggoravam.

The masc. -i, -u and -e stems have no suffix or termination in the nom, sg.

The use of -m as the termination of the nom. sg. for all the stems in all the genders² by later grammarians is due to the influence of Skt. lws. in the neuter and the interpretation as -m or -n of the anusvāra at the end of a word; this is seen from the examples given by them for illustrating the sūtras; maram (SMD 93).

Nom. sg. Fem. No examples. Neuter.

As stated already, in principle there is no suffix or termination in the nom. sg. But the following suffixes -am, -am and -avu are found in -a stems. Essentially, all these are different forms of -am, avu<am -u.

^{1.} Caldwell and Kittel consider that arasan is lw. from Skt. and derive it from Skt. raja.

^{2.} K.B.B. 39,45,50; K.V.V. 15; SMD. 93 & 105; K.S.S. 227.

Neuter.

Nom. sg.

-am.

maranam, laksyam.

-am.

Nws.

ūļigam, okkaltanam.

Lws.

dōṣam, paramārttham,

svarggam.

Caldwell and Gundert state that -am is an obsolete demonstrative pronoun meaning 'it' and hence -am is not a borrowing from Skt. But L.V.R. Iver² comes to the conclusion that -am is a borrowing from Skt. since the use of -am demonstrative is nowhere seen in T., Kan. or in any of the Drn. languages. But he has not noted the use of -am in T. and K. in the nom. sg. and the incorporation of -am in the plural of neuter -a stems e. g. marangal in T. and K. There is one neuter pl. acc. where -an-gal<am-gal is found ivelvişayamgalam. of. alampu, the flower of the banyan tree, where -am is the nom. suffix, used in the gen. sense. It is not likely that -am, a simple suffix of the neuter used in the sg. and the pl. of neuter -a steins will be borrowed by a higly cultivated language like T. or Kan. from Skt.

Nom sg. Neuter-avu.

These two lws. have -avu as the termination of the Nom. sg:—

ātmavaśakramavu, mukhavu.

As pointed out already, the Nom. sg. of Neuter Lws. ending in -a have -m or -am as the suffix.

^{1.} C.D.G. p. 257.

^{2.} Ed. Rev. Madras Oct. 1928, p. 6.

The use of avu (<am-u) as the termination resolves itself ultimately into -am -u. This -u, used only twice in nominal stems, is generalised as the nom.sg. case-termination in N. K. and does not appear in any other case-forms.

ittodān, iravān, mṛtyuvaravān, varppin—in these forms -u disappears when the acc. or other case-termination is affixed. If it were a part of the stem, this -u would have survived in all the cases. The fact that the nom. sg. has no case termination, coupled with the appearance of this -u only in the nom. sg. leads us to suspect that this -u may have been a nom. sg. suffix.

This -u is found in the pronouns, personal termination of verbs and all nouns ending in consonants in M. K. along with forms without this -u; in N. K. it is fully established as the nom. sg. case-termination of all stems of both Nws. and Lws. in all genders and numbers. The addition of this -u has not modified the meaning or grammatical function of any of the words to which it is suffixed. Verbal roots ending in consonants in O. K. and M. K. have this -u in N.K. This -u does not appear even in N. K. before a suffix beginning with a vowel.

This -u is found in T. Mal. Tel. and Tu. also. Its non-existence in the other dialects and their late appearance in these dialects show that this -u has a definite purpose to serve. In many inscriptions it is written, though not pronounced, on account of the needs of metre. Even in N.K. colloquial speech, it is not always pronounced, though it is always written.

Dr. L.D. Barnett, E. I. XV. p. 109; Memoirs of A.S.I
 No. 13. pp. 11, 12, 14, 16 and 19.

The "euphonic" theory put forward by Caldwell¹ and Kittel does not explain the use of -u as nom. sg. case-termination in N.K. Caldwell himself doubted whether this -u had not a specialising signification at first which had now been lost.²

I think the origin of this -u may be this:-

In Kanarese, there are a large number of verbal roots which end in consonants. These roots were used both as verbal roots and nouns.—

alar - to open to flower; a flower

alal - to sorrow; grief

kaval - to branch off; a branch

kukil - to sing as a cuckoo and a cuckoo

talir - to sprout; the tender sprouts of a plant.

nul - to make thread; threadpan - to get ripe; a ripe fruit

 $ext{p\~o}l$ - to cleave asunder; a piece

 $b\bar{a}l$ - to live; living, life

 $b\bar{\imath}l$ - to fall; uncultivated land, a creeper.

mugu! - to shut the eye-lids; an opening bud.

mūļ - to be thorny; a thorn sidil - to be split; thunderbolt

sīn - to sneeze; sneezing

sī! - to cut asunder; a portion

Naturally, the use of the verbal root as the 2nd sg. imperative and as a noun caused some confusion and difficulty to the Kanarese child. It saw verbal nouns formed from roots by suffixing -pu and -vu:

^{1.} C.D.G. p. 134. Kg. p. 23 and 25, 27-29.

^{2.} C.D.G. p. 208.

-pu: ōpu<ō - to love.

kāpu<kā (y) - to protect

tōrpu<tōr - to appear

paḍepu<paḍe - to get

mārpu<mār - to change

mēpu<mēy - to graze

-vu: ari-vu<ari - to know ali-vu<ali - to ruin ul-vu<uli - to remain over era-vu≺ere - to pour kara-vu< kare - to milch kī-vu<kī - to form pus tili-vu<tili - to know tera-vu<tere - to open nera-vu<nere - to take place nō-vu < nō - to pain pari-vu<pari - to flow pasi-vu<pasi - to be hungry pali-vu<pali - to slander mera-vu<mere - to shine sā-vu≪sā - to die suli-vu<suli - to turn round sela-vu<sele - to drag, to pull

Further, verbal nouns were also formed by suffixing-udu or -adu;

kare-v-udu-calling<kare - to call kuṇi-v-udu-dancing<kuṇi - to dance

Verbal nouns may be formed from every verbal root by suffixing -vudu.

Besides these, a large number of nouns in nom. sg. in Kan. end in -u:—

karu - a calf. palu - a forest. pulu - a worm. pāvu - a snake.

Further, the declension of stems ending in a consonant (the verbal roots ending in a consonant when used as a noun) was in no way different from that of the noun ending in -u excepting the dative.

The forms of nouns ending in -u found A. in the inscriptions and B. in the kāvyas are shown in the following list: To show that the words end in -u, the stem forms found in the inscriptions are given in the list marked C.

The declension of -u stems and stems with a final consonant with and without suffix -in- was very similar:—

varavu - $\bar{a}n = varav\bar{a}n$. $b\bar{a}l - \bar{a}n = b\bar{a}l\bar{a}n$. $bal - \bar{a} = b\bar{a}l\bar{a}$, $b\bar{a}l$ -in- \bar{a} batar - ge, = batarggebatar - im - ge = bataringe.

All these forms are found in these inscriptions.

Further, participles of rts ending in -u and of those ending in a consonant are similar in form very often:—

-u-	pp.	Const.		pp.
turuku	 taruki	$\mathrm{b} ilde{\mathbf{a}} extbf{\emph{l}}$		bā <i>l</i> i
malagu	 malagi	$\mathbf{u}\mathrm{dir}$		udiri
a <i>r</i> ucu	 a <i>r</i> uci	\mathbf{a} dar	Na Proposition and Particular Section 201	adari
īņţu	 īņți	pīr		pīri
kaţţu	 kaţţi	kār		kāri
ōḍu	 ōḍi			
suttu	 sutti			
ōdu	 ōdi			
keḍapu	 kedapi			
tarbu	 tarbi			
nemmu	 \mathbf{nemmi}			
t a ḍavu	 tadavi	${f tar a}$		tāļi
tīvu	 tīvi	នរិ្		sīļi
arasu	 arasi	poral	,	poraļi

-u-	pp.	Const.	pp.
eļasu	 eļasi	uruļ	 uruļi
$b\bar{\imath}ru$	 bī <i>r</i> i	$ar{\mathrm{a}} l$	 ā <i>l</i> i
ēru	 ē r i	$\mathbf{poga}\mathit{l}$	 $\mathrm{poga} l$ i

Though there were exceptions, the child found a large number of examples where this similarity existed.

Also, the Sandhi forms of words with -u and rts with a final consonant resembled very much.

Examples of these forms from the inscriptions are :—

A.D. 980 pomgadamgidudu. E.I. XV. 329

In course of time, the noun-forming suffix -vu may have become -u by the loss of the initial v- and -u alone may have been used as the noun-forming

suffix as we have instances of such -u in the inscriptions of the next century.

Even in colloquial speech in N. K., we have mātimda, ēṭimda, gumpimda < matu, ēṭu, gumpu.

The child naturally suffixed -u in all those verbal roots ending in consonants when used as nouns. This -u was generalised as a noun-forming suffix at first. Since the stem was used without any suffix or case-termination in the Nom. Sg later on, this -u was generalised as the nom. case-ending, and therefore was added like all other case-endings to the sg. and the pl. The pronouns in the nominative had this -u suffixed to them. The personal terminations of verbs are fragments of pronouns and they too have -u in M.K. and N. K. In N. K. grammars, -u is the nom. case-ending of all stems in both the numbers and in all the genders.

It is stated that the virāma is represented, by u throughout and pointed instances are of s'rīmatu, pārthivēndranu, and pogaļaluke (E. I. V. p. 26). But in E. I. IV. p. 350, Fleet says that the virāma is represented by its own proper sign which resembles an exaggerated superscript r or e in ll 2, 4, 11, 15, But in mattaru (24), the virāma is represented apparently by u. At any rate the occurrence of mattar in Samdhi in 1. 23 and by itself in ll. 34, 35 suggests that in mattaru, the final mark is intended to represent the virama and not to be pronounced. Further, in E. I. IV. Jatimga Rāmēśvara Hill, he states that the virama is represented by its own sign in devar (7) and kottar (12). In E.I.V. p. 9 both enal and enalu, paduval and paduvalu, mūdal and mūdalu (42, 47, 48) are found. In E. I. XIII. p. 168,

u is often used, but not always, to denote the absence of a vowel after a consonant.

In E. I. XII. p. 355 u is written instead of the virāma. On page 336 of E. I. XII, the notation of the virāma is found in several places in the prose portion as well as in verse—dhātriyolu and more notably in tatu-kanīyam (11) and bhavētu (48).

Why the virāma should come after every word in an inscription and whether it does so always is not clear. Tatu is the normal pronunciation of the vaidikas or orthodox people in Mysore and Dharwar areas. In fact, all the statements made in the E. I. clearly indicate that u was gaining a place in literary composition as it had established itself in colloquial speech. The people wrote in prose as they pronounced, but in conservative verse, the orthodox school did not accept it for some time and pronounced as in the past. But later, u came to stay in verse as in prose and is still in common use in N. K.

The original principle of having the simple stem or the stem with the gender suffix in masc. -a stems, was kept up in the conservative literary compositions, though -u was gaining strength in popular speech. That is why in some of the inscriptions in verse of the eighth and later centuries, -u is written but not pronounced, owing to the needs of metrical length. But in prose, they were written and pronounced. Conservative writing rarely adopts the change in popular speech very soon. Poetry was rarely written in popular speech in ancient times. Linguistic modifications get into poetry after a fairly long period of trial in popular speech. Hence this -u is rare in the garliest inscriptions and is more and more in evidence

in later ones; by the 15th century A.D. -u had established itself fully in the Kannada language. The silence of grammarians on this point is due to the fact that their grammars were chiefly based on standard literary works which were mostly in verse. The addition of this -u made the introduction of new grammatical forms necessary in M. K.

In the pl. the pluralising particle is suffixed to the stem directly in all the genders. The masc. and the fem. genders have the same pluralising particles: -ār, ar and -or in the case of -a stems; ār, ar and -gal in the -i stems; and -gal in the -u stems.

We have reasons to suspect that -ār is the more ancient of the two. In fact, -ar is derived from -ār. In 3rd pl. of verbs we have ēridār, viṭṭār in the earliest inscriptions. In the 3rd sg. we have āydān, ēridān, sandān. In N.K. present. continuous, -āné and āre are used, baruttāne, baruttāre. In Tamil, -ār is the only pluralising particle for the masc. and fem. In Tel. the 3rd pl. of verbs is -āru.

During this period, the ar and -ar are found side by side.

-ār -a stems--

masc. fem.

aninditar, prathitar. no examples.

-ar -a stems.—

ādhipar, āmikkottamar, Āļuarasar, Kandarbar. nītisampannar, pañcamahāpātakasamyuktar, bhaṭārakar, Māṇākkar māsēnar, Meḷḷaga vāsaguruwar, Vinayāditya satyās raya-prithivīvallabhar, siṣyar, S'rijinamārggar, S'rī Pogillisendrakamahārājar, S' rībhaṇṭārakar, -bhaṭārar, Sarvvajñabhaṭṭārakar.

Neuter: The pluralising particle of all neuter stems is -gal.

-i stem. Neuter in ferm, masc. in meaning.

gal. -guruvadigal. Bāladēvaguruvadigal, Vettedeguruvadigaļ.

Singanandiguruva digal.

Masc.Fem.Neuter. pl. pl. pl. Sg. sg. sg. -gal. a. stem -ār (nws. -ar a. stem & lws.) (lw. -i stem)

"

Thus we get the following in the nom:--

-ar (lws.) b. stem -gal -gaļ b. stem an am- on (lws. and (Nw. -i - am om i stems) stems) - avu

The Accusative Case.

The terminations are -ān, -an, -am, -am, -ā and -a. We have reasons to suspect, as in the case of -ār (nom. pl.) that -ān and -ā are more ancient than -an and -a. During this period, -ān and -an, -ā and -a, were used side by side. -ā and -a are the same as -ān and -an with the final nasals dropped. Why the final nasal was dropped is at present unknown.

The conjunctive suffix -um is added to the case-endings of all nouns except in the accusative. In the latter, -um comes in between the stem and the case-ending.

e.g., masc. pārvvar-um-ān. neuter, initum-ām.

In the nominative sg. -um is suffixed to the stem or the gender suffix. The fact that in the acc. this suffix -um comes after the stem, but before the case-ending, suggests that the acc. ending is later in origin. In N. K. colloquial speech, the acc. suffix is rarely added to the stem in the case of inanimate objects:—

e.g., mane kaṭṭisida - he built a house.
house he built.
tiṇḍi tinda - he ate the eatables.
eatables he ate.
pustaka tā - bring the book.
bring the book

The acc. termination is added to the nom. sg. of -a stems with the suffix -an in the masc. and -am in the neuter. Loan words from Skt. retain the -am of the neuter nom. sg.; the acc. ending is affixed to the -am, which sometimes becomes -av-.

-ân. masc. -a stems.

lw. urumithyāṭvapramūḍhasthiratara nṛpanān. fem. no examples.

neuter. ajñānas' ailēndramān, īpūjyāsthalamān, ghanammāriṭṭamān, tapam sayyamamān, duritābhū-dvṛṣamān,

dēgulamān, dharmmam-ān, prāsādāntaramān, mūrudēgulamān,

s' rītapam-ān, svarggāgram-ān.

-i stems. lws. giri-y-ān, siddhi-y-ān. 1

-e stems. nws. āļ-ge-y-ān. ede-y-àn.

The acc. termination is added to the gender-suffix -an in the masc. and -am in the neuter of -a stems so far. In the following examples,-- ān is added directly to the Nom. sg. (neuter) without any suffix coming in between:—

nws: ittod-ān, irav-ān, mṛtyuvarav-ān.

-ā. masc. and fem. no examples.

neuter -a stem.

lw. vālibhāgam-ā.

-e stems.

pās' upatamariyādey-ā pūrvvamariyādeyā.

-an. masc. and fem. no examples.

neuter. -a stem. lw. kadambamandalam-an. -bhāvyaman.

-e stem.

nw. āne-y-an. lw. mariyāde-y-an.

stems ending in a consonant - nī r - an.

^{1.} KRM. II. 15. "-an > -ān when followed by a word with an initial vowel, when the stem ends in a nasal, or at the end of a line in verse."—This rule is not observed in these.

-am. mas. - kalantūr-an-am. (The meaning is nom. sg.)

fem. - no examples.

neuter - -i stem - lw. yati-y-am.

-e stem - lw. viccheyam.

-am. masc. - -i stem. bali-y-am.

fem. no examples.

neuter -a stems.

lws. Kaṭavaprav-am,

manavam.

stems ending in a consonant - pul-l-am.

In place of -am, -am and -an, we sometimes have -a, masc. and fem. no examples.

neuter Nws. pul-l-a.

lws. dehav-a, rājyav-a, s'āsanam-a s' ailama.

-ava of dēhava, rājyava are < am-a.

In pulla and pullam (acc. sg.) the final consonant of the stem is doubled before the case-ending. Such doubling takes place only.—

- (1) if the penultimate vowel is short as in pul, and not long as in nīr-an;
- (2) if there are no more than two syllables in the word; and
- (3) if the consonant n, n, y, l or l is followed by a vowel.

Primitive Drn. perhaps had long consonants; they were shortened in the absolute final position, but preserved before vowels.¹

The bindu is put between the masc. or fem. -a stems and -gal or -dir; when such words are neuter, the insertion of this before -gal is optional; but when

Prof R. L. Turner, JRA.S. 1927, p. 227 Vissarati

Vismarati.

they are skt. neuters, it is obligatory. (SMD. 103), e.g.

m. amnamgal, amnamdir.

f. akkamgal, akkamdir.

n. maramgal, maragal, polamgal, polagal, payamgal, payagal.

 $Skt.\,$ guṇamgal, dēšamgaļ, kōśamgaļ, doṣakke: deśagaļ.

The pl. suffix of -a stems may have been * mgal in O. K. as it is in T even now, both for masc. and neuter. In 1260, the deletion of the nasal was optional in neuter, but compulsory in the case of masc, fem, and skt. neuters. The omission of the nasal in skt. neuters was dōṣa "SMD. 103"; why it is so only in the case of -a stems is not known;

*Pr. pull > O. K. pul. but pr. Kan. pulla remained pulla.

In one instance, Sanyāsana vidhi (intu muḍip-pidār), the nom. sg. (stem) is used as acc. sg. This use of the nom. stem as acc. is common in colloquial speech in N. K.

Skt. divam (acc.) is used as acc. in divampokka (II. 80, 4) and divam eridar.

In the pl. the acc. endings are added to the pluralising particle.

mas. and fem. - no examples.

neuter - ivalvişayangalan.

In one case, the -ān is suffixed to a stem ending in a numeral: gandhēbhamayd-ān.

The Instrumental Case.

The terminations are -im, -im, -in, -inda, and -indu -im and -in are different forms of -im.

The terminations are added without any suffix between the stem and the case-ending in the -u stem: varppin and kavadim. But in neuter stems ending in-a, the suffix -d- comes in between the stem and the ending. But in -i stems the glide -y- is found.

Generally, -im and -im are used before a consonant while -in is used before a vowel. But the use of -in before a consonant is not unusual. There is no principle governing the use of -im and -in as can be seen from the following:—

anurāgadin eradu.

anēka s' īla guņamālegaļin sagid oppidon.

imbinin prāsādāntaramān.

inbinim (last word in the verse).

kavadim Kaţavaprameriyē.

guṇadim svādhyāyasampattinim kare-il-naltapadharmmadim.

bhaktiyim aksimanakke . . .

mukhadin keydondutā.

yugmadin oppe val, yōgadin avarum.

svarlökadim niścitam.

-im. masc. and fem. - no examples. neuter - -i stem. - bhakti-y-im.

-im. masc. and fem. - no examples.

neuter - -a stems. - (-ad-im).

lws. amalam naltada s' īladim. vratas' īlanōnpiguņadim.

svarlökadim.

-in. masc. and fem. no examples.

neuter

(a) without any suffix 1

-u stems. - varppin.

(b) with suffix -d-

-a stems lw. - ārādhanāyōgadin, guṇadin, tapadin, tumgōccabhaktivaśadin, Bhadravāhu sa Candragupta munīndra yugmadin, vicitra kanaka prajvalyadin, vidhānamukhadin, sanmārggadin.

(c) with double termination (in-in).

-u stems nw. imb-in-in (inbin-in) (1).

(lw. svādhyāyasampattin-im).

In these two cases, there is no suffix, but the termination -in is repeated twice. Such instances are found in classical Tamil.

T. malei-y-in-in - from a mountain.

Here, the first -in- has lost its original significance and further reduced to a mere suffix. Hence the instrumental case-ending -in is again added to make the meaning clear. Cf. Suralōka mahāvibhavasthanan (40-4).

-inda. masc. and fem. no examples.

neuter. -a stems:

lw. dēvadaņda-d-inda.

-indu. masc. and fem. no examples.

neuter. -a stem.

lw. vidhāna-d-indu.

As in the accusative, the termination is added to the pluralising particle.

-in. masc. -a stem. lw. - kumār -ar-in.

fem. no examples.

neuter -e stem. lw. - anēkaguņas' īlamāle-gaļ-in.

^{1.} From this, it is clear that the addition of -v-glide and of -in- is later in origin. KG. p. 4 (a) and 43 (b); CDG. p. 263.

^{1.} CDG. p. 276.

The origin of the instrumental ending -im, or -in is not at present known. Caldwell's statement¹ that it is identical in origin with -in, the suffix of the Tamil ablative of motion, originally a locative, is not quite clear. His attempt to show that -inda is derived from -irda by citing the Tuda instrumental suffix -edd does not 'seem to be logical. Gundert's derivation of -inda from ede - a place, is not satisfactory²; -im (or-in) is an adverb of time in Kanarese and its meaning is "from that time, afterwards." Perhaps this adverb is used as a post-position to mean "from or by" (instrumental case.)

This -in- is inserted between the nom. sg. and pl. of -a stems and the terminations of the dative, as in kālarige, baṭaringe³. Why this is so inserted is at present unknown.

The Dative Case.

The terminations of the dative are -ke, -k-ke, -ge, -i-ge.

The termination is in principle -ke. This is preserved when preceded by l (< d); the neuter suffix -a < ar < ad (this ar-ke subsequently > ak-ke). Otherwise, when preceded by a vowel, or by -n (whether radical or suffixal), 1, l and r (other than r < r) it > -ge. masc.

- (a) without any suffix Devereya-ge.
- (b) with suffix -an

In the only instance of the dative-termination, added to the suffix -an, -i is inserted between the

^{1.} CDG. p. 276.

^{2.} CDG. p. 276.

^{3.} SMD. 108. 109. This-in-is used in the old case-ending in u, \bar{u} , r, r \bar{o} . ou, and nouns with final consts and some adverbs in e insert this-in-before any termination.

masc. sg. stem kalan and the termination -ke, the form being kālan-i-ge, as in N.K. But in O.K. and M.K. kāvyas, the form is kālage, kālamge¹. The -iis considered "euphonic" (whatever that may mean) and recent by Caldwell² and Kittel³. The occurrence of the form -ige in the earlier inscriptions shows that it had existed in the language for a long time before it appeared in literary composition. But, beside the termination -i-ge of these inscriptions, a form, kālan-im-ge appears in the kāvyas and batarimge in the inscription of the 7th century which is taken up for study. It is, therefore, possible that -an-i-ge represents an earlier -an-in-ge with an additional suffix, which appears also in the termination of the instrumental (see above) and genitive and locative of a stems. This preconsonantal nasal of O.K. disappears in M.K. and N.K. as the earliest disappearance of the preconsonantal nasal in a termination is quite natural4. The reference of grammarians to the optional or irregular use of the bindu or anusvāra⁵ is to the tendency of the language during the period of transition from O.K. to M.K. The process of change can be seen from the following examples:--

O.K.	M.K.	N.K.
aḍaṁgu	aḍaṁgu or	aḍagu
	$\mathbf{a}\mathbf{\dot{q}}\mathbf{egu}$	(to conceal one's self)

Neuter suffix -ad-.

lw. Lañjigēsaram-dēvarke (578 A.D.)
-ar-ke of dēvarke is < ar - ke. This -ar- appears in place of -ad- in the oblique cases of all the neuter demonstrative pronouns in the sg. and the pl. before a vowel:—

ad-ar-im (from or by this. instr.) ad-ar-a (of this. gen.)

The later grammarians state¹ "A word with final -ru, which changes to repha, on taking -ge, the ending of the fourth (dative case), substitutes k for the first letter." In N.K. this -ar- ke > ak-ke by assimilation. In Tam. the dative of adu is ad-ar-ku.

The normal ending is -ak-ke (>ad-ke) lw: apunarbhavakke, dēvalōkakke, naragakke, ramya-suralōkasukhakke, svarggālayakke.
-ke.

In one instance, Kilgānadēvake, in place of -ak -ke, we have -ke affixed to an -a stem. This shows the general tendency of Kan. to shorten long consonants, unlike Tam. and Mal., when circumstances favoured it, in the last syllable of a word when preceded by a long vowel and in the terminational element.

The following list shows that the long consonant in the last syllable of a word preceded by a long vowel in T. and M. was simplified in Kanarese:—

Tam.		Kanarese.	
āṭṭam - play			āṭa
ūțți - food	••••	••••	ūṭa
ōṭṭam (running)	••••	••••	ŏţ a
kūṭṭam (gathering)	••••	••••	kūṭa

^{1.} SMD. 110. 114.

^{2.} KSS, 269 and 275,

Tam.		Kan	arese.
tākku (to touch)	••••	••••	tāku
tīṭṭu (to rub)	••••	••••	tīḍu
tēṭṭu (to search)	••••	••••	tēḍu
nāṭṭu (to fix)	••••	••••	nāṭu
nīkkal (to separate)) .	••••	nigu
noțțam (sight)	••••	••••	nōṭa
pâṭṭu (a song)	••••	••••	pāḍu
pūṭṭu (to yoke)	••••	••••	pūḍu
vēṭṭam (hunting)	••••	••••	bēṭa
mīṭṭal (to strike	the springs		
of a lute)	••••	••••	\mathbf{m} īţ \mathbf{u}
mūkku (the nose)	****	••••	f mar u g f u
mūṭṭai (a bundle)	••••	••••	${f m}$ ūțe
m ēkku (height)	••••	••••	\mathbf{m} egu
vāṭṭam (a slope)	••••	••••	vāţa
vāṭṭam (a street)	••••	••••	vāḍa
ś ūṭṭu (to crown)			
(to wear on	the head)	••••	sūḍu.

Probably we have here the beginning of this shortening of -ak-ke to -ake in the termination. Later grammarians state that this shortening is optional (vikalpa), pointing to the period of transition. In modern speech (as opposed to conservative writing), only -ake is used.

-ge :--

In one instance, a neuter -a stem has the termination of the masc. -ge, viz., anka is a tatsama and -ge is added to it. The word anka has another form, anke; -e stems take -ge. This anka may, therefore, be a mistake for anke; or an anka (k) ke may have been influenced by ankege.

^{1.} SMD, 115.

G. O. I.

-e stems:-

Masc. and fem. no examples.

Neuter - edepare-ge; kalmane-ge.

Consonantal stems:—

stems in -r:- masc. and fem. no examples.

Neuter:—(1) -ge: palarūr-ge.

(2) stems in -d.

As stated above, after stems in -d, -ke remains unvoiced, i.e., -d-ke > -t-ke > -l-ke. The -ke which thus involves a change in the last consonant of the root is subsequently replaced by the later ending -i-ge (discussed above) which involves no such change, i.e., M.K. nād-in-ge, N.K. nād-i-ge. This preservation of the unvoiced quality of the second consonant in the group, stop + stop, is paralleled by the development of ad-ke (see above). On the other hand, in the group, original continuant + unvoiced stop, the stop > voiced. cf. palarur-ge.

In the pl., the ending is added to the pluralising particle.

masc. -a stems :—mālākār-ar-gge.

This doubling probably presents an actual pronunciation, the syllable division being -arg-ge. Hence later grammarians treat this -gge as fleeting double consonant.¹

In the two forms (as already discussed) -im- is inserted before this -ge:

baṭar-im-ge, Kilgānabaṭar-im-ge.

In N.K., the -ar-i-ge (< -ar-im-ge) forms have ousted the ar-gge forms entirely.

Fem. No examples.

Neuter No examples.

^{1.} SMD, 115.

The Genitive Case.

The terminations are -ā and -a. We have reason to suspect that -ā is more ancient than -a (cf. -ān and -ar in the nominative and -an and -an in the acc.) The author of Kavirājamarga (9th century A.D. i.e. 877 A.D.), the earliest of the published works in ancient Kanarese, states that the -a of gen. may be lengthened optionally, when many nouns in the gen. are combined, or at the end of a line in verse. But the earliest Kanarese grammar² says that -a or -ā may be used "yathestam". The Kanarese grammar of the 13th century A.D. states that some accept -ā in the gen. for expressing sorrow and excitement.3 Bhattākalamka of the 17th century A.D. says that -ā of the gen. may be lengthened optionally.4 Kittel and Caldwell think that "-ā is simply a euphonically lengthened -a."5. The origin of the -ā is at present unknown. The explanations given by these grammarians are attempts to get at the origin of -ā.

But in these inscriptions, no use of -ā for expressing sorrow or excitement is found. We cannot infer that the presence of the initial vowel of the next word leads to the lengthening of this -a, as all the words after the genitive -ā begin with m-, n-, ś- and s-. At the end of a line, or for purposes of metre, the -a is lengthened, some commentators say. But it is not unreasonable to suppose that in such cases -ā is used and not that -a is lengthened. There is no principle

^{1.} KRM. II, 20.

^{2.} KBB. 67.

^{3.} SMD. 117 and 118.

^{4.} KSS. 255.

^{5.} KG. p. 53, Section 119. CDG. p. 297.

governing the distribution of -ā and -a in these inscriptions. As already stated, the origin of this -ā is unknown.

Forms with -a are more in number in these inscriptions than those with -ā-

-ā \mathbf{a} Mamgalīśanā (578 A.D.) kavili-y-a (675 A.D. Andugiyā, kādorā (675 A.D.) Vaļļirggāmeyar-a (685 Amaliyar-ā A.D.) 685 A.D. Banavāsiya (692 A.D.) Alamvalliyar-ā Edevolalnāda (692 A.D.) Nīrilliyā Saluvugeya (692 A.D.) Vāgūrā 690 A.D. Siantapana (692 A.D.) Erevadigalā and the rest are of about and all the rest are of 700 A.D. about 700 A.D.

In one and the same inscription, e.g., Kp. 37 of 675 and Sk· 154 of 685 A.D. we find both -ā and -a forms. Of the -ā forms, except 15, all the rest are found in verse and a long vowel or guru is necessary in that place for purposes of metre.

(b) -in-: Kalbapp-in-a.

As already stated above, the origin of -in- is at present unknown.

The suffix -in- which is found in the genitive cases of stems ending in a consonant or -u is also found in the dative and the locative in the same position. In the dative, it is used in -a stems also after the gender suffix -an-, as in kāl-an-i-ge and baṭar-im-ge (see "The Dative Case"). The case-ending of the instrumental is in (im). (SMD. 108 & 109.) This -in- is found in Tamil as the genitive case-termination as in ponnin-kuḍam (or gold-vessel). According to Caldwell¹. -in was originally the locative case-sign,-il-here, a house, later generalised as a possessive case sign². But we have no evidence to show that this was in Kan, a locative at first.

As for his statement that -in was originally a gen. ending in Kanarcse as in Tamil and Mal. but it ceased to contribute to grammatical expression and then -a was used as the gen. ending, ³ so far we have not been able to discover any such gen. form in Kanarese where -in is used as the case-ending. That the instrumental ending in Kan. is -in and that -in- is used as a suffix before the case-ending in the dative, the gen. and the loc. of stems ending in consonants, -u and sometimes in -a (only after the masc. or fem. gender suffix in the -a stems), are all that can be inferred from the facts before us.

Kittel⁴ gives in (iii) as an adverb of time, meaning "from that time, afterwards" in his

^{1.} C. D. G. P. 294.

^{2.} Do 292.

^{3.} Do 293.

^{4.} K. G. P. 165.

grammar. But his dictionary does not give this expression at all. It is probable that this in (im) is an adverb, but used as a post-position in the instrumental case.

In the pl., the termination is affixed to the pluralising particle, as in the other cases:
-ā masc.

-e. vidyullate-gal-a.

There is one form, kiļļum (also of kiļļa) in kiļļum Nāgeņņan. kiļļum < kiļļa (of kiļļa)- um (also) probably.

The Locative Case.

The terminations are

-ul, -ula, -ulle, -ulle, -ol, -alli, -i, -ī, i-e and -ē The first form, i.e., -ul, -ula, -ulle, and -ulle are different forms of -ul. ul-a place, inside.

These -ul, -ulla, -ulle, -ulle, -ol are not used independently in these inscriptions or in N^{\cdot} K^{\cdot}

√ul-to be > ol-when it is conjugated. See "olar" under verbs).

-alli is an adverb of place and means "there". It is used independently in O.K., M.K. and N.K. to mean "in that place" when it is used here as a post-position.

-i and -ī, -e and -ē are the same in meaning and the lengthening of -i and -e to -ī and -ē is due to metrical necessity.

There is no principle governing the use of any of these endings. -ula is used only in the prose inscriptions. The rest are used in the verses. -ol is more often used before vowels. It is not possible to state which is the earliest of these endings. -ul seems to be earlier and -ol is a later development.

THE USE OF CASES.

The Nominative.

The nominative, as already stated, has no termination.

- I. The simple stem or the stem with the gender suffix in the case of those ending in -a is used as the subject of a verb to express the doer of the action, denoted by the verb or the participle (K. B. B. 74.) Subject of a verb:
- (a) The simple stem: Ņaṣṭappa goṇḍu koṭṭan (8-29); Pegurama Suralōka vibhūti eydidār (24).
- (b) The stem with suffix.—Candradēvācāry-yanāman nontu tan dēham ikki S'ivanile padedān (12-4).

Subject of a participle:

Carita s'rīnāma dheya prabhu ajnānas' ailēndramān poldu, Gandhebha maydān meṭṭi, saukhyasthan āydān. (14-1 ℓ 4). meṭṭi ℓ poldu express the action of -prabhu; the nom. denotes the doer of the action.

But the nom. in the case of *intransitive* verbs, expresses the agent whose circumstances or condition are indicated by the intransitive verb.

Verb: Carita ṣ'rīnāmadhēya prabhu saukhyasthan āydān. Here -prabhu is the nom. 'prabhu became happy.'

II. The gender suffix of the nom. is affixed only to adjectives ending in -a; such an adj. is in the nom. and qualifies the noun. in the nom. e.g. Carita s'rīnāmadhēyaprabhu.

Saukhyasthan āydān; Supaņditan, nītisampannan; andhan.

III. The nominative is also used as an adverb e.g., mēl, vol, when preceded by the simple stem or

the noun in the genitive, e.g., sikhimēl, bāļāmēl, manjuvol, teravol.

IV. The simple nominative denoting a period of time is used in an adverbial sense or in the sense of the locative: e.g., irppattondudivasam, īrelpattarulam, ondutingal, mūrutingal.

The Accusative.

The accusative expresses an object or person on which the action of the verb falls.

e.g., kaṭavapram ēriyē, svarggāgramān ēridār, meṭṭi gandhēbhamaydān, S'āsanama goṇḍu koṭṭaṇ

The stem, as already mentioned, takes the acc, ending after the gender suffix in the case of -a stems or after the glide -y- in -i and -e stems and -v in -u stems. The acc. termination is of a later origin. The copulative particle -um is added to case-endings in all the five cases excepting acc. where it comes between the stem and the suffix. (Here it is to be remembered that this -um is not added to the genitive). The acc. and the nom. seem to have been the same in form at first (SMD. 136). In these inscriptions, the endings -an, -an and -a are used in almost all forms of the acc. But this is most artificial. Even in N. K. colloquial speech, the acc. has no termination, e.g., Mane kattida 'he built a house. mane bidduhōyitu, 'the house collapsed.' The nom. is used, in these, but the meaning is accusative. Further, the use of the accusative without the case-ending before a verb has been treated as kriyasamāsa or verbal compound by the later grammarians. There is no necessity for such composition as the N.K. colloquial speech

amply testifies. e.g., mane cennāgi kaṭṭida. 'he built the house well.' tiṇḍi tuṁbā tiṁda. 'he ate too much of eatables.' In these cases, the adv. comes in between the object and the verb. Even here the obj. has no case termination. Further, the noun is used as the acc. without any change in the case of inanimate objects. e.g., hāvu hoḍeduhāku, "kill the snake" kallū takkō 'take the stone also,' kāl kaṭṭu- 'tie the feet'. Here we find no -ān, -an or -a of the acc. But in the case of animate beings, the case-endings are added. e.g., Rāmanna kare 'call Rāma.' Here -an and -a are used as gender suffix and case-termination respectively in the N.K. colloq. speech. But in these inscriptions also the following nom. forms are some of those used in the acc. sense:

S'ivanile padedan, Suralōka vibhūti eydidār. samādhi neredōn, ildāl manam. Even in ancient kāvyas, this use of Nom. for the acc. was common e.g., ellarum mātariyar, where matu 'words, speech'. is in the acc. though nom. in form.

The dative is used often in place of the acc.:-

svarggāgvamān ēridār and svaraggālayakke ēridār (Smd. 136). The acc. is used as the nom. in Kaļantūr-an-am (21-3) probably the -an-am may be a repetition of the -an-a suffix as in the inst. inb-in-in &°Vibhavasthanan.

The Instrumental.

The instrumental case is used to denote.:

(1) The instrument or the means or the manner: inbinin, guṇadim, bhaktiyim, yugmadin, S'īladim;

(This use of the instrumental may be treated as a kriyāvišēṣana).

- (2) a special mark or quality: tapadin adhikan.
 (3) association: e.g., anēka s'īlagunamāle gaļin
- and (3) association: e.g., anēka s'īlaguņamāle gaļin sagidu oppidon.

The case endings of the inst. are -im, in, -inda and -inde. But this instrumental case ending has become a general suffix of the dative, the gen. and the loc. e.g., baṭarimge (dat.), Kalvappinā (gen.) Kalvappinul (loc.)

The stems ending in -u and in consonants take this suffix. From a study of the medieval inscriptions, it is seen that the use of the -in- suffix in the dative, the gen. and the loc. are later and that the addition of the terminations direct to the stem was earlier. rupol and rupinol, bālol and bālinol. Further, even in an example of the instrumental, inb-in-in, -in is used as the suffix before the instr. ending -in-. This suggests that the use of -in- as a suffix had already begun in the 7th century. The dative kālanige shows that this -in was already in use in -a stems also. (See Dative case under "Nouns)."

The Dative.

The dative expresses—

(1) The person or place to whom or which something is given:

eraḍuṁnālke, kālanige, Kilgabaṭaṛiṁge, Dēvereyage, mālākārargge, Laṁjigēsaraṁdēvarke.

(2) The place or position towards which one moves:

naragakke salge, Svarggālayakke ēridār.

The dat, is sometimes used in place of the acc.

e.g., svarggālayakkēridār and svarggāgramānēridar,

N.B.—THERE IS NO ABLATIVE FORM.

The Genitive.

The genitive is used to express the relation (sambandha) of objects or persons:

Of Persons:—guruvadigaļā s'iṣya. mōni guruvara s'iṣya, tammadigala s'iṣyam.

Of Places :—Tarekāḍa, Namilūra, Malanūrā, Vāgūrā, Veļmāḍadā, saṃghadā.

of Objects:- kalapakada, bāļāmēl, modeya.

In Pr.K., the nom. was probably used in the gen. sense. In s'ikhimēl and kalvappabettammēl, the gen. termination is not used, but the nom. expresses the meaning of the genitive. This is quite common in N.K. colloq. speech. With reference to animate and inanimate beings and objects:—e.g., animate: Raman pustaka, Kamale pustaka.

inanimate: Nāyitalemēlinbutti. the bundle of foodstuffs on the head of the dog. Nāyi is the nom. form,

Nāyibāla neṭṭag $\mathbf{\tilde{a}}$ gōlla-" the tail of a dog never becomes straight."

objects: Manemele gube kutide. "The owl is sitting on the top of the house." Here mane is the nom. form.

Later grammarians explain this as sasthī tatpurusa compound. But this is explaining a Kanarese form in the light of the Skt. idiom.

Further, the oblique bases of the 1st pers. and of the reflexive pronoun are used in these inscriptions as forms in the genitive case:—

- (1) tan dēham ikki-sacrificing or abandoning his own body.
 - (2) āyuşyam en- the length of my life.

(3) nam Mauniyācāriyar-our guru, Mauniyācāriyar by name.

This use of pronominal oblique bases is found in Tamil also, e.g., en vīţu 'my house', en kācu 'my money.'

These lead us to conclude the nom. was used as the acc. (already stated above) and also as the gen.

The rules on Vibhakti pallata or the inter-change of cases in the later grammars state that the gen. stands for the nom. e.g., nrpanapēle. (S.M.D. 134). J.R.A.S. 1918 P. 105. This shows that the nom. and the gen. were interchangeable.

The Locative.

The loc. is used to denote the relation to a place, such as a mountain, a kingdom, or a holy place.

Kalvappinul, nadirāstraduļļe, parvataduļļe, pṛthivīrājyaduļa, vettaduļ, Vāraņāsivaduļ, Srīsamghaduļļe.

The locative is used in the sense of the instrumental e.g., S'rīsaṁghadā puṇyadī, where it means puṇyadiṁda, anēka àila guṇadi (58-1). There is reason to suspect that the loc. ending -i or -ī in puṇyadī is the instr. ending with the loss of the final nasal as in O.K. $\bar{u}\dot{m} > N.K. \bar{u}$.

The interchange of the locative and the instrumental and the use of the nom. as the locative (see nom. used as an adv.) and the use of so many terminations and post-positions in the locative clearly show that the locative is later in origin than the instrumental. In later grammars, even the dative and the genitive are used in place of the locative, e.g.

cāgigaloļ (loc) ballaham; cāgigaļa ballaham; mūrudivasakke bamdam to mean mūrudivasadoļ bandam. All these show that the loc, is a later development.

The Vocative.

The vocative is used to invite or direct the attention of the person addressed to one's self or to another person or object.

The examples in these inscriptions are bālē keļ-'Oh, girl!' listen." and Kaliýuga viparītā.

ADJECTIVES.

Adjectives in these inscriptions are words denoting quality or quantity. They are used to qualify nouns. They do not change in gender, number or case according to the gender, number or case of the nouns they qualify. Loan words from Skt. are used as adjectives; these take the gender suffix -an and -ār in the masculine, if they end in -a. Declinable participles, numerals and pronouns are used as adjs.

Adjs. are used attributively and predicatively. If the adjective is used attributively, the adj. precedes the noun it qualifies. In the predicative use, it comes after the noun it qualifies and agrees in number and gender with its substantive.

In N. K. the adj. used attributively remains unchanged, whatever the number, the gender or the case of the noun it qualifies. But, when used predicatively, it agrees with the substantive it qualifies in gender and number. The same distinction is preserved in colloquial speech also.

A. Native Kanarese Adjectives.

These are only four in number:-nal, per, vel, ininal-Good:- nal giri, nal tapa.

per- big, great:- per goravam: (with the suffix -cu per (< pel) is used as a verb: pelcuge 'may it increase.')

per before consonants is used as it is. e.g., perggoravam. But before a word or suffix with an initial vowel, per > pēr.* The only example is pēriyā-big (Fleet). But Rice reads it as periyā. This lengthening of the e in per before vowels is found in

Tamil also. e.g., pēr-āl, pēralagu, pēr-arivu, pēr-ilavu, pēr-inpam. Later Kan. Grammarians have noticed this point: (KBB. 138, KVV. 50; SMD. 180: KSS. 335 and 336). The reason for this change is unknown. Probably, pēr is the original Pr. Kan. form and per. the later development (cf. -ār & ar. nom. -ān and-an acc).

veļ 'white', Velgoļa, Velmādada. N.K. has bel and also bilupu.

ini-this .- initu (this much)

inibar (these, so many)

There is another OK. adj. ol, but it is not found as an adj. but in a noun oltu from ol 'good.'

nalta 'goodness' is a noun derived from the adj. nal, 'good', in Naltada.

B. Loan words from Skt.

Lws. are used as adjs. All these nouns except one, used as adjs., end in -a and that all of them except four, have the masc. gender suffix -an in the sg. and -ar or -ār in the pl., like the substantives in the nom. sg. and pl.

(a) with masc. gender suffix -an: adhikan, andhan, anavadyan, urusatvan, natasamyatātman, niravadyan, nītisampannan, pancamahāpātaka samyuktan, mahātavan, mahādēvan, munipungavan, vinayācāra-prabhāvan, srījinamārggan, sādhugaļpūjyamānan, siddhisthan, supaṇḍitan, saukhyasthan.

In Telugu¹. tatsama adjs. are generally nounsmeaning that they take the gender-suffix. The examples given in the Telugu grammar end in -a.

^{1.} Telugu Grammar by B. Pāpayya Sastry (1927) Page 42.

In N.K. when an adj. is used predicatively, the adj. comes after the noun and takes the pronominal termination of the gender and the number of the noun it qualifies. Here the following adjs. are used predicatively.

pancamahā patākasamyuktan, siddhisthan, suralōkamāhā vibhavasthanan, saukhyasthan.

In the other instances, they are presumably used attributively. The an and are suffixed to these loan words, perhaps, on the analogy of the usage in Skt. where adjs. take the gender and the number of the noun they qualify.

[There is one form, suralōka mahāvibhavasthanan, where -an is repeated twice, -an-an, as in the instrumental case of inbinin; the original -an may have lost its significance, and then, -an may have been added again. This is a solitary example.]

- (b) with pl. suffix -ar.
- -a stems : rāgadvēṣatamōmala vyapagatar, suddhātma-Sainyōddhakar, svabhāvasoundaryya karāngar.

-i. stem: paramaprabhāvarisiyar.

- (c) with pl. suffix- $\bar{a}r.$
- -a stems: aninditār, prathitār.

All these -ar and -ār forms are in the honorific plural.

- (d) Feminine. No examples.
- (e) Neuter.
- -a stem: sg. with suffix -d-: anēkaguņa-d-ā.

C. Declinable participles used as Adjs.

(a) Past Participles:

āda, enva, koṭṭa, konda, pēlda, podeda, māḍi-sdia, sanda.

(b) Future:

iruva, kedisuva.

There are no relative pronouns in Kanarese. To some of the relative participles, which are adjs. -an, -on and -om are suffixed when they are used as substantives in the masc. sg. and or in the pl.

masc sg. -an:

Nw. nilladan.

masc. sg. -on:

Nws. alivon, alidon, ettikolvõn, oppidon, kādõn, keyvon, salvon.

lw.: Pertvāṇavams' adon.

masc. sg. -om:

lw: pālisidom.

 $masc. pl. - \bar{o}r:$

Nws. alivõr, uṇvõr, kādōr, koḍuvôr, kolvor, nenevōr, palcidōr.

According to some, -on and om are essentially the same as -an and -am of the nom. sg.¹ (See under nom.) This -on is only a variant of -an according to Kittel.² Caldwell thinks that -an or -on is a contraction of avan.¹

K. V. Subbaiya ³ explains that the original -ān (3rd sg. termination masc. of verbs) has developed into -ōn through the labial final -m and he supports his statement from the pronunciation of Toda -ām as (2: M.)

According to later grammarians, O. K. final -a> -o and the examples given are āvam > āvom;

^{1.} C.D.G. p. 225.

^{2.} K.G. p. 47 "āvam appears also as āvom āvanam appears also as āvonam."

^{3.} DS. Part II, p. 34.

^{4.} SMD. 157.

nudidam>nudidom; pādidam>pādidom. Butāvam< āvavam, which naturally> āvom (ava>o).

Since these -on forms are found in the inscriptions of different and distant parts (so far made available), it is not possible to assume that the -an and the -on forms are dialectical variations.

The gradual decrease in the number of -on and the -or forms in the inscriptions and their replacement by -ar and -avar forms can be seen from the following list:—

keyvor	(I. Ant. X 61)	C. 700	A.D.

=			,-

The appearance of these -on and -or forms only up to the 11th century A.D. and that, too, with -on

and -or suffixed to declinable past or present participles only, leads us to assume the following:—

Pr.	Kan.	O.K.	M.K.	N.K.
1.*	-an	-an	-an-(u)	-an-u
2.*	avan	avan	avan (u)	avan-u
3.*	-avan	-on	-an	-an-u
			-an (-u)	

(1) Pr. Kan. *-an was O.K. -an, M.K. -an, N.K. -an.

This an is used throughout in all the different stages of the language: alidan, alidan, alidanu.

- (2) Similarly -avan is used: O.K. alipidavan, M.K. alihidavanu, N.K. alisidavanu.
- (3) But O. K. -avan was used as -on in the O.K. period. In M. K. it was replaced by -an, -anu (No. 1) in M.K. and in N. K. -anu is still in use (by old people.)

The pronoun avan is again used as gender suffix.

In colloquial N.K. speech, avan, avanu>-onu. In the case of pertvāṇavaṁśadon<pertvāṇavaṁś'ada+avan, it is an analogical formation.

Fem. No examples.

Neuter: -udu is suffixed to relative past participles in the Neuter to make them adjectival substantives.

ittodu, mikkudān.

In ittodu, -u->-o-. This change of u to o is fairly common. The following examples are from the Dictionaries:—

ul>ol to be uy>oy to carry kuy>koy to pluck

kuḍu>koḍu to give

kulime>kolime, the furnace of the black-smith.

pudi>pode to cover.

The following illustrations are from the inscriptions:

unbodu (19) E.C. III Sr. 134.

komārasēnabhaṭārar (13) E.C. III Sr. 147.

Kovaļāla-pura (3) E.C. IV K1. 51.

kuvalāla E.C. VII Sh. 24.

Belugulatírtthada (20) E.C. II, 334.

Belgola (M.K.) E.C. II 336 and 347.

Kuduvantaradar E.C. I, 39.

The conditions under which these Nws. and Lws. change the -u- to -o- are unknown. Probably this is a dialectical variation, depending on the openness of the u pronunciation.

In Capal-illā, Navilūrusamghada Mahanantāmatīgantiyār, capal-illā is an adj. or an adj. phrase. To say that capal-illā is used in place of capalillāda for the needs of metre is not satisfactory. Cf. il-i in bahuvrīhi compds.

nāṇili, Pallili.

il=not. SMD. 186.

kuli-killer < kul.

In Tamil, illā is used as an adj. illākkuḍi 'the poor family' illār, 'the poor,' illāmai 'poverty', where -mai is a suffix for forming abstract nouns.

kāṇāmun (before it has not been seen).

maramgal paruvattāl anrippalā 'trees do not produce fruit except in the season 'where -ā 'not' is at the end of pal-ā (T.H. Article 112).

In the same verse wherein capal-illā occurs, upamillā is used. All these point to the fact that illā was used as a negative adj. to mean 'not, not having.' So capal-illā-, not having temptations, firmminded.

In later kāvyas we find -il used as an adj.

Phalavadēnil 'there is no fruit (effect)'.

Kittel says that 'il is an unusual abbreviation of illa-no, is not; il-a defective verb of which only some forms of the negative mood are found'

In Kan. the negative suffix is -ā cf. veļeyāde āgā, āga, āgadu tappāde. This -ā is suffixed to the defective vb. il. Hence illā -no, not, as in T.

In kare-il, we have the same adj. phrase implying 'stainless.' Thus we see il and illā used as adjs. in these inscriptions.

D. Declinable past or future participles of the verb "to be" suffixed to substantives or verbal participles:

- (a) Declinable future participle. appa from √agu- to become.
- (1) anupamadivya². -(m)- appadu- Here appa is suffixed to the substantive anupamadivya. anupamadivyamappa is an adj. adu is added to make this an adj. with two adjectival suffixes; adu, (neuter 3rd pronoun), when suffixed to a substantive, makes it an adj.³
- (2) Instead of āda, āgi (having become) together with the decl. pp. of ir to be, is used.

bhadramāgi i (d) da — that was strong, well-established.

This usage is still very common in N.K.

^{1.} KSS. 584.

^{2.} Rice has inserted this -m.

^{3.} C.D.G, p. 290.

(3) iruva - declinable future participle of iru-to be.

pūni-past verbal participle + iruva-puni-iruva-that have promised.

This usage also is still very common in N.K.

(b) Declinable past participle:—
-āda<āgu - to become

This -da is put after a verbal past participle: neredu (pp. of nere-to become perfect or full) āda-neredā-that had become perfect.

E. Numeral Adjectives.

(a) Numerals are placed before substantives and as adjectives:—

irppatondu divasam, īre*l*patta*r*uļam, eraḍum nālke, omdu tingaļ, omdu sanmāraggadin, nu*r*eṇṭu samvatsaram, pattupona, pañcamahāpātakasam yuktan, mū*r*utingaļ, mū*r*udegulamān, mūvetmūrādēvejanam, sāsirakavileyum.

(b) The ordinal, formed from the cardinal by suffixing -aneya, is used as an adj. in only one example: ēlaneya (seventh) from ēlu-seven.

-aneya < ane-a < an-to say.?

aneya 'when it says.' Kittel's¹ remark that the -a of -aneya is the gen. case-termination and also the termination suffixed to verbal participles to convert them to relative participles is not very clear.

F. Skt. loan words in the nom. are used as adjectives e.g.

(1) amalam naltada s'īladim. amalam adj. qualifies Śīladim ofter naltada, but the -am of amalam is retained probably for metrical length.

^{1.} K.G. p. 169 Remark 2.

- (2) In sādhugaļ pūjyamānan, the pluralising particle -gaļ is retained in the compd. for metrical length, though Sādhusampūjya would have been quite suitable there.
- (3) In 'suravidyāvallabhēndrāssuravara munibhistutya kalbappināmēl' the nom. pl. termination in 'vallabhēndrās' and the instrumental termination in 'suravara munibhih' are retained to qualify 'stutykalbappināmēl.' This is not usual and shows that the grammatical usages were subordinated to the needs of metre by those steeped in Skt. learning.

G. Substantives are used as adjs.

'arddha-visadi and muninvrataga! - in these, arddha-, muni- are substantives used as adjs. This is effected by placing the substantive before the one which it is to qualify. Caldwell has pointed out that any substantive denoting quality or relation can be used as an adj. by being placed before another substantive - i.e., by mere position alone. Such a usage is even now very common in colloquial Kanarese. e.g., maradimbu - a wooden pillow.'

In some places, the adjectives are placed not immediately before the substantive they qualify, but before another substantive which comes in between the adj. and the substantive qualified by the adj. The two -adj. and subst.- are real adjectival phrases:

- (1) amita s'rī Samghadā puņyadī.
- (2) capal-illā-Navilūra samghada Mahānantā-matlgantiyār.
- In (1) "amita" qualifies "puṇyadī "-unlimited puṇya, and not unlimited s'rīsaṃgha.

^{1,} C.D.G. p. 309,

In (2) capal-illā refers to "Mahānantāmatīgantiyār, and not to Navilūrasaṃghada.

The word that intrudes between the adj. and the substantive is a noun in the genitive case in both the examples. It is clear that these unusual forms are due to the needs of metre.

H. Pronominal Adjectives.

(See p. 178-179.)

Predicative use of adjectives.

As already stated, the adj. comes after the noun when used predicatively and then it agrees with the substantive in gender and number.

pañcamahāpātakasamyuktan, Siddhisthan, suralōka mahāvibhavasthanan, saukhyasthan.

This usage is still very common in literary composition and colloquial speech.

Later grammarians say that cases like the following are compounds:—

kare-il naltapa dharmmadā, nalgiri.

Here there is no Samāsabhāva or ēkārthībhāva. There is no necessity to assume these to be compounds, as these adjs. even when placed apart, give the same meaning.

PRONOUNS.

Personal, reflexive, demonstrative and interrogative pronouns are found.

All these are declined in the same way as nouns and have the same case-terminations in the sg. and the pl.

The pronouns of the first and the second person and the reflexive pronouns do not change for gender, their gender being the same as that of the nouns in place of which they are used. The oblique bases of these are not the same as the nom. in form. The oblique bases of the first person and the reflexive pronoun are used as pronouns in the gen. case.

The pronoun of the third person is the same as for the remote demonstrative pronoun.

The demonstrative pronouns have different forms in the masc. and the neuter. There is no example for feminine.

Only the masc. pl. and the neuter nom. sg. of the interrogative pronoun are found.

A. Personal pronouns.

A. The first person--

	sg.	pl.
nom.	ān	-
dat.	${f enage}$	namage
gen.		emma, nam mā ,
		nam.

In the sg. both the examples have -n: ān, enage; in the pl. all the examples have -m-; namage, emma, nam, nammā. The oblique base in the sg. is en-and in the pl. it is em. The terminations of verbs is -en in the sg. and -em in the pl.

^{1.} KBB. 94. ದ್ಬಿಬಹ್ಫ್ರೋರ್ನನ್ಯಮಃ.

The Nom. sg. is an, with an initial long back vowel, but the dative has a short palatal vowel.

There is an initial n- in the dative and the genor of the pronoun of the 1st person in the plural: namage, nammā and nam. The origin of this n- is unknown. K. V. Subbaiya¹ and Caldwell tried to explain the origin of this n-. They are not satisfactory. The explanation of the prothetic n is introduced by L. V. R. Iyer.² But the commentator on KSS.³ says that a few famous poets of the Nothern⁴ School of Kanarese accept nan- and nam- as the oblique base of the 1st person, while the southern school is in favour of en, only. cf. Tel. nēnu- I. This shows that nan is a dialectical variation of en, and that en of the Southern School, which has correspondences in other languages is the earlier of the two.

The earliest Kan. Grammarian Nagavarma ⁵ States that en, nin, tan, become ān, nīn and tān in the nom. The reason for this differentiation is unknown at present.

I think that an is the Pr. Kan. base of the first person and that it is the emphatic form, as the nominatives of pronouns are rarely used in colloquial speech except it be for emphasis.

The dative sg. is enage and the pl. is Namage. The reason for the use of n- in the pl. form, namage, is not known at present. In NK., we have nanage in

^{1.} Dravidic studies Part II p. 21; CDG. pp. 364-370.

^{2.} I. Ant. 1929.

^{3.} KSS. p. 263 Commentary on S. 288.

^{4.} KVV. III. 1, KRM, II. 51-55 and 101-108 KC. II, Introdr. p. 16 and p. 27.

^{5.} KBB 92; KVV. 36, SMD. 146, KSS, 287, 288,

the sg. and namage in the pl.; in colloquial speech, it is namige and namage.

B. The second person.

There are only two forms and those too in the nom.

We have no examples of the other cases.

C. The third person.

As already stated, demonstrative pronouns implying remoteness are used as pronouns of the third person (see "Demonstrative pronouns").

The examples are:

sg.	pl.
-	avar.
-	avar-ā.
no exam	ples
sg.	pl.
adu	-
adār	ı, ada
adar	ke, adakke -
	- no exam sg. adu adār

The reflexive pronoun.

The examples are:

	sg.	pl.
nom.	tān.	${f tar am}$
dat.	${f tana}{f ge}$	tamage
gen.	tan.	-

As in the pronouns of the first person, the nom. sg. and pl. have the long vowel -ā- and the dative and the gen. have a short -a-. The sg. has -n- and -n- and the pl. has -m and -m-, like the pronouns of the 1st and the 2nd persons.

The dative sg. and pl. of the 1st and the 2nd person and of the reflexive pronoun have -a- before the case-ending. -ge is the dative ending of the nouns. This -a- between the base and the ending may have been -an- originally and later -a- as -in-> -i- in Kālanige (see "The Dative Case") <kālan-imge. But nanamge and tanange are not found either in the inscriptions or kāvyas. In N. K. the dative forms are namge and tanage in colloquial speech < nanage and tanage respectively - the literary forms.

The oblique bases of the pronoun of the 1st person and the reflexive pronoun are used as pronouns in the gen. case.

1st. pr. nam mauniyācāriyar Ref. pr. tan dēhamikki.

The Demonstrative Pronouns.

Remote and proximate demonstrative pronouns are found. As already stated, these have two genders.

(a) The remote demonstrative pronoun:

		sg.	pl.
masc.	nom.	-	avar
	gen.	-	avar-ā
fem.	No. ex	amples.	
Neuter	nom.		adu
	acc.		adān, ada
	dat.		adarkke. adakke.
(b) Th	e proxim	ate demon	strative pronoun:

Masc. nom. ivan

honorific sg. Ita SMD, 150 < idu.

SMD. 150 <idu. / KBB. 97 ద్రభాగ్ర్త్రాయ్యక్స్త Fem. no examples.

Neuter. nom. idu no examples

acc. idān, idam dat. idake

loc. idaruļ.

peran and pelan 'another' is a demonstrative in the nom. sg. where an is the masc. gend. suffix. The stem is pera < pela (cf poragu, adv.) This is not in use in N.K., but is replaced by horaginava. (SMD. 152).

ellamān is a pronoun meaning all (together. (SMD. 151.) This is acc. sg. with the conjunctive particle -ain. (See the "Use of Cases" for the appearance of the conjunctive particle between the stem and the case-termination.) This is in use in N.K. as ellā and ella.

initu (inisu) 'a little', 'this much.' This is used as a dem. pronoun denoting quantity.

The Interrogative Pronouns.

There are two forms in the pl.

masc. nom. ār-um

dat. ārgg-am

neut nom. ēn. (SMD 112.)

-um and -am are conjunctions (see Conjunctions.)

In N.K. we have yāru for O.K. ār.

The neuter nom. sg. is en 'what' (61-9).

There is no relative pronoun in old Kanarese.— The declinable participle is used in a way. alid-on narakakke salge, 'may he who destroys go to hell.' But about the 10th Century the use of the interrogative pronoun with the demonstrative pronoun as Skt. yat, tat is found.

- 1. "s'rī purusa mahārājana dattiyanāvanorbanalidom Bāṇarāsiyum sāsirbbar Brāhmaṇarum sāsirakavileyuman alida pañcamahāpātakan akkum.
- 2. idanārorbba kādar avargge piridu punyam (ll-15-17). E.C. I. 74 (910 A.D.)

In the first sentence, avon 'whoever' and in the second arorbba 'whoever.' The combination of the inter. and the demon. to express this type of meaning is very common in colloquial N.K.

The personal terminations of verbs found in these inscriptions are:

en- is the oblique base of the first person. The 3rd neuter pl. is avu. This is the Neuter pl. termination of verbs.

Pronominal Adjectives.

The demonstrative $\bar{\imath}$ and \bar{a} are the pronominal adjs. found.

ī and ā precede the nouns they qualify and do not change for number and gender.

ī-this (or these) and ā-that (or those).

ī: īdharaṇiyuḷ, īnittadharmmamān, īparvataduḷḷe, īpujyāsthalamān, ībhavavit, īmariyādeyan, īmūvetmūrādēvejanam.

ā: ā Kaļamtūranam.

Later grammarians 1 state that ī and ā are the pronouns that are substituted for idu and adu respectively. The ā and ī are different words having

^{1.} SMD. 78 and 138.

the same meaning and derived from the same pronominal base (from iv- av-). The Pr. Kan. pronominal base of these are at present unknown, though Tol kappiyam says that they are av- and iv-.

Numerals.

Numerals are declined as Neuter Nouns; appellative nouns of Number in the masc. gender are formed by suffixing -vv- an in the sg. and -vv- ar in the pl. to the short forms of Numerals.

Numerals are also used as adjectives by prefixing the Numeral to the Noun it qualifies. The Numerals, so prefixed, change the nature of their vowels and become short in form.

Compound numbers are formed by multiplication and addition: Multiplication, when ten or a hundred is the second member of the compound; addition when any one of the Numerals from one to nine is the second member. Hence the numeral system is decimal.

There is no native word for one thousand. sāsira. is a lw. from Skt.

The following numerals are found:—

nws: omdu (1) eradu (2), mūru (3), aydu (5) ēlu, (7) entu (8) pattu (10) irppattu (20) elpattu (70), nūr (100).

lws. pañca- (5), dvādas'ada (12), Sāsira (1000). nws. irppatthondu (21), mūvettumūrā (33), nūreņţu (108), īrelpattu (140), ēlnūr (700).

The origin of the Kan. numerals is unknown at present.² They are very nearly the same as those in Tamil, Malayalam, Telugu and Tulu.

^{1.} Dr. avidic Studies Part I. Page 3. This is a criticism of Caldwells' theory (C.D.G.) p. 422.

^{2.} Kittel, 1. Ant. II, p. 24; CDG. p. 331-343.

The numerals from one to ten excepting $m\bar{u}ru$, $\bar{a}ru$ and $\bar{e}l$ have the suffix -tu, -du or -du in the end. These are but various forms of -tu; this is a very common neuter noun formative. cf. oltu (see Adjectives). Even in $m\bar{u}ru$, $\bar{a}ru$, $\bar{e}l$, -r- is derived from Prn. Dr. * t-; and -l- is, in O. Kan. derived from -d-.

In their shortened form, ondu is found as $\bar{o}r$ eradu as ir; $\bar{n}\bar{u}ru$ as $m\bar{u}$; $\bar{a}ru$ as ar; $\bar{e}l$ as el.

Compound Numbers.

As already stated, compound numbers are formed by multiplication and addition:

1. *Multiplication*: When ten or hundred is the Second Member of the compound:

ir pattu (2×10) 'twenty' mū vettu (3×10) 'thirty' $\bar{e}l n\bar{u}r (7 \times 100)$ 'seven hund

 $\bar{e}l \, n\bar{u}r \, (7 \times 100)$ 'seven hundred'.

2. Addition: When any one of the numerals from one to nine is to be added to multiples of ten:

irppattondu - (20+1) mūvettumūru - (30+3) nūreņţu - (100+8).

There is no native word for a thousand: Sāsira, from Skt. Sahasra, is used.

The following show the numerals, referred to above, used as adjectives:

nws. irppattondu divasain, īrēlpatt-aruļam, oindutingaļ, ōrsiddhiyān, nūreņṭu-sainvatsarain, pattupona, mūrutingaļ, mūru-dēgulamān, mūvettumūrā dēvejanain, mūvetmūra mīselmideyum.

lws. pañcamahāpātakan, sāsira-kavileyam.

^{1.} CDG. p. 333.

In oindutingal and oindusanmärgadin, ondu, the Neuter noun, is used as the Numeral adjective, being prefixed to another noun. In orumuniyimdal and orsiddhiyan, oru and or have been used as adjective forms of oindu. Or has been pointed out above as the root from which oindu is derived. In the remaining cases, the neuter nouns, nūrenţu, pattu, mūru-, mūvettumūru, are used as adjectives by prefixing them to nouns they are to qualify. In mūvettumūrā-mūvettu-39. But in mūvetmūra we have only mūvet-denoting 30. The latter is the colloquial form in N.K.

Caldwell¹ is right in thinking that the numeral adjectives which are employed in compound numbers exhibit the numerals "in their briefest, purest and most ancient shape."

Appellative Nouns of Number.

The following appellative nouns of number are found:

Nws. ēlnūrvvaram, orvvan, ōrvvan,

lw. sāsirvvar.

As already stated above, these appellative nouns of number in the mass. gender are formed by the affixing of -an in sg. and -ar in the plural, to the adj. forms of these numerals, with the suffix -vv- in between the numeral adj. and the -an or -ar.

sg. or-vv-an=one man. or-vv-an=one man.

The lack of differentiation between short and long vowels is sometimes responsible for the appearance of these two forms. Pl: nw. ēlnūr-vv-ar-am (acc.)

^{1.} CDG. p. 322.

=ēlnūrvvaram- the 700 people. lw. sāsir-vv-ar = sāsirvvar (one thousand people.)

Ordinal Numeral (Adj.)

-el-seven, has its ordinal form ēlaneya.

This -aneya does not change for gender. The origin of this -aneya is discussed under "Numeral Adjectives."

Derivative Nouns.

In these inscriptions, a few nouns are formed from verbal roots and nouns, by the addition of Suffixes. These derivative nouns are declined as all the other primary nouns (see 'formation of nominal stems' under 'Nouns').

A. Nouns from Verbal Roots.

A list of such derivatives is given under "Verbal Derivatives" under 'Verbs.'

B. Nouns formed from Other Nouns.

These Nouns are derived from primary nouns to denote residence in a place, the trade or occupation to which a person has devoted himself, the sex of the person, and the possession of something by a person.

The suffixes are added to Nws. and lws. alike:

(a) Nws:

masc. suffix -an: Kaļantūr-an-am (him of Kaļan tūr.)

-an, added to -a stems, (See 'Declension of Nouns') -an is suffixed to the name of a place ending

in a consonant to denote a man of the place; cf T. $\bar{\mathbf{u}}r$ - $\bar{\mathbf{a}}n$. Tel. $\bar{\mathbf{u}}r$ - $\bar{\mathbf{a}}$ vādu.

- (b) Lws: masc.
- (a) Kan. suffix: 1 adi. used in the sense of an attendant. dāsadi 'an attendant of the dāsas, a head of the guild of dāsas.' dēvadi 'an attendant on the idol in the temple 'A priest. Cf. T. adi yēn 'I, your slave.'
 - (b) Skt. suffixes:

masc. -ara. This is a contraction of aara < $-k\bar{a}ra$.

kammara < karmakāra.-a blacksmith, T, kam-mārar-sailors.

kammar-ar-a 'of the blacksmiths'. This is a lw-iga, -ka in Skt, used in the sense of 'born of' Raivatika, the son of Rēvati. This seems to be analogical formation. Gāmiga.

 $-k\bar{a}ra$, Skt, 'maker' mālā kārargge 'to the garland-makers,' cf T, Vēlaikkāran-a worker.

-vanta, Skt. 'the possessor' -Lakṣaṇavantar: those who possessed or had the knowledge of the Symptoms or the Signs

T, pākkiyavantan and pākkiyavān from Skt.

bhāghyavān, bhāgyavanta,

Fem.

Skt. suffixes: -

-i naygir < nāyaki-y-ar, masc, nāyaka - cf. T. tiruți 'a woman thief.'

-itti woman, pkt. itthī<Skt. strī; dēveditti-yar 'priestess'. siṣ-itti-yar 'women disciples,' cf, T, pārpanatti 'a brahmin woman,' and S'akkalitti 'a rival wife,'

Composition.

Declinable stems of lws. are compounded with one another. These compounds are treated as simple stems in declension.

Skt. compounds are more numerous in these inscriptions.

Nws. and lws. are compounded often; except in titles, such compounds are forbidden by later grammarians, So called Kan. Compounds are not so long as Skt. ones.

The first member of a compound is either a substantive, an adj, or a numeral. The second is a substantive, or a numeral.

The suffixes and the case-endings of the first member disappear in composition; but these are retained in a few instances.

A compound, like a simple word, becomes a member in another compound. The suffix or case-ending of the compound, as that of the noun, indicates its number and gender.

A compound may be a noun, an adj. or an adv. according to its meaning and the context.

A. Composition of Skt. lws.

akṣayakīrtti, akṣimaṇakkeramya Sura lokasu-kkakke, anupamadivya appadu, anēkaguṇadā, anēkaguṇasīladi, anēka s'īlaguṇamāle gaļin, apunarbhavakke, arddhavīsadi, Âjigaṇadā, ātmavas'-akramavu, ārādhanayōgadin, Indranandi ācāryyan, upamīllāsuralōkasaukhyada, Urusattvan, urami-thyātva pramūḍhasthirataranṛpanān, Kaṭavapra s'ailama, Kadambamaṇḍalaman, kanyādāna, gaticēṣṭā viraham, giritaladā, Guṇasāgarādvitīya nāmadhēyan,

Candradēvācharyyanāman, Carita s'rīnāmadhēya Citravāhanar, Jinamārggan, prabhu, Jaina Sanmārggaduļļē, tapaccale, tīradānamā, tīrtthagitumgoccabhaktivas'adim, daksinabhagada, duritābhūdvrsamān, dēvadaņdadinda, dēvalokakke, dvādas' adā, dharmmagaranigarum, natasamyatātman, nadirāstradulļe, Nandisēnapravaramunivaran, namocintayduse mantraman, nittadharmmamān, niravadyan, nītisampannan, pañcamahāpātakan, pañcamahāpātaka samyuktan, paramakalyānabhāgigal, paramaprabhāvarisiyar, paramārttham, pāśupatamari yādeyan, Puspasēnācāri, pūrvvamariyādeyā, pṛthivīvallabhaMam gaļīsanā, pṛthivīrājyaduļa, prāsādāntaramān, Bhadravāhu saCandraguptamunīndra yugmadin, mahagiri, mahajanakke, mahatavan, mahātavada, mahādantāgraduļ, mahādēvan, Mahādēviyar, mahāparūtaduļ, Māsēnar, munipumgavan, Mēghaņandimuni Mauniyācariyar, rāgadvēsatamomala vyapagatar, rājadaņdadinda, rājas' rāvitam, risigiris' ile mēl, Lanjigēsaramdēvarke, vicitrakanaka prajvalyadin, vidyullategaļa, vidrumādharaŚ āntisēnamunīs' an, vidhānamukhadin, vinayacāra prabhāvan, Vinayadēvasēnanāmamahāmuni, Vis' ōkabhatārara, vṛṣabha nandīmuni, S'uddhātmasam yöddhakar, s'rīpūrānvaya Gandhavarmman, s'rīrūpalīlādhana vibhavamahārās' igaļ, S'rivijayādityasatyas'raya, Srīvinayaditya rājā s'raya, S'risamgamgala, saddhammadā, sanmārg-gadim, Sanyāsanam yōgadim, sanyāsanavidhi, sarppa cūļāmani, Sarvvajnabhattārakar, Sarvvaparihāram, Sarvvabādhāparihāram, Siddhasamayan, Supanditan, s'ubhāmgade, suracāpambole, suralokamahāvibhavasthanan, surēndrarājyavibhuti, sthitadēhākamalopa mānga s'ubhamum, svabhāvasaundaryyakarāngar, Svarggāgramān, svarggālayakke, svādhyāyasampattinim.

B. COMPOSITION OF LWS. AND NWS.

These compounds do not differ from those of Skt. lws. except in having Nws. either as the first or the second Member.

Āneseţi, Ugrasēnaguruvaḍigaļ, udita s' rīkalbappinuļļē, Ŗsabhasēnaguruvaḍigaļ, Kalāvirgguruvaḍigaļ, Kilgāndēvake, Kilgānēs' varadā, Kilgabaṭaringe, gandhebhamaydān, guruvaḍigaļ, Dēvereya, Dēvakhantiyar, Dharmma Sēnaguruvaḍigaļ, Namilūrvvarasanghada, Namilūrsanghada, Nāgasēnaguruvaḍigaļ, Nṛpamariar, Paṭṭiniguruvaḍigaļ, perggoravam, Bāladēvaguruvaḍigaļ, mṛtyuvaravān, Maḷḷagavāsaguruvar, Moniguruvaḍigaļa, vipulas' rīkaṭavapranalgiriya, Veṭṭeḍeguruvaḍigaļ māṇākkar, Vrata s'īlanōnpiguṇadin, s'ubhānvita S'rīnamilūra, Sinigaṇandiguruvaḍigaļ.

It is true that, in the list of words given, there are real compound words: Āneseṭi, Dharmasēna-guruvaḍigaļ and words of this type, nṛpamariyar; (even guruvaḍi is not a compound.)

But Kilgānadēvake, Kilgānēs' varadā, Kilgabaṭaringe, Namilūrvvarasamghadā, Namilūr samghadā, are not compounds at all. As stated under the nom and the gen. in the section on the use of Cases, the nom. can be used and is used to denote the gen. In the examples cited above, Kilgāna, Kilga, Namilūr are names of places. To place such proper names before another substantive, without treating the two as constituting a compound is quite the normal usage in the ancient kāvyas and in N. K. colloquial speech. Of course the meaning, e.g., in Kilgabaṭaringe is 'to the baṭar of kilga', as Bengaļūru huduga 'the Bangalore boy' is used in colloquial speech in Kanarese. Here Bengaļūru huduga is not a compound, but only

a substantive used as an adj. Hence this type of word groups cannot be considered as compounds.

Nor can we treat 'perggoravam' as a compound as later grammarians do. As pointed out under Adjectives, per is an adj. meaning 'big, great' 'The great teacher' in English is not a compound, nor is per-ggoravam. kalmane, 'a stone house' is not a compound. It is only kal (substantive) and mane (a substantive) kalmane—a stone house of. kalgāņa.

The peculiarity of some compounds as the following is that a native Kan. word is incorporated in the compound:—Dev-ereya, guruv-adigal. s'rīkaṭavapranalgiriya, vrata s'īla-nōnpiguṇadim.

The following word groups are nouns in apposition with nouns or the preceding ones are adjs. It is wrong to call them compounds:—

Adeyarenāḍu 'Adeyare kingdom.'
Āluarasar 'Alu kings.'
Eḍevolal nāḍu 'Eḍevolal Kingdom'
Polikēsi arasar 'King Polkesi'.

Later grammarians have given the name of compounds to such word groups.

Numerals in Compounds.

Groups with numerals, either as the first or the second member of a word group, are called compounds.

1. Numeral as first Member: irppattondu divasam, īrelpattu aruļam, ondutimgaļ, nūreņṭu samvatsaram, pattu pona, mūrutimgaļ.

As already discussed under Numerals, the first member or the numeral is only an adj. which does not change for gender, number or case of the noun it qualifies attributively as in these examples.

2. Numerals as second Member: gandhēbha-maydān, aydu may be treated as a Numeral used

predicatively and the acc. ending is suffixed to aydu. This usage is common in N. K. mane mūranna kaṭṭisida, 'he built three houses'. Here mane is the object, but mūru 'three' has the acc. ending, though mane is an inanimate object and as such no case-ending is necessary. As mūru is used predicatively, this -anna is suffixed to the numeral. There is no change in the meaning whether aydu comes before or after gandhēbham. Though later grammarians call this so, this is not a compound.

3. Composition of numerals with numerals:—
To express a Number meaning more than ten, as stated under "Numerals," numbers, one to ten, are added to multiples of ten; to denote multiples of ten, numbers two to nine, are prefixed to ten; the numerals that precede ten in the latter are not the same in form as the ordinary numerals except in 4 and 5 in the following examples.—

D. Α. В. C. $\dots 2 \times 10$ "20**"** 1. ir pattu two tens "21" 2. ir pattu ondu $2 \times 10 + 1$ two tens one $\bar{i}r$ el pattu ... $2 \times 7 \times 10^{"}140"$ 3. two seven tens ... 7×100 4. $\bar{\mathbf{e}}l$ $n\bar{\mathbf{u}}r$ "700" 7 hundreds 100+8 "108"One hundred and 8 5. nür entu "30" mūru pattu 3×10 three tens 6. "33" mūvettu mūru. 30+3 7. three tens three

Even these are not compounds, in spite of the later grammarians calling these gamakasamāsas¹ (Impulse compounds according to Kittel). The meanings of these are given in the margin against them. There also, two, three, seven are numerals used as adjectives and in the case of 21, 108 and 33 the

^{1.} S MD. 168, KSS. 294. There is no Gamaka Samasa in KVV and KBB. Compounds in Kannada Grammars increase in number gradually, e.g. SMD 174, 193.

conventional meaning as in 11, 12, 13 are given by usage. These are no compounds.

Nouns 'compounded' with Verbs or Participles.

Examples:— sg. pl.

(a) Verbs: s.'ivanile padedān kālamkeydar nelekondan prasādamkeydār samādhi neredon odagaundar

samādhikuḍidom

(b) Participles:

Transitive: arcikeyye, as'anādiviṭṭu, ārādhane nōntu, eḍeviḍiyal, pṛithivīrājyam keye, pāvu muṭṭidon, pujedandu, besageyvalli, muninvratagaļ nōntu, mudimegeye, rājyapravarttanam keye, sanyāsanam geydu.

Intransitive.—bhadramāgi, mukhamāge, rāja S'rāvitamāge.

*In all these examples, the verb or participle has the substantive, either in the acc. or the nom. before it. If it is in the nom. naturally that is the subject of the verb or the participle following it. If it is in the acc. the substantive is the object of the verb or the participle. As shown under the 'use of cases', the nom. is used as the acc. (without the acc. termination) in a sentence, in O. K. as well as in N. K. (literary and colloquial). To call these kriyāsamasas or verbal compounds is wrong. These are used together so long that they have acquired some fixity in the language. In reply to the objection that k-, c-, t-, p- of the verb is voiced in these word groups and hence these must be compounds, it may be said that, in Kanarese and other Dravidian languages, intervocalic surds become sonants.

In the word groups given above, there is an anusvāra before the verb or the participle, e.g. in kālam

keydar, prasādam keydar; this -m is the usual anusvāra found in Skt. lws. in the nominative. See "The Nominative Case" under "Nouns."

In the following examples of Skt. compds. the terminations of the lw. are retained for the needs of metre:—

- suravidya vallabhēndrās suravara munibhi stutya kalbappināmēl;
 - sādhugaļ pūjyamānan ;
 - 3. tapam Samyamamān.

But a Skt. compound is split up and the dative termination is retained for the needs of metre:

aksimanakke ramya suralōka sukakke.

Such instances are very rare.

cf. skt. Dhanamjaya, adj. "winning booty." used as a proper name;

Vācaspati M. lord of speech; a proper name. Yudhiṣṭhira M, firm in battle; a proper name.

VERBS.

Transitive, intransitive and causative verbs are found. There are three tenses—past, present and future; three persons and two numbers. In the first and the second persons, there is no distinction of gender. In the third person, the three genders are distinguished. There are five moods—the indicative, the imperative, the optative, the infinitive and the negative. There are two voices—active and passive.

Causative Verbs.

There are two types of causative verbs:

- I. Those formed by the addition of the suffix--ppu--to the verbal root:—
 - muḍi-pp-i-dār—caused to come to an end.
 from mudi—to end, to come to an end
 (intransitive). This is the only example.
 cf. T. Causative. varu-vi-pp-en—will cause
 to come; paḍipp-i-ppēn;

Te. Vidipiñcu—to cause to be released.

II. Those formed by suffixing-isu to rts, be they transitive or intransitive:

This -isu is suffixed to Skt. verbal roots and noune to convert them into causative verbal roots in Kan.

(a) -isu added to trans. rts.

bidisidar from bidisu from bidu 'to release,' mādisida 'caused to be made' from mādisu from mādu 'to do'.

These roots end in -u and -isu is added to the final consonant of the rt.

(b) -isu added to intrans. rt.

nirisidom 'caused to stand' from nirisu from nil 'to stand'.

(c) -isu suffixed to Skt. rts.:

sādhisidom from sādhisu from sādh+isu 'to accomplish'; pālisidom 'be caused to be protected' from pālisu from pāl- 'to protect'.

Later grammarians state that Skt. rts. are adopted into Kan. by suffixing -isu to the Skt. verbal rts. But these roots with -isu were originally causatives and later on acquired the meaning they now have. Otherwise, there was no necessity for the use of -isu in these roots, taken from Skt.

(d) -isu suffixed to Skt. Noun.

lekkisu 'to reckon 'from lēkhā 'to write'.

Even in this case, isu had a causative significance in the beginning and later on became a simple root. If these were not causatives, the reason for forbidding the formation of causatives from these -isu roots is inexplicable.

Tenses.

Verbs in these inscriptions, with very few exceptions, can be analysed into three distinct parts:—

1. the verbal root; 2. the tense suffix; and 3. the pronominal termination.

The tense-infix shows the tense of the verb, while the pronominal termination points out whether the verb is in the 1st, 2nd, or 3rd person.

There are three tense-suffixes, -da-, for the past, -utta- (-uta-) for the present. and -m-, -v-, and -pp-for the future. The rt.+the tense suffix=the adverbial participle. The pronominal terminations which indicate the number and the gender of the subject of the verb are added to the rt. with the tense-suffix or the adv. participle to get a fully conjugated verb.

^{1.} KG. p. 90. Sect. 150.

Participles.

These are formed by the addition of the tensesuffix to the roots. There are two kinds of participlesthe adverbial and the declinable. There are past, present and future adv. participles; and declinable participles in the past and the future in these inscriptions.

The past Adverbial Participle.

The past adverbial and declinable participles are formed in the same way, except in the case of rts. ending in -u when the declinable participles of these roots in -u are formed by the addition of -da to the adverbial praticiple. e.g. ērida, eydi-da.

There are two kinds of suffixes added to the roots to convert them into adv. participle: -i and -du (-tu).

- I. -i used to form adv. participles.
- (a) -i is suffixed to rts. of two syllables ending in -u when the penultimate vowel is long by nature or position:—

āgi, ikki, erti, ēri, eydi, kūḍi, tōri, pōgi, māḍi, meṭṭi.

(b) -i suffixed to causative roots: mudippi, salisi, sādhisi.

The origin of -i is at present unknown. But Caldwell's¹ suggestion that -i is derived from ī — to give, (T. ī—to give; Te. iccu, K. īsu from ī + isu), seems to be reasonable in the light of modern colloquial usages in Tel. and Kan. (Te. pōnī—let it go; K: pōgalīsa—he won't let me go). But Kittel's euphonic explanation is not satisfactory.²

^{1.} C.D.G. p. 462.

^{2.} KG. p. 104, Sect. 168.

- II. -du (tu) to form adv. participles.
- (a) In principle -du is the suffix added to roots ending in -ā, -i and -e and also rts. ending in consonants -n, -y, -l, -l, preceded by a short vowel:
 - -ā kā-du.
 - -i ari-du.
 - -e kore-du tore-du, nade-du, nere-du.
 - -n en-du.
 - -y key-du.
 - -l agal-du,
 - -l adal-du. il-du, pol-du.

In these adv. participles, the rts. have not undergone any change.

(b) -du suffixed to roots ending in -l.

Kondu from kol+du.<kol 'to kill'

Sandu from sal+du<sal (to go. to become manifest.')

Later grammarians state that -l of kol and sal> -n in front of a consonantal suffix and the examples given under this sutra are kondam and sandam. If this statement in KBB. were true, salge which appears in these inscriptions should have been san-ge, but it is not san-ge, but sal-ge. But SMD. 237 simply states that kol and sal>kon and san before -da-. KSS, 491 paraphrases SMD, 237. The statement by some scholars that -l of kol and asl were nasalised in O.K. as y, v, l can also be nasals and in front of a consonantal suffix, the nasal of the varga to which the consonantal suffix belongs becomes more audible, i.e. -l- > -n-, does not carry us far. To say that I and n are interchanged in Kan. e.q., linga and ninga, limbe and nimbe, do not help us much.

^{1.} KBB. 232; SMD. 237: KSS. 491; KG. P. 97.

^{2.} KBB, 9.

As we shall see later, Kol+du>koṇḍu, ul+du>uṇṭu; there also the nasal is found:—

The adv. participles in T. may be compared with O.K. adv. participles to see whether the origin of -n-of kondu and sandu may be discovered.

	Tam.	Kan.
(1)	ĩn r i	īdu
	en <i>r</i> u	${f endu}$
	$\mathrm{kon} r$ u	kondu
	koņ ḍ u	koṇḍu
	canru	\mathbf{sandu}
	${ m ti} r$ andu	$\mathbf{te} r \mathbf{adu}$
	põn ru	põltu
	venru	bendu
	vandu	bandu
(2)	irundu	iddu

From these it is found that

T. -nr K. -nd-

T. -nr- K. -d- (1 and 2).

It is seen that T. -nr and K. -nd are from Pr. Drn. *-nt-. (See the history of r. supra).

The Pr. Kan: * -ntu- has become -ntu- in some, -ndu- in some and -du in some adv. participles.

kondu<kol+ndu—kolndu. sandu<sal+ndu—salndu.

-l may have been assimilated to -n and* konndu, and *sanndu, have their long -n- shortened into -n-. But in places where it is found as -du, the preconsonantal nasal -n- has disappeared as is usual in Kanarese. (See "Dative Case" under 'Nouns' and "Consonant groups."). But nil has both nindu and nintu.—

(c) -du suffixed to rt. ending in -ļ. koļ+du>koļ+ndu>koļndu>koņņdu>koņņdu>koņdu. -ndu>ņdu before -ļ, a cerebral in okl.

The interchange between 1—and n in Kanarese is common:

- (a) !>n when there is another nasal. ānına, ālma 'a ruler' gondala, gondana 'a crowd' malal, manal 'sand'.
- (b) !>n in places where there is no other nasal.
 alil, anil 'a squirrel'.
 āl, ān, 'a male'
 āli, āni 'roundness'
 iṭṭala, iṭṭaṇa 'a crowd'
 kuli, kuṇi 'a pit'
 keladi, geṇati 'a woman friend'
 keleya, geṇeya 'a man friend'
 kola, koṇa 'a tank'
 kolagu, koṇagu 'a hoof'
 gāla, gāṇa 'a hook, a fish hook'
 gōl, gōn 'the nape of the neck'
 cātāli, cātāṇi 'a sūdra who worships Viṣṇu,
 seladu, seṇadu 'to envy'.

In N. K. colloquial speech, villagers use koṇṇi, konni for koḷḷi (take. 2nd pl. imperative)

Hence koļ+ndu>koļņdu>koņdu.

(c) -du suffixed to rts. ending in -r. tar+ndu>tandu bar+ndu>bandu.

According to Kan. grammarians, the roots are tar and bar. In Kan. as in T. and Te. the rt. remains unchanged in 2nd. sg. imper. But in the case of tar and bar, the 2nd sg. imper. is tā and bā in Kan. and T. and tā and rā in Te. In some Kanarese kāvyas of the 10th century, tārai and bārai are also

^{1.} SMD. 237; KSS. 492.

found. Caldwell and Gundert¹ have concluded that tar and tā, bar and bā are the alternative roots cited in illustration; the principle of alternative roots is not found in the dhātupāṭhas given in any of the Dravidian grammars. tar and bar may have come from tār and bār, (tā and bā) in the 2nd sg. imper Caldwell¹ thinks that vandēn (past I sg.) is from vā and varugiren from var. Even for this there does not seem to be any other satisfactory illustration in Kanarese or Tamil.

In all Kan. grammars, the roots are given as tar and bar.² The adv. pp. is tandu and bandu. They state that -r->-n before -da, the tense suffix.

III. -tu added to rts. ending -l and -n. preceded by a long vowel.

kīl-tu, non-tu, (cf. non-du from no 'to suffer pain')

Here the roots do not undergo any change.

IV. -tu added to roots ending in -du to convert them into adv. p. participles:

koṭṭār and viṭṭār from koḍu 'to give 'and viḍu 'to leave ', respectively.

kodu seems to be from kudu—to give. In the later inscriptions we get both kuduva and koduva. vidu is M.K. bidu and N.K. bidu.

Later grammarians³ state that these rts. with the penultimate short vowel change their final soft consonant before -da- and -dapa- into the corresponding hard ones. T. has kuṭuttān in the past. In Tel.

^{1.} CDG. p. 217.

^{2.} KBB. 227. "When personal terminations are added without suffixes (in the negative mood) the rt. vowel is lengthened": SMD. 237 and 238.

^{3.} SMD. p. 311, Nos. 277 and 278; sutra 239, KBB. 228, 237 and 238; KSS. 487 and 489.

this root is not found. The Pr. Kan. rt. may have been* kuṭ; with -u, -ṭ- was voiced. kuṭ or * koṭ+ ntu>koṭnṭu>koṭ+ ṭu by assimilation. Similarly in viṭṭu from viḍu. Cf. SMD 181. * Kaḍidu>Kaṭṭ, Niḍidu>Niṭṭ, Kiru>Kitt, in compounds before vowels.

The penultimate vowels in kodu and vidu are short and the syllable is a closed one. All rts. of this type form their past participles similarly. The following examples are taken from Dictionaries and Grammars:—

```
ittu (having placed)
idu+du
udu+du
              .... uttu (having put on)
kodu + du
                  kottu (having given)
              . . . .
nedu + du
              .... nettu (having planted)
padu+du
              .... pattu (having experienced)
vidu+du
                  vittu (having given)
sudu + du
                  suttu (having burnt)
              ....
```

The forms in Tamil are exactly the same as those in Kanarese, except in the last where T. has c-in place of K. s-.

But under the same conditions, roots with -du, but with a penultimate long rowel form their pps. by suffixing -i:

(Examples from Dictionaries and Grammars)

rt.	••••	K.pp.	T.pp.	Tel.pp.
ōḍu		ōḍi	ōţi	ōḍi
kūḍu	••••	kūḍi	kuți	kūḍi
tīḍu		tīḍi	tīți	tīḍu.
nōḍu		nōḍi	••••	••••
mādu	••••	${f mar adi}$	••••	••••

V. -du added to roots ending in -gu with a penultimate short vowel (closed syll.)

Examples: pokku and mikku from pogu and migu, respectively.

Pogu seems to be from the Pr.K.* pugu like kuḍu (for koḍu).

Later grammarians¹ state that, before -da-. the rt. changes the last soft consonant into the corresponding hard one and the resulting form is pokka. T. pukundēn (past. I.m. sg; pukkēn). M. Pukku.

The Pr. Kan. rt. *puk- with -ntu- may have become pukku. puk-tu- should become puttu. but if k. is fully exploded and -t- is assimilated to k., we get pukka. The reason or the process of this change is at present unknown.

But if the penultimate vowel is long and open, the adv. pp. is formed by suffixing -i, e.g., āgi, pōgi.

The origin of the past tense suffix -da- was, according to Caldwell² 'probably a neuter singular formative, converting the verbal root into a verbal noun'. Kittel states that -du and -tu are pronominal suffixes added to verbal roots to convert them into verbal participles, which are really verbal nouns.³ He interprets the adv. past participle ilidu 'a descending-it', from ili 'to descend'. Kittel may be right, but definite evidence from other Dravidian languages has to be collected before accepting this as final, now that Pr. Dr. *-ntu- is most probably the original from which -du- is derived.

The present adv. participle.

The present adv. participle is formed by suffixing -uttu, (-utu) to the rts:

āļutu} from āļ 'to rule' ikkuta from ikku 'to abandon. to kill.'

^{1.} SMD. 239. 251. S. Nos. 85 and 88; KSS. 485.

^{2.} CDG. p. 512.

^{3.} KG. p. 105. Sect. 169.

In T. this suffix is not found, but Tel. has this in the following present forms:—

avutunnānu, uņtunnānu, koņtunnānu, caduvutunnānu, tadustunnānu, padutunnānu, pōtunnānu, pamputunānu, viņtunnānu. -utu is also found as ņṭu, -stu- in these forms.

Kittel¹ considers -uttu- and -utu-, the tense suffix of the present, comes from -udu-. It is possible that this -utu- may be from *-untu- as *-ntu- is of the past tense suffix. as 'I'. has -nra- in the present.

The future adv. participle.

No examples.

The Declinable Participles.

These declinable participles are formed generally by suffixing to the root -da- to form the past, and -ppa- and -va- to form the future participles. The present declinable participle is not found. But in the case of rts. ending in -u, the declinable past participle is formed by suffixing -da- to the adv. pp. of the rt. e.g., ēri-da.

The declinable pps. end in -a while the adv. pps. end in -i or -du (-tu). The formation of the declinable pp. is the same as that of the adv. pp. except in the case of rts. with -u.

Some European scholars have given the name of "relative participles" to this class, as, according to them, these include the relative pronouns within themselves, as there are no relative pronouns in Kan.²

Declinable Past Participles.

The following examples are found:-

(1) Roots with -i or -e: ali-da, ida, nere-da, pēļ-da, pode-da.

^{1.} KG· p. 109, Sect. 173.

^{2.} CDG. p. 520.

- (2) Roots with -u; ēri-da, eydi-da.
- (3) Roots with -l: kon-da < kol-da.
- (4) Roots with-n: nonta.
- (5) Roots with -du: kotta.
- (6) Roots ī and sā: itta; satta.

Later grammarians¹ explain that ī before -da>i and da>ta. They give no reason for the doubling of -t-.

In T. the past. is īndēn (I gave);
fut. is īvēn (I give); K. īvem
past. s'attēn (I died); s'āvēn (I will die);
In Tel. past. iccināḍu (he gave)
caccināḍu (he died)

Pr. Kan (Dr.) rt. *īt. gives itta in Kanarese and iccina in Tel.

(7) Root with -gu: āda.

The past tense of āgu is āydān, found in these inscriptions. This āydān (3rd, m. sg. past.) presupposes āyda, the pp. +ān. But āyda is not found in these or other inscriptions or any of the kāvyas so far published. But Kittel² says that the old rustics use 'aydāne' even now. This is not found in Mysore—rural or urban. It may be a dialectical variation of Mangalore area. But āda is found in later inscriptions, and all the kāvyas, and is very common in N.K. ādam (3. sg. m. past.) is found. In N.K. 3. n. sg. past is āyitu and colloq. āytu (<āyittu, according to later grammarians. T. āna, K. āda, Tel. ayina, correspond in meaning).

There is another verb pōgu 'to go'. past. pōdam (3rd. sg. m. past.), pp. pōda. T. pōnān (3 sg. m. past.) pp. pōna. Te. pōyināḍu (3 sg. m. past.); pp. pōyina.

^{1.} KBB. 236, KSS. 477, KG. p. 97, SMD. 240.

^{2.} KBB. 231, SMD. 242, KSS. 500.

The 2nd sg. imper. of all Kan. (Drn.) rts. is the root itself. K. pō, T. pō, Te. pō. About the 14th cent. we get hōgu (2. imp. 3. sg.) in Kan. In compd. tenses, pōtandam. But in the case of āgu, we have not got any examples of āgu used as 2nd imp. m. sg. Later grammarians¹ of the 11th century state that -da> -ya after ā and pō. In T. ā is used by itself as a verb. Kural 1312. In Nālaḍiyār past tense 3. f. sg. āyinā! 376 (she became). āyina (things that became) 23; āyavar (349) are found.

The conditional āyin 'if it be' (115, 229, 357, 362), the negative conditional illāyin (126), yām āyin (for our part) 293, āyinum (5, 38, 98, 115, 139, 147, 176, 186, etc.) are also found.

A Pr. Drn. rt. which can become $\bar{a}y$ (T) or ay (Te) or \bar{a} (Kan) may be assumed to be * $\bar{a}y$. The disappearance of -y can be illustrated from rt. $k\bar{a}y$ —to get heated. $k\bar{a}y+pu=k\bar{a}ypu$ —heating. N.K. $k\bar{a}vu < k\bar{a}pu$. In Tel. also, $k\bar{a}ycu > k\bar{a}cu$ (rt. V.N. $k\bar{a}vu$; T. $k\bar{a}y$ —to be heated, V.N. $k\bar{a}yppu$ – dislike, displeasure; $k\bar{a}yvu$ —drying, dryness, heating. T. $k\bar{a}vu$ -sacrifice, an oblation to the inferior deities; a magic ointment used in making a black spot on the forehead.)

Hence. Pr. Dr. *āy becomes K.āydān, *āyda, and āda. -gu is a suffix added later and the fut. āguvar is later (EC. IV. 41, 1569) than āyppār>āppār>appār>appār>appar; K. akkuṁ <*āy-kkuṁ through *ākkum, where -kkuṁ is the future suffix. Cf. ākkie in these inscriptions. Similarly the root pōgu is more recent and the original Pr. Drn. rt. is *pōy. as we find pōppar for fut. 3. m. pl. in inscriptions.

^{1.} KG. p. 111.

SMD 232 says that the fut. tense suffix is -pabefore -g and -g must be elided. Examples given are

popam from pogu

tāpam from tāgu

tūpam from tūgu, etc.

This clearly shows that -gu is not a radical part of the root as ā or pō, but only a suffix.

Declinable Participles.

Present: No examples.

Future: The fut. decl. participle is formed by suffixing -ppa- or -v- to the roots.

Roots ending in -i and -u take -va: -va<-pa-<-pa-

aļi-va, iru-va, mugi-va. But rts. ending in a consonant take -ppa; appa. from *āy—to become (see āda above).

There is reason to believe that the future tense suffix was -ppa- at first and later it became -pa- and -va-. Later grammarians (SMD. 232, KSS. 503, 504), point out that the future tense suffix -va- becomes -pa- when preceded by -r, -r, -l, -n, -g, -s, and -ō and this -pa- optionally becomes -ppa- under these circumstances, then -g and -s must be elided.

Examples: r: kūrpam, parpam.

r: kilpam.

l (d): n $\bar{o}l$ pa \dot{m} , b $\bar{e}l$ pa \dot{m} .

n: nōmpaṁ.

g: popam, tapam, mirupam.

s: taripam, baripam.

ō: ōpam.

doubling: tolappam, belappam.

cf. T. kāppēn from kā 'to preserve'.

iruppēn from iru 'to be'; kalappēn from kala 'to mingle'; kalippēn from kali 'to remove'

See T.H. Articles 64 and 66. But later grammarians¹ state that 'āgu, when followed by an affix beginning with p. optionally becomes ap;" 'āgu when followed by an affix with p-, optionally becomes a-;' 'āgu, when followed by an affix with k-, optionally becomes ak-'. These are attempts to explain an existing form without knowing the origin of it.

Caldwell² thinks that -a of the declinable pps. is the original -a, sign of the possessive; Kittel considers the decl. pp. the Gen. Sg. of the adv. pp.³ But the explanations given by these do not seem to be satisfactory. The exact significance of -a is unknown at present.

As stated under adjs., these pps. are always used as adjectives. They do not change for gender or number. The Dpp. is used in the future tense, as past tense form is used in 3-8.

When pronouns of the third person or their contractions-ōn,-ōṁ (sg.) and-ōr (pl.) are suffixed to these, these become adjl. substantives, and their meaning includes the signification of the relative pronoun (See "Adjectival Substantives" above.)

Examp	les:	sg.	pl.
Masc	nom.	a <i>l</i> iv-on keyvon muṭṭidon salvon	a <i>l</i> ivor. uṇṇūr uṇvōr kādōr pa <i>l</i> cīdor

^{1.} KSS. 496—499.

^{2.} CDG, p. 523.

^{3.} KG. P. 112 Sect. 178.

Examples:sg.Neuter nom.ittoduacc.ittudānmikkudānloc.vitti lalli.

There are three instances where the adv. participle of one rt. and the decl. participle of another rt. are used together to bring out the adjectival meaning. The decl. p. comes second.

1. pūṇi-iruva. Where pūni (past. adv. p. of pūṇ -to agree, to undertake).

iruva (fut. decl. p. of iru-to be) - that have undertaken.

2. bhadramāgida.

āgi (past. adv. p. of āgu -to become) ida (past decl. pl of iru -to be)

'that had become'

3. neredu + āda

neredu (past. adv. p. of nere -to become full+āda (decl. pp. of āgu -to become)

'that had been completed.'

The Negative Participle.

The negative advl. and declinable participles are also found. The meaning is negative in such participles.

I. Negative adv. Participles.

The suffix -āde and -ade, are added to roots to convert them into neg. adv. participles.

The form of neg. adv. participle is the same for the past, the present and the future, the tense of the

^{1.} K. G. p. 106.

neg. participle being determined by the tense of the finite verb in the sentence. Like -ān in the gen. the -āde suffix is more ancient than -ade. In O. T. and N. T. -āde forms are in use, but in M. K. and N. K. only -ade forms are found.

The examples are:

-āde. allāde, tappāde, veļeyāde (cf. N. T., O. T. allāmal, allāde, tappāde, veļeyāde), cf. T. H. illāda, palā, art. 112.

-ade. tankade, lekkisad-um.

Kittel's statement that the neg. participle is formed by suffixing -ade to the short form of the infinitive, is wrong. In the formation of adv. participles, there is a principle consistently followed: the tense-suffix and the participial suffix are clearly related and are almost the same.

tense suffix. parti. suffix.

past. -da- -dufut. -va- -va-

In the neg. adv. participles also, the same principle is followed: the negative suffix -ā- (later -a-) is added to the root and then -de, the participial suffix is affixed. The result is the same in either case: ira ade. (Kittel) and ir-ā-de.

III. Neg. declinable participle.

The neg. declinable participle is formed by suffixing -a to the negative adv. participle (as in the case of declinable participles generally).

Only example is nillada from nillade (neg. adv. p.) from nil-to stand.

^{1.} Tappadu < Tavu + pa. +āde (SMD 240).

Conjugation.

As already stated, the fully inflected verb=rt.+ tense suffix+pronominal termination, *i.e.*, it is a participle+a pronoun.

The tense suffix for the past is -da- and for the future it is -m- and -ppa-.

The personal terminations are:—

			sg.	pl.
I.	person		-en	••••
II.	person	1.	-oy	••••
		2.	rt. itself.	
III.	person	mas.	-ān	-ār
			-an	••••
			$-\mathbf{a}\dot{\mathbf{m}}$	•••
		$\mathbf{fem}.$	-āļ	-ār
		neuter	-	-avu

These terminations are the same for all the tenses and for all kinds of verbs.

By suffixing these terminations to the participial forms, the conjugated forms of the verb are obtained. Thus it is seen that there is only one conjugation in Kanarese (with very few irregular forms).

As already stated, there are five moods—indicative, imperative, optative, infinitive and negative.

A. The Indicative Mood.

The past tense: The personal terminations are added to the past verbal participle.

There are no examples for the I and II persons, sg. and pl.

III person.	sg.	pl.
masc.	-āņ	-ār
G.O.T.		14

		bidisidar
$Indicative\hbox{-}past$		
III person. fem.	-āļ	
	$\mathrm{i}\mathit{l} ext{-}\mathrm{d} ext{-}\mathrm{ar{a}}$].	***

As stated before, -ān and -ār are more ancient than -an and -ar. In O. T. and N. T. -ān and -ār are still the suffixes in 3rd sg. and pl. masc. of all tenses. In Tel. in all the three persons, the terminations with the long vowel ā are in use. In N. K. in the present tense, 3rd sg. and pl. masc. and fem. -āne, -āle and -āre are still the only suffixes; -ānu, -ālu and -āru are still the suffixes in the sambhāvanārupa of the verb where doubt is to be expressed.

All the examples (except āydān) (& ēridān & eydidān) are regularly formed from verbal participles. But in ēridān and eydidān, we have -da-, added to the past verbal participles ēri and eydi before suffixing personal terminations.

But āydān is formed from* āyda (the past decl. participle)+ān, But āyda is not found in these

inscriptions or kāvyas. See āda under "Declinable pps."

The present tense: No examples.

The future tense:

	person.	sg.		pl.
trans.	I	${f a} l {f i}$ -m-en		••••
	II	****		••••
intrans.	III masc	• •••		-ār
				-āppār
				appār
			-ar	appar
				olar.

fem. no examples. neuter. no examples.

In ali-m-en, -m- is the future tense suffix. Later grammarians say ¹. that the fut tense suffix is -v-,-m-> -v-. Probably, here, -m- had the phonetic value of -v-, and the conservative writing had -m-still; āppār, appār, and appar are the fut. 3rd pl masc. forms of āgu (Pr. Kan.* āy) This shows that another future tense suffix is -pp-. The O. K. āppār, appār, appar, apar, M. K. aharu, replaced in N. K. by āgu -v- aru.

In oļ-ar, the 3. m. pl. fut. of uļ 'to be', the rt. has become oļ-. There is no tense suffix at all here. T. has uļ 'to be.' Kural: uļļār (1127)-3rd m. pl. present and future. uļāļ (617) -3rd. f. sg. pr. and fut; uļēn (167) 1st s. pres. and fut.; uļēm (1204) 1. pl. pr. and fut; uṇṭu (1098, etc.)

Te: uṇḍu 'wait, exist' 2. sg. pr. unnadi 'it is' 3. N. sg. pr. and fut. unnāru 'they are' 3. m. pl. p. and fut.

^{1.} KBB. 196.

Why in K. ul > ol is at present unknown (cf. kudu>kodu; pugu pudi>pogu, pode, the secondary forms are all found in these inscriptions).

Later grammarians 1 state kudu, pugu, etc., when followed by an affix beginning with -d-, change their vowel into short o. But kodu is found in the future also where the -d- is not the suffix, but -v-. It is not known whether these changes of -u- to -oare due to the presence of any suffix. It is also possible that originally verbs were formed without any tense suffix and the same form was used for all tenses, the meaning being determined by the context. cf. akkum used for all tenses; neg. verbal forms used for all tenses. untu - the 3rd. n. sg. of ul is used for all tenses, all genders and all numbers in Kan. and T.; the tense is fixed by the finite verb. Later, the subtle distinctions of tense may have arisen. In some grammars, it is said that there were only two tenses in Kan. - the past and the future. The present tense was a later development. Anyway, olar is formed without any tense suffix either in T. or Kan.

The following forms are used in the fut.

akkum (akum), pirigum.

- 1. idānalidon pancamahāpātakan akkum 'he who destroys this will be guilty of the five heinous crimes.'
- 2. S'rīrūpa-līla-dhana-vibhavamahārās 'igaļ pirigum nillav ārggam ' the great treasures of beauty, pleasure, wealth and power will separate and not be permanent for anyone.'

akkum (3. m. sg. and pl. fut); pirigum (3. pl. n. fut.)

^{1.} KBB. 226, SMD, 238, KSS. 489, KG. 130,

Later grammarians say that -kkum, -kum, -gum, -ku and -gu are the 3rd per. suffixes used in all tenses, in all numbers and genders.

This -kkum is found only in two forms—not in these inscriptions, but in N. K. bēku < bēlkum 'is wanted' < bēļu - to want. sāku < sālkum, 'is sufficient, < sāl - to be sufficient. akkum has been replaced in N. K. by āgu-v-udu.

B. The Imperative Mood.

There are only two examples in II. sg. kēļoy < kēl - to listen; nōdu < nōdu - to see.

The rt. is used as II sg. imp. in nodu. But in keloy, the -oy is added. This -oy has survived in N. K. as -o. i.e. kelo - people call the attention of a man to themselves by suffixing -o to the root kel or nodu in Colloquial Speech.

Later grammarians ² have used the imperative for giving a blessing, advising, inducing respectfully to do, debating how to do, ordering an inferior to do, begging a superior to do, laying down the law, and praying.

C. The Optative.

The desire or a wish is expressed by an optative. The optative is formed by the addition of -ge (-ke) to roots ending in -i, -u, e. and 1, without any tense suffix:

taṇi-ge, keḍu-ge, pelcu-ge, nene-ge, veḷe-ge, sal-ge.

Those used in the sense of a blessing: tani-ge. pelcu-ge, nene-ge, velege:

In the sense of a curse: keduge, sal-ge. (nara-kakke).

^{1.} SMD. 227, KSS. 463, KG. p. 146.

^{2.} KSS. 465, SMD. 229.

D. The Infinitive.

The infinitive is formed here by the addition of -e or -al to the verbal root (whether the root ends in a vowel or a consonant) without any tense-suffix. These remain the same in all the tenses and do not change for gender and number. The time denoted by the infinitive is to be determined by that of the finite verb. The infinitives here have a subject of their own and the finite verb of the sentence has its own subject. This use of the infinitive is a kind of locative absolute, ¹ and is intended to denote the minor actions that take place contemporaneously with the principal action of the verb.

This kind of infinitive is not very much in use in N. K.

The forms here are:—appe, alare, āg-e, āļ-e, eyd-e, oppe, koļ-e, yen-e, (alkalō, uniye).

In alkalŏ, < alku, the suffix -alō is used? M.D. 121.

In unive, the rt. is un - to eat. This unive is used in the sense of unne and unnal - for eating (or for causing to be eaten.?)

The meaning of these infinitives is e.g. appe-when it embraced, embraces or will embrace (it embracing.)

E. The Negative Mood.

The Rt. + termination = the negative verb.

There are only two forms.

- I. sg. (1) meccen I do not agree.
- III. pl. (2) nillavu They do not remain. neuter.

The negative forms are used (1) for the present; and (2) for the future. These negative forms of verbs are rarely used in N. K.

^{1.} SMD. 246. KSS. 587-588, cf. T. H. article 41, No. 8.

Voice.

There are two voices - active and passive. All the examples given under 'Conjugation' above are in the active voice. But there is only one passive form of the future 3rd. pl. masc. eydappaduvär < eyd-alpadu-v-ār.

rt. + infinitive suffix + padu + tense suffix + termination. = the passive (future) form.

There is only one passive participial noun: eriveppaḍuvōr. The passive is not common in O. K. and not popular in N. K.

Verbs and Participles in so-called Compounds.

See 'Use of Cases' and 'Composition' ante.

Substantives derived from Verbal Roots.

The following substantives in these inscriptions are derived from verbal roots by the addition of suffixes:—

Abstract Nouns.

- -ge. āḍ-ge (rule, government, from āḍ 'to rule')
 osage 'delight' from ose 'to be delighted'
 cf. T. vālkai living.
- 2. -te. negarte 'fame' from negal 'to shine' Te. negadta.cp T. nața-ttai.
- 3. -pi. nōmpi 'religious penance' from nōn 'to make a religious vow.' T. nōmpu. Te.. nōmu.

- 4. -pu. varppu 'firmness' probably from T. varu 'to dry' T. varppu.
- 5. -me. mudu-me 'ripening, old age' from mudu 'to ripen, to advance in growth' T. -mai, illāmai 'poverty' and kutimai.
- 6. -vu. vāl-vu 'living, life' from vāl 'to live'
- 7. -(a) vu. iravu 'existence' from iru 'to be, to exist' T. iravu, iruppu; varavu 'arrival' from var 'to come' T. varavu.
- -tana: okkaltana 'farming' from okkal 'thrashing' from 'okku' to tread out corn'. This suffix is said to be of Skt. origin. It is found in all the South Indian languages. T. kudittanam 'farming,' ēletanam 'poverty.'
- Te. goppatanamu 'nobility'; cinnatanamu 'meanness.'

It is possible that it may have come from tan 'one's own self.' But abstract ideas are of later origin and hence the Kan. People may have borrowed this -tana from Skt. But the existence of a large number of suffixes for the formation of abstract nouns shows that the abstract notion was not new or strange to them. I believe that -tan may be Dravidian. There is another word in T. tanmai 'nature, inherent quality'. Here -mai is the abstract noun-forming suffix, corresponding to -me in Kanarese. If tan-mai is Dravidian, it is certain that-tanam is Drn. also, as -am is the normal neuter formative in T. palam 'fruit', itam 'place' valam 'right' itam 'left' Japam 'repetition of mantras, counting the beads in prayer.'

In the following the Abstract Nouns formed are now used as common nouns:

nile: 'standing' from nil 'to stand'

nile is not found in Kittel. T. Nilai. K. nela s. n. sg. nom. - now used as nele 'permanent abode.

pāvu: 'spring' from pāy 'to spring'. Now used to denote an object which springs 'a snake' T. pāmpu. Te. pāmu.

The following two are roots used without change to denote the result of the action denoted by the verb:

pali: 'to slander' here 'slander', (T. Pali, N. and Vb.)

pulu: 'to rot, to decay, here 'a worm' T. pulu (N. and Vb.)

A few of such roots which are used both as rts. and nouns taken from Dictionaries is given under -u in the nom. under "Nouns." (ante)

ADVERBS.

There are three kinds of adverbs: 1. Adverbs of time, 2. Adverbs of place, and 3. Adverbs of manner.

1. Adverbs of time.

andu ('then), anduvalikke (thereafter), in (still), indu (now), endu (when), pin (before), begam (lw. soon).

2. Adverbs of place.

illi (here), keļage (down), porage (outside), mēl (above), mēle (above).

3. Adverbs of Manner.

antu (in that manner), ante (like), intu (in this manner), entu (how), dal (certainly), val (certainly), valam (cetainly), vol (like), vole (like)

The following adverbs have the first syllable in common:

andu and antu; indu and intu; endu and entu.

Suffix -du makes them adverbs of time and -tu

makes them adverbs of manner. These corres,

pond to the pronouns, avan, ivan and ēn.

anduvalikke is a compound adverb formed from andu

(then) and valikke (afterwards).

Of the other adverbs, ante (probably from an - to say) - apparently; in (< proximate demonstrative base iv) - hence, from this

kelage (<kil - the state of being low) - Under (loc. of kela-gu)

pora-ge (<pora - the outside) - loc. of pora-gu - outside.

balikke (<bali - going, passing on, following - a way, a road) - after-perhaps a dative.

mēl - the top-part, nom.

pol - from pol - to resemble and intervocalically vol.

These are either nouns or verbal derivatives, used adverbially.

Since adverbs qualify verbs, their gender is dependent on that of the verbs they qualify.

Adverbs of place are preceded either

(1) by an uninflected stem:

adrimel, ṛṣigiris'ile-mēl, Kalvappubeṭṭammēl, tirthagiri-mēl, dhātri-mēl, s'ikhi-mēl; (See "Use of Cases" ante.)

or

(2) by a Noun in the gen. case.

Kaṭavapranalgiriya mēl (on the top of the Kaṭavapra mountain), bāļāmēl (on the sword), (SMD. 118), vārddhiya mēl (on the sea), tīradāṇadākeļage - (under the edge of the land near the bank.)

The adverb of manner vol is similarly preceded by an uninflected stem:

teravol, manjuvol, suracapambol (like the wave), (like the dew), (like the rainbow).

In suracāpambōl, v > b after the nasal.

In salva-vol, vol comes after salva, the future relative participle of sal - to go, and also in bittavol, pol and intervocalically vol from pol - to resemble; the constant use of pol as the second member of a compound may have led to the adoption of vol as an adverb where initial p- becoming intervocalic, > -v-. vol is not used independently.

Adverbial post-positions:

(1) The use of agi (adv. pp. of agu - to become - having become) with a preceding noun in the nom. as an adverb is found in bhadram-agi, ere-y-agi.

- (2) Nouns in the instrumental case are used to express an adverbial meaning (See "Use of Cases" under 'Nouns').
- (3) A demonstrative pronoun in the nom. sg. denoting quantity is used in an adverbial sense.

inisu - (a little, this much).

(4) Nouns denoting time and preceded by numerals are used as adverbs:

irppattondu divasam, ondutimgal, murutimgal (See "Use of Cases").

avicāram, S'āsvatam and Sarvvabādhā parihāram, sarvvaparihāram (lws.) - are used as adverbs.

INTERJECTIONS.

No examples.

CONJUNCTIONS.

These are suffixed to the case-terminations of nouns, pronouns and adjectival substantives except in the acc. where this conjunction comes in between the stem and the termination, and also to infinitives and participles. Each of the words and sentences to be combined has this -ūm, -um, -am or -ānu added to it generally. The principle is the same for both numbers and all genders, sometimes this -um is added to single words to mean 'also.'

The -m of -um and -am remain unchanged when preconsonantal, but become -m or -n before a vowel. As the last syllable of a verse, it is found written as -um.

The origin of these is unknown at present. 1

-ūm and -um are found in N. K. as -ū with the loss of the final nasal. -am is not found at all. But -ānu is replaced by āgali, the imperative form of āgu 'to become' and ādarū.

(A) I. Substantives with um

I. $-u\dot{m}$: (also, and)

sorkkagāmuņdarūm Edeyagāmuņdarūm Moļejarāmaņiyagāmuņdarūm . . . Aņdugiyā gamigarūm (6 - 8 and 10).

^{1.} CDG, p. 407 and p. 532. for -um

II. $-u\dot{m}$.

- 1. Aļuarasarum mahādēviyarum Citravāhanarum; 2. bhamtamum kaviliya pālum eltum 3. polipukoļļiyum aramanetānadabhāgamum:

āṭṭamum Koṇḍarssarum, ākkoreteyum.
-um connecting sentences:

There are two examples:-

- 1. nelanum velege pārvvarum prajeyum taņige,
- 2. koduvõrum pancamahāpātaka-samyuktar appār dēvadandadinda eriveppaduvõrum appār rājadandamum eydappaduvār.

In the following example. -um is added only to the last word:

"Banavāsiyanagaramum" and the three previous words which are connected have no -um suffixed to them:

Bhāvagāmuṇḍanu (1) Candagāmuṇḍanu (2) Eḍevol-alnāḍu (3) Banavāsiya nagaramuṁ sakṣi (8 - 37 and 38).

I suspect that the final -m of 1, 2 and 3 are not clearly seen in the plates as given. The -m may be there. The other possibility is that u may stand for \bar{u} which is the N. K. equivalent of - \bar{u} m.

- II. Pronouns with -um avar-um; ār-um.
- III. Adj. substantives with -um
- 1. adān alivorum alival palcidor (um) manade nenvērum alimenendu upādesam koduvērum;

- 2. idān koļvēnum koduvēnum;
- 3. int uṇvōrum uṇiye koduvōrum Dēveḍittiyerindum Sāerindum koļvōrum koļvōrum ideyum kolvōrum kondu unvōrum;
 - 4. koluvõrum; 5. torevõrum.....unnūrum.

In the examples given above, the -um is suffixed to the nominatives mostly. But in the following, -um is suffixed to the acc. in between the stem and the termination, as already stated:—

(1) osageyum alavanavum aputrakaporudumān; 2. sāsira kavileyum pārvvarumān. Cp. Part I. A; p. 14, hasuvam haruvanam.

In these examples, the acc. ending is suffixed to the -uṁ of the last word, -porudumān and pārvvarumān and not to (1) osageyuṁ alavaṇavuṁ and (2) kavileyuṁ, though -an is implied in (1) and (2) from the context and -uṁ is suffixed to each. The same usage is very common in N. K. cf. sthalaṃgaļa āyaṃgaḷanūṁ (34) E. C. III. TN. 101; and kavileyanū brahmaṇaranū E. C. VII. Sh. 78.

But in 'Nāyarkhaṇḍamum Jelugūrālgeyān āluttu-um is not placed between ālge and -ān. All these examples are taken from prose inscriptions. There are no examples from verse inscriptions.

-um with the instrumental:

Dēvedittiyerindum Sāerindum.

-um with the dative:

Only one example: eradum nālke 'to both the countries.' But eradum is a numeral used here as an adjective. In N. K. the form will be 'eradu nādigū' or ēradu nādugaligū.'

-um with participles and infinitives:

adv. participle: āļuttum.

negative infinitive: lekkisadum.

G. O. I.

(B) -am (also, even)
The examples are:

acc. ell-am-ān.

dat. ārgg-am.

This has not survived in N. K.

(C) -ānu:

As already stated -ānu is suffixed to each of the words it connects. The meaning is 'either - or.'

The only example is

Māranānu Vōkuļiyānu (either Māra or Vōkuli)

This has not survived in N. K., but is replaced by 'āgali' or 'ādarū.'

The origin of this -anu is not known (-an-um?).

(D) $-m\bar{e}\dot{n}$ - and.

mēņ Sattar avicāram (61-10).

Word-Order.

The sentences in these inscriptions are generally of the following pattern:—

- (1) (adj.) Subject, (adj.) Object, (adv.) verb. (trans.)
- (2) (adj.) Subject, adj. predicatively used, adv. verb; (intrans.)

The exceptions which are very few, are found in verse more than in prose.

The attributives precede the substantives except in verse. When a proper noun appears with another substantive in apposition, the latter precedes the former in prose, while in verse, this order may differ. In strings of titles, the substantives in apposition follow the proper noun. When an adj. qualifies a substantive, it generally stands before the substantive, but when it is used predicatively, it follows the substantive. An adv. or advl. phrase which modifies an adj. or a participle (used as an adj.), precedes the adj. or the participle.

The subject comes at the beginning of the sentence and before the object if the verb is transitive. But if the vb. is intransitive, the subject comes as near the verb as possible.

An adv. or advl. phrase used as an attributive to the verb or participles, comes as near these as possible. When the adv. is a caseform such as the instrumental or the locative, or the dative, which are really enlargements of the predicate, they stand before the verb or participle, and as near as possible, except in poetry, where it may precede or follow the noun it modifies.

Absolute construction by the use of the infinitives in -e is found and this absolute phrase procedes the clause with the finite verb. This, being an advl. adjunct, comes in the place where the adv. naturally comes.

The adv. participles are used to express a series of actions succeeding one another without the use of conjunctions; -um, the conjunctive particle is also used to connect words and sentences. In the only interrogative sentence, the interrogative pronoun 'en' is suffixed to the the adj. substantives. There are two imperative sentences wherein the second personal pronoun which is the subject is not expressed. These two sentences are in verse.

There are five optative sentences wherein the order is the subject, the enlargement of the verb and the intransitive verb.

There are two negative sentences where negation is expressed by the verb in the negative mood.

There are simple, complex and compound sentences. The word order in complex and compound sentences is not different from that of a simple sentence. But the simple sentence is only one sentence. In the complex sentence, there is a principal clause with one subordinate clause.

In a complex sentence, the internal word-order of different clauses does not differ from that of a simple sentence, except that the different clauses are correlated by means of adverbial participles. Further, the subordinate clauses in a complex sentence come first and the principal clause comes last. The subordinate clauses in the complex sentences in these inscriptions are noun clauses.

The compound sentence is a series of independent simple or complex sentences connected by the conjunctive particle-um.

The Subject:

The subject precedes the verb. But if the verb is transitive, the object comes in between the subject and the verb.

Examples:

(a) with transitive verbs:

- 1. (Kāndarbor) periyā osageyum aputrakaporudumān viṭṭār '(Kāndarbor remitted (the fees leviable at) the festivity of attaining puberty) and the duty leviable in the case of a man dying without a son' (5-5).
- 2. S'āntapana maģa Dēvereyage Naṣṭappa goṇḍu koṭṭan 'Having brought, Naṣṭappa gave to Dēvereya, son of S'āntapa' (8-29).
- 3. Avar svarggāgramān ēridār 'He ascended the high heaven' (25-2).

(b) with intransitive verbs:

- 1. Alivon pañcamahāpātakan akum 'He who destroys will become guilty of the five great sins. (1-4).
- 2. kādu salvon paramakalyāṇabhāgigaļ āppor 'He who protects this shall become the worthy recipient of excellent good fortune' (6-17).
- 3. Carita S'rīnāmadhēya prabhu munin vratagaļ nontu saukhyasthan āydān. 'The lord named Carita S'rī, having observed the vows of a muni, became the possessor of happiness.' (14-4).

(c) In the following there is no verb:

- 1. Kittere u....yarā nisidhige 'The tomb (or epitaph) of Kittere......ya' 19-2).
- 2. Devakhantiyarnnisi (dige) 'The tomb or epitaph of Dēvakhantiyar' (42-2).

Pūspasēna cāri.....ya nisidhige 'The

epitaph of Gunamatiavvegal' (55-1).

5. Srī Jinamārggan nītisampannan Sarppa cūlāmaņi 'Sarppa-cūlāmaņi (Crest-jewel among serpents) follower of Jina and of righteous conduct' (61-1 and 2).

The verb is understood—'this is'.

(d) 1. In the following the subject comes after the verb.

Verb.

Vb. In prose:

'kottār Sēnavarasarum dharmmagaranigarum' Sēnavarasa and the dharmakaranika (the palace officer in charge of charities) will (divide and) give' (3-9 and 10).

It is probable that the line is misplaced in the inscription.

Vb. In verse:

meccen ān 'I do not approve' (37-3).

In this verse, a series of advl. trans. past participles is used without the subject coming first.

In Poetry—participles:

The subject comes near the finite verb in the sentence: - 'duritābhūd vṛkṣamān kiltu alare poded ajňānas' ailendramān, poldu, Uramithyātvapramūdhasthirataranrpanān, metti gandhebhamaydān cārita S'rīnāmadhēyaprabhu Saukhyasthan āydān.'

'Having uprooted the tree of sin, having smitten the mountain of ignorance, having cut asunder the silly but firm king of false doctrine, and having trampled on the five rutting elephants (the five

senses), beloved lord of Suravidyā (heavenly learning) named Carita S'rī, [on the hill named Kalbappu, praised by the god and sages,] observed the vows of a muni, became the possessor of happiness." (14-1--4).

The Object:

The object always comes after the subject and precedes the verb or adv. participle in prose:—

- (1) avar Svarggāgramān ēridār 'He ascended the high heaven." (25-2).
- (2) Pegurama Suralōkavibhūti eydidar 'Pegurama attained the splendour of the world of gods' (24-2).
- (3) aputraka porudumān viṭṭār '(He) remitted the duty leviable in the case of a man dying without a son' (5-5).

But, in poetry, the object may come after the verb.

- 1. Rājnīmatīgantiyār namagind oltidu yendu ēri giriyān 'Rājñīmatiganti, having said "This is good for us now" and having ascended the mountain' (43-3).
- 2. Mahānantāmatīgantiyār suralōka saukhyadedeyān tām eydi *ildāl manam* 'Mahānantā matigantiyar, having reached the abode of the happiness of the world of gods, sacrificed (her) mind ' (44-4).
- 3. In (d) 2 above, the participles come after their objects.
- 4. meccen an ī dharaṇiyuļ iravan 'I do not approve existence on this earth' (37-3).

The verb:

Comes last in the sentence in prose.

1. alivon ēlaneya narakadā pulu akum 'He who destroys will become a worm in the (lowest) seventh hell' (1-4).

- 2. avar svarggågramån ēridår. 'He ascended the high heaven' (25-4).
 - 3. Kāndarbor aputraka porudumān viţţār (6-6).
- 4. Neduboreya Pānapa bhaṭārar nontu muḍip-pidār 'Pānapabhaṭāra of Nedubore, having observed the vows, ended his life' (13-1 & 2).

But in verse also, the verb comes in the end, but there are exceptions:

In verse.

- 1. perggoravam Samādhi neredon nönt eydid ör siddhiyān.
- 'The great guru accomplished Samādhi, and having observed the vow, attained perfection' (21-4).
- 2. niravadyann ēri Svarggam sivanilepadedān sādhugaļ pūjyamānan 'The stainless (he) being honoured by the good, attained the happy condition (36-4).
- 3. meccen ān īdharaṇiyuļ iravān 'I do not approve existence on this earth' (37-3).

Participles.

Advl. and declinable participles take objects, if they be transitive.—Here the object precedes the participle

I. ADVL. PARTICIPLES.

Trans.—In prose.

- 1. Sri Pōgilli Sēndraka mahārajar Nāyar-khaṇḍamum Jelugūr ālgeyān āluttu (m) "While the illustrious Pōgilli, the Sēndraka mahārāja is administering the Nāyarkhaṇḍa and the government of Jelugūr." (5-4).
- 2. Āļuarasar Guņasāgarādvitīyanāmadhēyan Kadambamaṇḍalaman āļuttum 'When Āluarasa, with the second name of Guṇasāgara, was ruling the Kadambamaṇḍala' (62-2 & 3).

3. tapamān keydu 'Having practised penance' (44-1).

In poetry also, the object precedes the verb generally:

- 1. tan dēham ikki 'having sacrificed his body'
- 2. ghanammārittamān vittu 'Having given up the great misfortunes' (34-1).
 - 3. idan kole 'If any one takes this' (6-15).
- 4. idān kādu salvēn 'He who preserves this' (6-17).

But, in some verses, probably for adjustment of metrical length, the object comes after the adv. participle:

- 1. meṭṭi gandhēbha maydān 'Having trampled down the five rutting elephants (the five senses)' (14-2).
- 2. niravadyan ēri svarggam 'The stainless (one) having ascended (to) heaven' (36-2).
- 3. ēri giriyān 'Having ascended the mountain (43-3).

II. DECLINABLE PARTICIPLES (TRANS) TAKE OBJECTS WHICH PRECEDE THE PARTICIPLES.

The declinable participles with gender suffixes adj. substantives. These take objects which precede them.

- 1. nitta dharmmamān kādōrā kulam pelcuge 'May the family of the man who preserves (protects) this permanent work of charity prosper '(3-8).
- 2. *idān alivon* pancamahāpātakan akum 'He who destroys this becomes guilty of the five great sins (1-4).
- 3. Sāsira kavileyum pārvvarumān konda pañcamahāpātaka-samyuttan akkum 'He will be guilty

of the five great sins' of having killed 1,000 brown cows and brahmins, (6-13 & 14).

Substantives in Apposition.

In prose and verse, the substantive in apposition precedes the proper noun:

- 1. Āneseṭiya aliya Basantakumāra, 'Basantakumāra, son-in-law of Aneseṭi,' (8-27).
- 2. Sāntapana maga Dēvereyage 'To Dēvereya, son of Sāntapa' (8-29).
- 3. Möniguruvara s'iṣya Koṭṭarada Guṇasēnaguruvar 'Guṇasēnaguruvar of Koṭṭara, the disciple of Möniguruva' (12-2 & 3).

ln verse.

- 4. Vegūrā parama prabhāva riṣiyar Sarvvajñabhaṭṭārakar 'Sarvvajñabhaṭṭārakar, a riṣi or sage of supreme glory of Vēgūr' (15-2).
- 5. guravam nam Mauniyācāriyar 'Mauniyācāriyar, our guru ' (50-1).

But in verse, the substantives in apposition follow the proper noun:

- 1. Māsēnar paramaprabhāvariṣiyar 'Māsena, the sage of supreme glory: (25-1).
- 2. Mahādēvan munipungavan 'Mahādeva, the chief of Sages' (35-1).

Strings of Titles.

1. sri Vinayāditya Rājās 'raya S'rīpṛthivīvallabha mahārājādhirāja paramēs'vara bhaṭāra (5, 6, & 7-1).

But in

2. S'rīmat prithivīvallabha Maṅgaļīsanā 'of Maṅgaļīsa, the favourite of the world.' (1-1)

Attributives precede the noun they qualify (numerals, cardinal and ordinal, adjectives and nouns are taken as attributives in this connection).

Prose.

- 1. *periyā* osageyum (5—5 & 6-5).
- 2. ēlaneya narakadā pulu akum '(he) will become the worm of the seventh hell' (1-4).

Verse.

- 3. rāgadvēṣatamōmala vyapagatar S'uddhātma Samyōddhakar Vēgūrā parama-prabhavariṣiyar Sarvvajnabhaṭṭārakar 'Sarvvajña bhaṭṭārakar, a riṣi or sage of supreme glory of Vēgūr, free from the dark stain of desire and hatred, a pure—souled warrior' (15-1 & 2).
- 4. kare-il, naltapadharmmadā Sasimati S'rigantiyar 'Sasimati S'riganti, stainless and of good penance and virtue' (33-2) Verse. 3. capal-illā, Navilūru Sanighada Mahānantāmatīgantiyār 'Mahānantāmatīgantiyar, firm-minded and of the Navilūr samgha" (44-2).

Declinable participles, functioning as adjs., precede the noun they qualify.

Verse.

1. bhadramāgida dharmmam, the (Jaina) faith which had greatly prospered (which was firmly established) (29-2).

Verse.

2. S'rīsamgamgaļa pēlda Siddha Samayam tappāde nontu 'Having observed the vow in consonance with the rules of the siddhas, enunciated by the Samghas (25-1).

Verse.

3. $p\bar{e}l$ da vidhānadindu 'In the prescribed manner (34-2).

Prose.

4. konda pañcamahāpātakan (5-14).

But when these attributives are used predicatively, these follow the noun they qualify and precede the verb:

- 1. ittodān alivon pancamahāpātakan akum He who destroys this gift becomes guilty of the five great sins (1-4).
 - 2. alivon ëlaneya narakadā pulu akum (1-4).
- 3. kolvõrum unvõrum panca mahāpāta samyuttan ägi. The buyer as well as the enjoyer having become guilty of the five great sins' (3-7).
- 4. idān kādu salvon parama*kalyānabhāgigal* āppōr. He who protects this (charity) shall become the worthy recipients of the most extreme good fortune. (6-18)

Verse.

5. Carita S'ri nāmadhēyaprabhu muninvarataga, nontu Saukhyasthan āydān (14-4).

Verse.

6. Akṣayakīrtti nontu bhaktiyim akṣimaṇakke ramyasuralōkasukakke bhagi ā (dam) 'Having observed the vow with devotion, Akṣayakīrtti became a participator in the happiness of the gods, delightful to the eye and the mind' (20-4).

Verse.

7. vinayācāra-prabhāvan tapadim adhikan Candradēvācāryanāman, niravadyam ēri svarggam (36-2).

Here in 7, two adjs. precede and one adj. follows the noun.

- 8. Kāndarbor adhikārigaļ āge (6-5).
- 9. gāmigarum mukhamāge (6-11).
- 10. idake kamara Vasanta kumāra sākṣi (8-31).

The gen. case of substantives and pronouns precede the nouns like attributives.

- 1. narakadāpulu (1-4).
- 2. Mamgali sanā kalmanege 'To the stonehouse of Manigalīsa (1-1).
- 3. Kilgānēsvaradā dēvara parivariya bham-tamum (3-3).
- 4. Vedevalliyarā dēvadiyum (5-8) 'Also the temple priest of Vedevalli'
- 5. Banavāsiya, Ānesetiya aļiya, the son-in-law of Āneseți of Banavāsi (8-27).
- 6. Agali ya Mōniguruvara s'iṣya 'The disciple of Moniguruva of Agali' (12-2).
- 7. nammā Kaļantūranam 'Our (guru) of Kaļanturu (21-3).
- 8. Tarekāḍa, perjeḍiya, modeya kalāpakada guruvaḍigaļ 'The guruvaḍi of Tarekāḍu, of the matted hair, of the Muñjagrass group.' (31-2 & 3).

Adverbs.

Adverbs or case forms of substantives used as adv. adjuncts precede the verb or the participle and are kept as near these as possible.

- 1. Lakṣaṇavantar entu enalu 'When those who knew the symptoms were in doubt how' (20-2).
- 2. (perggoravam) sālāmbālatap
ögrad intu naḍadōm
 - 3. int endu 'having said thus' (33-3).
- 4. valav adu divam pokka 'He entered heaven most certainly.'

Nouns in the nom. used as advs. precede the verbs or participles in the same manner:--

Adv. of time:

1. īrelpattarulam okkaltanam keyvon āvittidalli veļeyāde keḍuge 'He who practised agriculture for 140 years, let that which he sows rot, without sprouting (6-15).

Adv. of time:

2. mūrutimgal nontu mudippidar. (19-2)

Adv. of Place:

3. bāļāmel, Ś'ikhimēle sarppadamahādantā-gradul salvavol Sālāmbālatapōgrad intu naḍadom "nūrenṭu samoatsaram" 'He enagaged himself for one hundred and eight years in the practice of severe penance which was like walking on the sharp edge of a sword or on fire, or passing over the great fangs of a cobra' (21-1 & 3).

The last one marked with an * is an adv. of time coming after the verb-in verse.

The case forms of nouns used in an advl. sense:—

- 1. nontu bhaktiyim 'Having observed the vow with devotion' (20-3).
- 2. nontu inbinim 'Having observed correctly (or 'sweetly')' (25-1).

In these verses the instr. case form comes after the participle they modify for purposes of metre.

The locative form of substantives, used adverbially, precede the verb or the participle:—loc.

- 1. Vāraņās'iyaļuļ konda (5-13) 'of killing in Varaņāsi'
- 2. tīlthadoļ nontu 'Having observed the vow on the holy Kalbappu' (17-1).
- 3. Sarppada mahādantāgraduļ salvavol 'Like passing over the great fangs of a cobra' (21-1).
 - 4. S'ailadul 'On the mountain' (34-2).

Dative:

- 1. dēvarke pūņi iruva 'Who have promised to work for God' (1-2).
 - 2. naragakke salge 'May he go into hell '(3-8).

- 3. eradum nālke rāja S'rāvitamage 'Having proclaimed to both the districts or nāds' (6-12).
- 4. Svarggālayakkēridār. 'He ascended (to) the abode of heaven' (33-4).

But in poetry the dative follows the verb in two cases.

- 1. S'rīrūpa līlā dhana vibhava mahārās' igaļ nillav ārggam 'The large treasures of beauty, pleasure, wealth and power are transient and will not be permanent for any '(37-2).
 - 2. āyuşyaman entu nōd enag int endu.
- 'enage' the dative of 1st person pron. sg. comes after the finite verb nōḍu (33-3).

Skt. lws. used as advs. precede the verb in prose.

- 1. Sarvvabādhāparihāram bittār 'Gave it free of all taxes and imposts' (7-4).
- 2. Sasvatam eydidan (He obtained permanently) (41-4).

But in verse, it comes after the verb:—

3. mēņ sattar avicāram 'And they died undoubtedly (for want of foresight)' (61-10).

Adverbial participles are used as adverbs and they precede the verbs:—

- 1. nontu mudippidar (13-2).
- 2. ēri svarggam S'ivanile padedān sādhugaļ pūjyamānan (36-2).
- 3. tappāde nontu inbinin svarggāgramānēridān. tappāde (neg. adv. participle) 'correctly' allāde, the neg. participle of al 'to be fit, to be suitable' is used here in the sense of 'excepting' or 'except'. This allāde comes after the noun in the nom. with its preceding genitive 'dēvāndevana parijanam allāde' (3-4) 'Except the attendants of the god of gods.'

Adv. past participles not only express the actions or circumstances of the subject, but also connect the action with the action denoted by the finite verb.

1. guruvadigal, nontu mudippidar 'Having observed the vow, the Guru, ended his life.'

The observance of the vow is expressed by the adv. pp. nontu, and the same is connected with the action denoted by the finite verb 'mudippidar.'

- 2. Kaṭavapra S'ailamadalde perggoravam samādhi Neredon nontu eydidor siddhiyān (21-3 & 4). 'Having ascended the Kaṭavapra mountain, having observed the vow, he completed samādhi and attained perfection.'
- 3. Inscription 14. A series of adv. pps. connect the several actions with the finite verb.
- II. The infinitive in an absolute construction, not only expresses a contemporary action, but also connects a series of actions like an adv. pp:—

S'rī Vinayāditya Rājaśraya S'ripṛthivī vallabha mahārājādhirāja paramēṣ'vara bhaṭāra pṛthivīrājyam keye, S'ripōgilli Sēndraka mahārājar Nāyarkhaṇḍamum Jeļugūr āļgeyān āļuttu Kāndarbor adhikārigaļ āge, periyā osageyum alavaṇavum aputrakaporudumān viṭṭār (5-1 to 6).

The conjunction Particles.

I. ūm,-um and-am are suffixed to each of the substantives or sentences to be connected:—

A. Substantives:

Prose. 1. Valliggāmeyara dāsadiyām Alavaļļi yarā Ravicandanum, Sorkkagāmuņdarām, Edeyagāmuņdarām, Moļejaramaņiya gāmuņdarām Nāvaļļi-yarum Andugiyā gamigarum, Nīrilliyā Sindera gāmi-garum mukhavāge (6-7-11 5-7-11).

- Prose. 2. Bhāvagāmuṇḍanu Candagāmuṇḍanu, Eḍevolalnāḍu Banavāsiya nagaramum Sakṣi (8-37 & 38).
- 3. alivorum alival paleidor manade nenevõrum [alival paleidor manade nenevõrum] alimen end upādē s'am koḍuvõrum pañca mahāpātaka samyuktarappār [62—(8-11).]

B. Sentences:

nelanum veļege, pārvvarum prajeyum taņige (6-18, 5-18).

II. and suffixed to each of the two nouns expresses the idea of 'either-or-'

Māranānu Vokuļiyānu (Either Māra or Vokuli).

III. mēņ. mēņ Sattar avicāram. Here mēņ connects the sentences.

The absolute construction.

The infinitive which denotes a contemporary action gives rise to the abs. construction in the following and it is placed in the beginning of the sentence.

- 1. S'rīvinayāditya Rāja S'raya pṛthivīrājyam keye S'rīpōgilli Sēndraka mahārājar Nāyarkhaṇḍamum Jelugūr Ālgeyan āļuttu Kāndarbor adhikārigaļ āge. periyā osageyum alavaṇavum aputrakapordumān vittār (5-3 to 6).
- 2. S'rīmat Citravāhana pinduvvāļe Ķiļļum Nāgeņņan adhikārigaļ āge (3-1 & 2).

Here the subject of each of the infinitives is different.

The absolute construction comes in the middle of the sentence in verse: Māsēnarparamaprabhāva riṣiyar Kalvappinā veṭṭadul, S'rī Sam gamgaļa pēlda siddha Samayan tappāde nont inbinin prāsādāntaramān vicitra kanaka prajvalyadin mikkudān Sāsirvvar vvara pāje dand uye, avar svarggāgramān ēridār.

Since the subject and the finite verb are far apart, the subject is the first and the verb the last, in this verse, the pronoun *avar* is used after the abs. construction.

The Interrogative sentence.

There is only one example and that in verse, as a subordinate noun clause in a complex sentence. kaṭṭida Siṃghamen 'keṭṭod $\bar{e}n$ emage, eṁdu biṭṭavol (61-9). 'In the same way as releasing the bound lion, saying 'What' is the harm to us.' The interrogative pronoun, $\bar{e}n$ 'What' is used to convert the indicative into an interrogative sentence.

Imperative sentence:

There are two examples in verse:—(a) one is the main clause:

 $k\bar{e}loy$ pin Kaṭavapra S'aila maḍaldē nammā Kaļantūranam $b\bar{a}l\bar{e}$ perggoravam Samādhi neredon (21-2 & 3). bālē kēļoy 'Oh girl, listen' is the correct prose order. But in this verse, the imperative second sg. comes first in this line and the vocative comes as the first word in the next line.

- (b) The second is an imperative sentence, used as a noun clause and as an object of a participle:
- "āyuṣyaman entu $n\bar{o}d$ enage tān " int endu. nōḍu 'See' is the imper. second sg. masc.

The sentence within quotation marks is used as the object of endu, pp. of en—to say.

The optative sentence:

All these sentences maintain the same word-order as an indicative sentence (but the verb takes the suffix-ge). These are used to curse and to bless.

Curse.

1. Koṇḍu uṇvōrum pañcamahāpātakasamyuktan āgi pūti enva naragakke salge (3-7 & 8) 'May he

who takes and enjoys (this) become guilty of the five great sins and go to the hell named pūti.'

2. idān koļe okkaltanam keyvon ā vittidalli veļeyāde keduge (5-16).

Blessing.

- 1. īnittadharmmamān kādōrā kulam pelcuge (3-8).
- 2. nelanum velege, pārvarum prajeyum taṇige (5-18) May the earth also be fruitful, may both the Brahmans and the people enjoy satisfaction.

Negative sentence:

These two sentences are in verse. The order of words is not the same as that in prose:—

- 1. pirigum S'rīrūpalīlā dhanavibhava mahārās' igaļ nillav ārggam endu (37-2).
 - 2. meccen ān īdḥaraṇiyuļ iravān endu (37-3).

In these the finite verb comes first and the subject comes next, probably for the needs of metre. In 1. there are two finite verbs of which one comes before, and the other comes after, the subject.

Simple, complex and compound sentences:

The Complex sentence:—As already stated, the word-order in complex and compound sentences does not differ very much in prose. But the complex or compound sentence is only one sentence. In a complex sentence, the different clauses are correlated by means of adverbial participles; the subordinate clauses come first and the principal clause comes last.

The subordinate clauses in these inscriptions are noun clauses:—

1. kēļoy pin Kaṭavapra S'ailam aḍaldē nammā Kaļantūranam bālē perggoravam samādhi neredon nōntu eydidor siddhiyān (21-3 & 4). 'O girl, hear of him of Kaļantūr, who having ascended the holy

mountain of Kaṭavapra, the great guru accomplished Samādhi, and having observed the vow, attained perfection'

- 2. S'asimati S'rīgantiyar vvandu mēl arid 'āyuṣ-yaman entu nod enage tān int' endu Kalvappinuļ torad ā rādhane nontu tīrtthagirimēl svarggālayakkēridār (33-3 & 4).
- 3. 'Suracāpambole vidyullategaļa teravol manjuvol toribegam pirigum S'rīrupalīla dhana-vibhava mahāsās'igaļ nillav ārggam, paramārttham meccen ān īdharaṇiyuļ iravān endu Nandisēna pravara munivaran dēvalōkakke sandān.'
- 4. 'valv ad arid inn enage' endu Suralōkamahā vibhavasthanan ādam. (40-4).
- 5. Rājñīmatīgantiyār 'namag ind olt ida nendu ēri giriyān svarggālayam ēridār (43-3 & 4).
- 6. Kaṭṭidasimghaman 'keṭṭodēn emage' endu biṭṭavōl kalige viparītamgahitarkkal keṭṭar (61-9 & 10).

The compound sentence.

As already stated, the compound sentence is a series of independent simple or complex sentences, often connected by the conjunctive particle-um. The word-order in a compound sentence in prose does not differ from that of the simple sentence.

Two or more simple sentences.

- 1. koṇḍu uṇvōruṁ pancamahāpātakasaṁyuktan āgi pūti enva naragakke salge, īnitta dharmmamān kādōrā kulaṁ pelcuge (two sentences) (3-7 & 8).
- 2. nelanum veļege pārvvarum prajeyum taņige (5-18).

Simple and complex sentences.

3. adān alivorum alival palcidor manade nene vorum alimen endu upādēs'am koduvorum pancamhā-patakasamyuktar appar dēvadaņdadinde eriveppadu-vērum appār rājadaņdamum eydappaduvār (three sentences) (62-8 to 13).

"Those who ruin that, or whisper its ruin, or think it in the mind, or advise others to ruin it, are guilty of the five great sins, and incur the punishment of the gods and also the punishment of the king."

- bēgam (35-1)—quickly. Slw. s. n. sg. nom. Used as an adv. N.K. bēga. T. vēgam— swiftness. Te. vēga, vēgamu—quickness; M. vēgam—haste; Tu. bēga—speedily.

BHA.

- bhaktiyim (20-3)—with devotion. Slw. bliakti-s. n. sg. instr.
- Bhattarakar, bhattarar, bhantaraka (18-1)-Pkt. for bhartā-venerable or worshipful person, used of gods, scholars and men of rank; a kind of saiva monk. bhatta bharta doctor. a designation of great scholars. balara is the Tdb. of bhattaraka (See E. C. II. 19. Dēvaņandibaļara.)
- bhantāraka is from bhattāraka. There are two reasons for this nasal.
 - I. -tt- is written in early inscriptions as ot, like all long consts. The° is like an anusvāra and hence bhamtaraka and later bhantaraka.
 - cf. (1) hesarani °tu for hesaranițțu E.C. IV. Hg. 112 (1342).
 - (2) ta° pidavanu for tappidavanu E.C IV. Hg. 112 (1342).
 - (3) ca° kravarttige for cakkravarttige E.C. IV. Hg. 112 (1342).

Why not for -tt- is not known.

- (4) ta° naguru (2) do
- (4) a onadāni (8) E.C. IV. HS. 94, 1262.
- (6) vu°nata (15) E.C. VII. Sk. 3131, 1390.
- (7) ga°de (15) for gadde E.C. IV. Hg. (8) si°dāya (16) for siddāya
- (9) Gopa°na for Gopanna E.C. VII. Sk. 282.
- (10) Gu°maṭanāthana (4) (110) E.C. II. 342, (1412).
- (11) .sampa°narum E.C. IV. Hs. 101. (1450.) This explains some of the nasals in the Pkt. loan words like Chamtamuni.

- II. There is peṇḍāra gopāļadēvaru (E.C. III. TN. 97, 1276) 29.
 - pendāra—not in Kittel.
 - T. paṇṭāram—a religious mendicant wearing beads and yellow garments; a monk; Skt. piṇḍāra—a religious mendicant or beggar; a cowherd; a term of censure. bhaṇṭāraka may probably be a contamination between paṇḍāram and bhattāraka.
- bhadram (āgi) (29-2)—firm, happy, auspicious, prosperous. Slw. bhadram. s. n. sg. nom. subject of āgi.
- Bhadravāhusacandraguptamunīndrayugmadin (29-1)
 —with the pair of the great sages, Bhadravāhu and
 Candragupta. s. m. sg. instr. Slw. yugma—Sea

- Sasimati Śrīgantiyar (33-2)—s. pr. f. pl. (hon.) nom. Slw. °ganti.
- svarggam (36-4)—to heaven s. n. sg. nom in form, acc. in meaning.
- svarggalōkasukhacittam . . . mādhigaļ-s. n.pl. nom. ?
- svarggāgramān (15-4; 25-2)—the top of heaven (the high heaven).—Slw. °agra-. s. n. sg. acc.
- svargālayam (43-4)—to the abode of heaven—Slw °ālaya—s. n. sg. acc. in meaning. nom. in. form.
- svabhāvasaundaryyakarāṅgar (57-2)—He of the natural beauty of body. Slw. °aṅga-. s. m. pl. (hon.) nom.
- svarlōkadim (34-4)—(Rice) Slw. lōka s. n. sg. instr.? svasti (1-1; 2-1; 3-1; 4-1: 5-1; 6-1; 7-1; 17-1; 18-1; 26-1; 27-1; 34-1; 39-1; 42-1; 45-2; 47-1; 50-1; 62-1; 63-11 and 12; 64-1; 65-1)—s. f. nom. well-being, fortune, success. Hail, farewell used as an adverb at the beginning of a letter, ms or inscription as an auspicious word. A letter is called svastimukhah.
- Sāerindum (3-5)—from Sāer. s. pr. f. sg. instr. um
- sādhisi (50-4)—having accomplished, adv. pp. of sādhisu—to accomplish from Skt. sādh—to accomplish one's aim, to reach one's goal.
- sādhu (61-5)—Good, kind, person. Slw. s. m. sg. nom. nom. pl. sādhugaļ ; dat. sg. sādhuge.
- sādhugal (36-4)—by the good. Slw. sādhu- s. m. pl. nom. in form, but instr. in meaning.
- sādhuge (61-5)—to the good people. Slw. sādhu, s. m· sg. dat.

- sādhu-gra . . . radhīran (41-1)—the hero of ?
- sāndhi vigrahika Šrī Rāmapunyavallabhēna likhitamidam (8-36)—Part of the Skt. portion of the inscription. This was written by Ś'rī Rāmapunya, the minister for peace and war. cf. samdhivigrahilalāmam. E. C. V. AK. 127 (1185).
- sālāmbālatapōgradi (21-2)—In the practice of severe penance. Slw. tapōgra-. s. n. sg. loc. The meaning of sālāmbāla not clearly known. Probably-excessive. Kan. adv. sōḍam bāḍam—further, much (possibly from Skt. sōḍham bāḍam—borne very well) may have been in use as sālāmbāla. Cp. SMD. 309. Sōḍambāḍam—much more.
- sāsira (5-13; 6-13)—Thousand. Slw. Numeral adj. qualifying kavileyum pārvvarumān. sāsira < Skt sahasra-
- sāsirvvar (25-2)—The thousand (Gods) Slw. sāsir-. s m. pl. nom. cf. orvvan, ēļnūrvar.
- sāsvatam (41-4)—for ever. Slw. Skt. adv.
- svādhyāyasampattinim (33-1)—by the wealth of constant study of the scriptures (Outlines of Jainism pp. 131 and 133). Slw. sampattu- s. n. sg. instr.
- svāyuḥpramā yak (34-3)—his own life? siganu (7-12)?
- Singanandiguruvadigal (30-1) s. pr. pl. (hon.) nom simghaman (61-9)—The lion. Slw simgha-. s. n. sg acc.
- siddham (33-1; 34-1)—nom. n. of the Paşt perf. passive and as an equivalent of Siddhi. Siddhi actually occurs in place of Siddham success (pp.=achieved) used as s'rī and svasti at the commencement of inscriptions (I. Ant. X. p. 273.)

- siddhiyan (21-4; 53-2)—Perfection. Freedom from laws of Nature. s. n. sg. acc.
- siddhasamayan (25-1)—In consonance with the rule of the siddhas. (Jainism by H. Warren p. 67 Outlines of Jainism—pp. 46, 63, 85) adj. s. m sg. nom. Slw. °samaya-
- siddhisthan (54-4)—possessor of siddhi or perfection. Slw. °stha- s. m. sg nom (See Heart of Jainism, pp. 95, 104, 108, 262, 271, 274)
- Sinderagāmigarum (5-11; 6-11)—The people of the village of Sindera. s. m. pl. nom.+um-.
- siri pa . . . vahā . . . (65-22)?
- sirisamghadā (43-1)—Of the holy samgha. Slw. samgha- s. n. sg. gen.
- sthitadēhākamalōpamāinga Š'ubhamum (34-4)—(to) prosperity of one resembling a lotus in body Slw. S'ubha-. s. n. sg. nom.
- sthirada (24-3) —of firmness. Slw. sthira- s. n. sg. gen. supaṇḍitan (56-1)—a good scholar. Slw. °paṇḍita- adj, s. m. sg. nom.
- suputra $l\bar{a}$ (7-7)?—of the good son?
- suracāpambole (37-1)—Like the rainbow. Slw. cāpas. n. sg. nom+e.
- suralōkamahāvibhavasthanan (40-4)—The possessor of the great powers of the gods of heaven. Slw. °vibhavastha- adj. s. n. sg. nom. The penultimate—an appears to be superfluous and may be due to the mistake of the engraver. It is also, possible that -an -an was in use as -in -in for the instrumental in inbinin.
- suralōkada (mārggadoļ) (52-2)—of the world of gods. Slw. °lōka- s. n. sg. gen.
- suralōkavibhūti (24-3) The splendour of the world of gods. Slw. s. n. sg. acc. in meaning, nom. in form.

- suralōkasaukhyada (44-4)—of the happiness of the world of gods. Slw. °saukhya- s. n. sg. gen.
- suravidyavallabhēndrāššuravara munibhistutyakalbappināmēl (14-3)—on the top of the mountain, Kaļbappu, praised by the lords of heavenly learning. Slw. °Kaļbappu-.
 - 1. Kalbappinā—s. n. sg. gen.
 - 2. mel s. n. sg. nom. adv.
- l may also be taken as qualifying "Carita śrī." stutya Kalbappinā (14-3)—on the Kalbappu, worthy of praise. s. n. sg. gen.
- sedeņevadesi (dal) (54-1)?
- Śēnavarasarum (3-10)—s. pr. m. pl. (hon.) nom. +um.
- sesthe ān (7-8)—property, svāstya—s. n. sg. acc. sva asti—land either with a trifling rent or free from tax.?
- Śokkagāmuṇḍarum (5-8)—s. pr. m. pl. (hon.) nom.+ um. (Rice) sokka from sokku-sorkku-pride.
- Sorkkagāmundarum (6-8)—same as Sokkagāmundarum (5-8) (Fleet)
- saukhyasthan (14-4) Possessor of happiness. adj. m-sg. nom. Slw. ostha-.

APPENDIX I.

PROPER NAMES.

Agali (12), Andugi (5 and 6), Adevarenadu (19), Amali (5 and 6), Alamvalli (5 and 6), Anes'eti (8), Āryyanāmikā (52), Āļuarasar (62), Ugrasēnaguruvadigal (23), Ullikkal (10), Ullikkal guruvadigal (10), Rsabhasēnaguruvadigal (32),Edevagāmundar (5 & 6), Edevolalnādu (8), Erevedi (7), Kappe Arabhattan (61), Kalantūran (21), Kalvappu (33, 34), (5 and Kālāvirguravadigal Kändarbor 6), Kittūr (22), Kilga (64), Kilgāna (62), Killu (3), Kucēlam (49), Kundavarmmerasa (62), Kottara (12), Kodakaņi (7), Kolattūr (32, 49), Gandhavarmma (59), Gunamatiavvegal (55), Gunasāgara (62), Gunasēnaguruvar (12), Candagāmuņda (8), Candragupta (29), Candradēvacāryyanāman (36), Caritaśrīnāmdhēyaprabhu (14), Cittur (19), Citravahana (3 and 62), Cendugoli (4), Jelugür (5 and 6), Tarekādu (31), Tīrtthadaguruvadigaļ (9), Thittagapāna (18), Damitāmatī (57), Dallaga (38), Dēva khantiyar (42), Dēvereva (8), Dēvācāryya (48), Dhannekuttārevi guravi (11), Dharmma Sēnaguruvadigal (22), Nadirāstra (36), Nandimunipa . . . (54), Nandisēnapravaramunivaran (37), Namilūr (53), Navilūr (43, 44, 46, 48), Nastappa (8), Nägasēnaguruvadigal (32), Nāgamatigantivar (19), Nāyarkhanda (5 Nāvalli (21), Nīrilli (5 and 6), Nedubore (13) Pattiniguruvadigaļ (23), Pallavācāri (20), Pānapabhatārar (13). Perumāluguruvadīgaļ (11), Puspasēnācāri (47), Pegurama (24), Perjediya Modeya Kalapakadaguruvadigal (31), Polikēs'iarasar (2), Banavāse (8), Basantaku:nara (8), Bāladēvaguruvadigal (22), Bhadravāhu (29), Bhavagamundar (8), Madure (21), Malanūr (23), Mahādēviar (62), Mahānantāmatīgantiyar (44), Māra (8), Māviabbegal (51), Mellagavāsaguruvar (26), Mēghanandīmuni (53), Moļeūr (5 and 6), Moniguruvadiga! (19) Moniguruvar (12), Mauniyacāriar (50), Rājñīmatigantiyar (43), Vasantakumāra (8), Valliggāma (5 and 6), Vāraņāsi (5 and 6), Vinayadēvasēnanāmamahāmuni (56), Vis'ākabhatārar (39), Vīrasēna Gāmundar (66), Vrsabhanandīmuni (53), Vettedeguruvadigal (30), Vede Valli (5 and 6), Vēgūr (15), Vokuli (8), Ś'āntapa (8), Ś'āntarasa (64) Ś'āntisēnamunīśan (29), Ś'rī Jambunāvgir (17), Š'rīpogillisēndrakamahārājar (5), Śri Rāmapunyavallabha (8), Śrīvikramādityabhataraka (4), Śrīvinavāditvaraiās'raya (5), Sarppacūļāmaņi (60), Sarvvajnabhattārakar (15), Saluvuge (8), Sasimatigantiyar (33), Singanandiguruvadigal (30), Sindera (5 and 6), Sēnavarasar (66), Sorkkagāmundar (5 and 6).

APPENDIX II.

PROPER NAMES.

The proper nouns of these inscriptions consist of: Names of—(1) Kings, (2) Queens, (3) Warriors, (4) Monks, (5) Nuns, (6) Merchants, (7) Landowners, (8) Writers of inscriptions and (9) Names of places and countries.

1. Names of Kings -

Āļu-arasar (62), Ereveḍi (7-6), Kundavarmmarasa (62), Citravāhana (3 and 62), Polikesiarasar (2), Ś'āntarasa (64), Ś'rīpogillisendraka-mahārājar (5), Ś'rīvikramāditya bhaṭāraka (4), Śrīvinayāditya rājāṣ'raya śripṛthivīvallabhamahārājādhirāja paramēṣ'vara bhaṭārar (5), Sēnavarasar (66).

- 2. Names of Queens:— Mahādēviyar (62).
- 3. Names of Warriors:—
 Kappe-Arabhaṭṭa (61), Kāndarbor (5 and 6),
 Nāgeṇṇan (3).

4. Names of Monks:—

Ugrasēnaguruvadīgaļ (23), Uļļikkalguruvadīgaļ (3), Rṣabhasēnaguruvadīgaļ (32), Kaļantūran (21) Kālāvirgguruvadīgaļ (31), Kucēlam (49), Gandhavarmman (59), Guṇasēnaguravar (29), Candragupta (29), Candradēvācāryyanaman (12), Tīrtthadaguruvadīgaļ (9), Caritaṣ'rīnāmadheya prabhu (14), Dēvācāryya (48), Dharmmasēnaguruvadīgaļ (22), Nāgasēnaguruvadīgaļ (32), Nandimunipa (54), Nandi-sēnapravara Muni varan (37), Paṭṭiniguruvadīgaļ (23), Perumāļuguruvadīgaļ (11), Pānapabhaṭārar (13), Puṣpasēnācāri (47), Pegurama (24), perjediyamodeyakalāpakada guruvadīgaļ (31), Bāladēvaguruvadīgaļ (22), Bhadravāhu (29), Meļļagavāsaguravar (26), Mēghanandīmuni

(53), Mōniguruvaḍigaļ (19), Mōniguruvar (12), Mauniyācāriyar (50), Vinayadēvasēna nāmamahāmuni (56), Viṣ'ōkabhaṭārar (39), Vṛṣabhanandīmuni (53), Veṭṭeḍeguruvaḍigaļ (30), Śāntisēnamunīṣ'an (29), Sarppacūļamani (60), Sarvajñabhaṭṭārakar (15), Singaṇandiguruvaḍigaļ (30).

5. Names of Nuns: -

Āryayanāmikā (52), Guņamatiavvegaļ (55), Damitāmati (57), Dēva . . , . . . khantiyar (42), Dhaṇṇekuttarēviguravi (11), Nāgamatīgantiyar (19), Prabhāvati (57), Mahānantāmatīgantiyār (44), Māviabbegaļ (51), Rājñīmatīgantiyār (43), Śrī Jambunaygir (17), Sasimati śrīgantiyār (33).

6. Names of Merchants:—

Āneseţi, Dēvereya, Naṣṭappa, Basantakumara, Sāntapa (8).

- 7. Name of the blacksmith: Vasantakumāra (8)
- 8. Names of Landlords:—

Edeyagāmuṇḍar (5 and 6), Candagamuṇḍa (8), Bhāvagāmuṇḍar (8), Māra (8), Moleyūramaṇiyagāmuṇḍar (5 and 6), Vīrasēnagāmuṇdar (66), Vōkuli (8), Sorkkagāmuṇḍar (5 and 6.)

9. Names of writers of inscriptions:—

Pallavācāri, S'ri Rāmapuņaya vallabha (8), (20).

About the names 'Dallaga (38)' and 'Nārāyaṇayyamgaļ' (66) the details are not known, as the inscriptions are incomplete.

10. Names of Places:-

Agali (12), Aṇḍugi (5 and 6), Amali (5 and 6)) Alamvalli (5 and 6), Ullikkal (10), Kalbappu (kalvappu), (33, 34), Kittūr (22), Kilga (64), Killu (3), Kilgāna (62), Koṭṭara (12), Koḍakaṇi (7), Koḍattur (32, 49), Cittūr (19), Cendugoli (4), Jelugūr (5 and 6), Tarekāḍu (31), Thiṭṭagapāna (18), Navilur (43, 44, 48, 46), Nāvalli (5 and 6), Nīrilli (5 and 6), Neḍubore (13) Banavāse (8) Madure (21), Malanūr (23), (66), Moļeūr (5 and 6), Vāraṇāsi (5 and 6), Vaḷḷiggāma (5 and 6), Veḍevaḷḷi (5 and 6), Vēgūr (15), Sindera (5 and 6), and Saluvuge (8).

11. Names of Countries:—

Adeyere-nāḍu (19), Eḍevolal-nāḍu (8), Nadirāṣṭra (36), Nāyarkhaṇḍa (5 and 6).

The name of Namil-ur (the peacock village) is translated into Skt. as Mayūra-grāma (52, 57.)

APPENDIX III.

VERSE INSCRIPTIONS.

Of the 66 inscriptions. 22 are in verse.

Inscriptions 35, 41, 46, 51, 54 seem to be in verse, but the exact nature of the metre cannot be ascertained on account of the missing words. 46 seems to be in Śārdūla or Mattēbha vikrīḍitavṛtta- a samapāda metre in Skt.

Of the 22 verse inscriptions, 61 is in Kanarese metre tripadi¹, excepting the first stanza. It is a metre of three lines; each line differs from the other in length and in the number of moras (or mātrās); there is alliteration of the second letter of each line.

The distribution of moras in each of these three lines is:--

- 1. 20 moras in 4 feet.
- 2. 17 moras in 4 feet.
- 3. 13 moras in 3 feet according to Nāgavarmma.

But the 2nd foot has more than 18 moras here in the third and fourth stanzas.

This is a viṣamapādavṛtta in Kanarese.

The other stanzas are all in Skt. metres. They are .--

		$No.\ of\ the$
	Name of vṛtta.	$inscription\ where$
		$it\ \emph{is}\ found.$
1.	utpalamāle $(203)^2$	20, 52.
2.	campakamāle (206)	40, 53.

^{1.} Chandombudhi, 299 p. 98.

^{2.} A descriptive account of these vertas is given in Nagavarma's Karnātaka Chandombudhi. The number in brackets against the names of the vertas refers to the verse wherein its lakṣanas or characteristics are given in the book referred to above.

		No. of the		
	$Name\ of\ vrtta.$		scription where	
		7	it is found.	
3.	mamgalam (185)	••••	57.	
4.	mattēbhavikrīḍita (202)	••••	33, 34, 44, 45,	
			50.	
5.	mallikāmāle (194)		29.	
6.	mahāsragdharā (210)		14, 36, 3 7.	
7.	vamśastha (150)	••••	57.	
8.	vasantatilaka (171)		49.	
9.	śārdūlavikrīḍita (200)		15, 21, 25, 60.	

The characteristics of each of these metres are the same as those in Skt. except the alliteration (prāsa) of the second letter in each line in Kanarese. These are all samapāda vṛttas or stanzas having four lines of equal length.

The following verses do not conform to the description given above:—

Inscription 36—1st line—words missing.

- 36.—ll. 1, 3 and 4 defective—words missing in 1 and 4, and more words in 1. 3.
- 59.—1st line defective because of long ē. There are only three lines.
- 63.—ll. 2 and 3 are defective—words missing in 1 and 4; two mātras are in excess.

In alliteration, there are short and long letters, bindu and double consonants. When analysed, the following types of alliteration are found:—1

1. Short letters (laghu): 14, 33, 34, 37, 44, 45, 51, 53, 57.

^{1.} Chandombudhi 43 to 50.

- 2. Long letters (guru): (by nature or position.), 15, 20, 21, 25, 29, and Badāmi (1), 56, 60) 1 (2 and 3).
- 3. Bindu with a consonant: 50, 52.
- 4. Double consonants: 29.

Later writers on prosody call 1, 2, 3 and 4 simhaprasa, gajaprāsa, vṛṣabhaprāsa and hayaprāsa respectively.

In 34 the consonants of a varga are treated as prāsa letters.

The later writers call this 'vargodita' prāsa.¹

In 25 there is the alliteration of the first two letters of each line, which is called by later writers 'dviprāsa.' 2

The prāsa in 36: the last two lines have -di- and -ra-instead of -na of the first two lines. This is defective, according to later Kanarese writers.

^{1.} Chandombudhi 56.

^{2.} Do 65.

APPENDIX III.

FIGURES OF SPEECH IN THE INSCRIPTIONS.

The following alamkārās are found:—

- A. upamālamkāra (simile)¹ 21, 34, 37.
- B. Rūpakālamkāra (metaphor)² 14, 15, 20, 29, 33, 35, 44.

^{1.} KVV. 159; KRM. III 59, et seq.

^{2.} KVV. 161; KRM. III 12, et seq.

APPENDIX IV.

SKT. VERSES IN KANARESE INSCRIPTIONS.

In the following inscriptions, Skt. ślōkas are found:—

8, 32, 58, and 62.

- In 8. The first 26 lines; lines 31-36.
 Nāgasēna managham guṇādhikam
 - In 32, Nāganāyakajitāri maṇḍalam rajapūjyamamalam śriyāmpadam. kāmadam hatamadam namāmyaham.

This is in praise of Nāgasēnaguruvaḍigaļ who ended his life by Sanyāsanavidhi.

2. In 53. Mayūraggrāmasamghēsya, saundaryyā Āryyanāmikā Kaṭapragiri śailēca sādhitasya samādhitaḥ.

There are a few words missing in this inscription. The name of the person who ended his life is not found.

3. In 58 grāme Mayūrasamghēsya, Āryyikā Damitāmatī Kaṭvapragirimadhyasthā sādhitā ca samādhitā

The death by sanyāsana of a lady is referred to here. The name cannot be made out as the word is only 'Damitāmatī....

In 8, the history of the grantor is narrated in Skt. in the first 26 lines. In ll. 35 and 36 "Mahāsāndhi-vigrahika śrī Rāmapuṇyavallabhēna likhitamidam ś'asanam."

In the Taṭṭukōṭi inscription of about 700 A.D. (62) the following Skt. ślōka appears after the first Kan. stanza:

varan tējasvinō mṛttyur na tu mānāvakhaṇḍanam mṛttyus tatkṣaṇikō duhkham, mānabhamgam dinē-dinē.

APPENDIX V.

INDO-ARYAN LOANWORDS.

The following Indo-Aryan loanwords are found in these inscriptions.

A. 1. ayya < ārya (SMD. 270, 282)¹; 2. avve, abbe<ambā 3. appa<ātmā 4. ācāri<ācārva (SMD. 254); 5. īsara<īśvara (SMD. 253, 281); 6. kavile< kapile (SMD. 258); 7. khanti, ganti < gantrī (SMD. 261); 8. gōsiga < ghōsika; 9. canda < chanda (SMD. 255); 10. canda < candra (SMD. 261); 11. Janna < yajña (SMD. 269); 12. Jede < Jate (SMD, 255, 271); 13. tapaccale < tapacchalā? (SMD. 255); 14. tāna < sthāna (SMD. 257, 278, KSS. 149); 15. dēgula < dēvakula (SMD. 295); 16. dhoņe < droni (SMD. 261, KSS. 154); 17. nisidige<nisēdhikā (SMD. 254); 18. padiprati (SMD. 261); 19. bata
bhattāraka. bhatāra < bhartā, bhartāra; 20. bhanta < bhakta (SMD. 295); 21. mānākka<mānavaka; 22. menasu <marica (SMD, 282); 23. mode<munja (SMD, 282,</pre> 285?); 24. risi<rsi (SMD. 268, KSS. 159); 25. vīsa <vims'a; 26. sakki<sāksi (SMD. 254, 262, 270);</p> 27. sasimati<ś'aś'imati (SMD. 254); 28. sāsira< sahasra (SMD. 254); 29. singa, simgha < simhat (SMD. 263); 30. siri<ś'rī (SMD. 254, KSS. 147); 31. setti<ś'rēsthin (SMD. 254, KSS. 138).

These are treated as tadbhavas⁴ or words corrupted from Skt. by later grammarians. But such a modification of Skt. words in Kanarese is not

^{1.} The number within brackets gives the sutra which explains the formation of the form.

^{2.} K.R.M. uses this word in II 53 (K.B. Pathak's Edition) and II 55 in the Madras University Edition), but K.R.M. is a translation of Dandin's Kavyadars'a and this verse corresponds to tadbhava used in that Book I 32-37, in a different sense. See SMD. 235, KSS. 138-160.

possible as can be seen from B. infra. Further, these words are found in Pkt. in almost the same form. Hence the loans are from Pkt. and not from Skt. though no Kan. grammarian has stated that these are Pkt. loans. The rules framed by Kan. grammarians are practically translations of the sūtras of Prakṛtaprakāś'a with slight modifications to suit the genius of the Kan. language.

These Pkt. lws. came into Kan. when Pkt. was a spoken language in the Kanarese country¹: (a) The existence of Aśōka's inscriptions (1) at Brahmagiri, Śiddāpura and Jaṭinga Rāmes'vara Hill in what is now the Mysore State; (2) at Pālkiguṇḍu and Gavimaṭha² in what is now the Hyderabad State (Deccan) with later Kan. inscriptions on the other side of the same rocks; (b) the existence of Pkt. inscriptions at Malavaḷḷi (E. C. VII. Sk. 263) and (c) the prevalence of Jainism in South India before the spread of Buddhism, show that Pkt. was used as a spoken language in South India about the third century B. C.

Gōsiga, dēgula and nisidige represent the loans from an earlier stage of Pkt; baṭa shows the characteristic tendency of the Kan. language to shorten long consonants; in bhamta and simgha, aspirates are retained; the nasal of bhamta is noticed by later grammarians, but is left unexplained (N. K. bhatta and batta.)

B. 1. nāgir<nāyakiyar; 2. nitta<nitya; 3. parūta<parvata; 4. Banavāsi<p>Vanavāsi; bēgam
vēgam; 5. mattaru<mātrā; 6. mariyāde<maryādā; 7. māsēna<mahāsēna (SMD. 291); 8. mōni</p>
mauni (SMD. 282); 9. riṣi<r, prebably contamination between Skt. rṣi and Pkt, risi;</p>
10. š'iṣittiyar<ś'iṣya+ittiyar; 11. saṃgha.</p>
